

DOT&PF Instructions

SWPPP Training Log (Form 25D-125)

On-going, on-site training must be documented on this form no less frequently than once per month Section 641-2.06. The Contractor uses this form to document compliance with the permit requirement to train all employees and subcontractors as necessary to make them aware of the BMPs so they follow applicable procedures.

It could be held in conjunction with safety meetings. The training could be short (10 minutes), but frequent (weekly) or held in another manner. Example training topics for a session are listed on the form such as “erosion control BMPs” or “emergency procedures.”
