

# Barrow Maintenance Facility & Airport Improvements

AKSAS Project No. 62378

The Alaska Department of Transportation and Public Facilities (ADOT&PF) invites you to a public meeting on a proposed Maintenance and Operations (M&O) Combined Facility and Improvements at the Barrow Airport outlined in the recently completed Barrow Airport Master Plan. The new combined maintenance facility will be located on the south side of the airport. The facility will include an Aircraft Rescue and Firefighting facility, Snow Removal Equipment Building, heated sand storage, deicing chemical storage, dispensing vehicle and other associated chemical handling equipment, and living quarters for ADOT&PF airport personnel. The M&O facility will be placed on a gravel pad connected with a two-lane access road to be constructed with this project.

The North Apron Expansion includes extending the north apron to the south; this generally occurs on the existing apron embankment, but moves the taxiway centerline south 20 feet to allow clearance for aircraft to pass while Jets are parked on the apron. Additionally the north apron will be extended to the east by approximately 400 feet. Both projects will be funded by the Federal Aviation Administration and State of Alaska.
