

You are invited to review the design in progress for two Homer area projects.

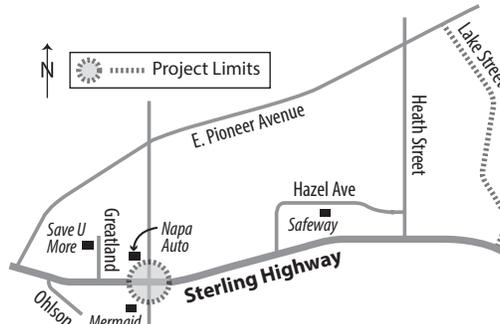

Two Homer Area Projects

Highway Safety Improvement Program (HSIP) Sterling Highway & Main Street Intersection Improvements

Project Number 0211(060)/55984

The team's work on the detailed design of the Sterling Highway and Main Street intersection began in March 2015 shortly after the completion of the environmental document. A traffic signal with right-turn lanes was selected as the preferred alternative. The design is about 65% complete.

The purpose of the project is to resolve safety concerns at the intersection. The team will be available at the open house to answer questions and receive feedback.

Lake Street Rehabilitation

Project Number 0001422/52461

The second project is in cooperation with the Federal Highway Administration (FHWA) and proposes to rehabilitate the Lake Street corridor between the Sterling Highway and Pioneer Avenue/East End Road. The purpose of this project is to extend the service life of the roadway, enhance safety and capacity, and improve pedestrian and bicycle facilities. The work will include; shifting the roadway centerline approximately two feet to the west to accommodate bike lanes, repaving, reconstructing curb and sidewalk, replacing culverts, re-establishing ditches and relocating utilities as necessary. The project is currently in design and approximately 60% complete.

OPEN HOUSE

Tuesday, July 14, 2015

Time: Stop by any time between 4 and 7 pm
Location: Best Western Bidarka Inn
575 Sterling Highway, Homer
