## Please fill in the following information for Overweight Permits:

- A. The number of axles and axle groupings in the configuration.
- Spacing between each axle group and between each axle within a group. Each is measured from the B. center to the center of each axle.
- C. Weight distribution (weight on each axle group).
- Overall wheelbase, as measured from the center of steering axle to center of last axle on the truck or D. trailer.
- E. Tires tread width (nominal) and number of tires on each axle. Sometimes the width of each axle (out to out tire width) is also needed.
