

## **SECTION 4**

### **AIRCRAFT OPERATIONS**

#### **4.3 TRANSIENT PARKING** *(rev. 12/2024)*

##### **West Ramp**

The South Cargo Apron is the primary location for parking of transient wide body or other large cargo aircraft on the west side of the airport. Transient parking is only available through a Fixed Base Operator (FBO) and/or ground handling agent. Fee payment and parking arrangements must be made prior to arrival. Airport Operations will coordinate parking directly with the ground handler.

Parking of wide-body cargo aircraft at any location other than a tenant lease lot or the South Cargo Apron will require prior permission from Airport Operations. If the cargo apron is full, or extenuating circumstances exist, approval may be granted for parking in other areas.

##### **East Ramp**

All transient aircraft with a Certified Maximum Gross Take-off Weight (CMGTOW) of 6,000 lbs. or less are encouraged to use East Ramp transient parking, or arrange private lot parking with an FBO/tenant. Rows 10, 11, 12, and 13 are designated for year round transient parking. The maximum stay in transient parking is two weeks. Fee payment envelopes, a collection box, restrooms, and a public telephone are available in the transient pilot's lounge, located at the base of the tower on taxiway Delta.

#### **Map 4-1 East Ramp and Float Pond Transient Aircraft Parking**

##### **Transient Float Pond Parking**

Float plane visitor tie-downs are limited to four spaces at the northeast end of the Float Pond as depicted above. Information and fee envelopes are available at the kiosk adjacent to the Float Pond launching ramp in the northeast corner of the float pond. In the event transient parking is full, contact Airport Operations at 907-474-2530.

Additional transient tie down parking is available on the taxiway leading to the Air Park. Payment envelopes, a public information bulletin board, and restrooms are located adjacent to the south pavilion in the Air Park campground. More complete information on the Air Park is provided in Section 5.5.
