

SECTION 304

SUBBASE

304-2.01 MATERIALS. *Add to the end of this subsection.*

Crushed glass may be combined with soil-aggregate material to be used in subbase construction. Meet 703-2.15 requirements.

304-3.01 CONSTRUCTION REQUIREMENTS. *Add to the end of this subsection.*

Do not place subbase soil-aggregate containing glass cullet:

1. Within four feet from the face of any embankment slope,
2. Within 150 feet from any surface water body,
3. In embankment areas where culvert placement is required,
4. In contact with any geosynthetic material.
