

Alternatives Considered

Alternative I – High – High Road Corridor

This corridor generally follows the USFS Section 4407 reciprocal easement. This is a northerly, upland route from Lake Harriet Hunt to Leask Lake. Beyond Leask Lake the road bears to the northeast then turns southeast to join the existing Shelter Cove Road.

Alternative II and II (A) - Low – Low Road Corridor

This corridor follows either the White River Road or would use a variation around the north of Lake Harriet Hunt to connect with existing logging roads in the Mental Health Trust, and then follows the shore of George Inlet to the Salt Lagoon, then northerly to where it joins the existing Shelter Cove Road.

Alternative III- High - Low Corridor

This corridor follows the Section 4407 reciprocal easement to Leask Lake similar to Alternative I, then drops down to the shore of George Inlet at Leask Cove. From there, it follows the Low Road corridor to the Shelter Cove Road.

Alternative IV and IV (A) - Low - High Corridor

This corridor follows either the White River Road or the variation around Lake Harriet Hunt to Leask Cove where it turns northerly to connect with the Section 4407 reciprocal easement east of Leask Lake then turns southeasterly to join with the existing Shelter Cove Road.
