

**YANKOVICH-MILLER HILL ROAD RECONSTRUCTION AND MULTI-USE PATH
PROJECT NO. NFWY00139/0002(378) UPDATES**

PURPOSE & NEED

Yankovich Road and Miller Hill Road serve vehicular and pedestrian traffic between Sheep Creek Road and Ballaine Road. Miller Hill Road is a 0.71-mile north-south roadway that connects Sheep Creek Road on the south and Yankovich Road on the north with a separated bike path along the east side. Yankovich Road is a 1.67-mile east-west corridor with residences and some public points of interest such as the Large Animal Research Station (LARS). The two roads are similar in character with narrow 10-foot lanes for vehicular traffic and 0- to 2-foot shoulders for other users. To improve safety for pedestrian, bicycle and vehicle traffic on Yankovich Road and Miller Hill Road, the Alaska Department of Transportation & Public Facilities (DOT&PF) proposes to:

- Upgrade/widen Yankovich Road to 32 feet (11-foot lanes and 5-foot shoulders);
- Reconstruct Miller Hill Road by widening the existing roadway surface toward the separated path to 30 feet (11-foot lanes and 4-foot shoulders);
- Pave the remaining portion of the Miller Hill Road separated path;
- Improve sight distance and road geometry at roadway and driveway intersections;
- Improve drainage; and
- Raise or lower Yankovich Road to eliminate blind spots.

The project schedule is outlined below.

PROJECT SCHEDULE

COMPLETED TASKS (as of Sep 2018)	DATE
Environmental Document	May 2018
FUTURE TASKS (as of Sep 2018)	DATE
Detailed Design Work	Ongoing
Local Planning Approval	Sep 2019
Right of Way Acquisition	Dec 2019 to Dec 2021
Utility Relocation Agreements	Dec 2019 to Dec 2021
Project Bidding	Mar 2022
Construction	May 2022
