RUNWAY CONSTRUCTION PROJECT

FOR IMMEDIATE RELEASE: June 1, 2007

(Anchorage)—The Ted Stevens Anchorage International Airport will be conducting repairs on runway 7R/25L that will require the runway to remain closed during construction. We expect the runway to close on the morning of June 5th and stay closed for two weeks while the repairs are being completed. Repairs will include paving, crack sealing, rubber removal and painting.

As a result of the runway construction activity, you may observe flight patterns not normally used and greater frequency of flights over the Anchorage area. The Airport recognizes there will be temporary noise impacts on the community and wants the public to understand the reasons.

For additional information, please call the Airport's Noise Hotline at (907) 266-2648 or visit the website at www.anchorageairport.com.
