2017 Standard Specifications Revision Summary

The 2017 Edition of the *Alaska Standard Specifications for Highway Construction* includes 35 Statewide Special Provisions to the 2015 Edition that were issued by Chief Engineer's Directive and intended to apply to all FHWA projects. Another 31 draft Special Provisions previously reviewed by the regions and approved by FHWA but not issued by Chief Engineers Directive were also included in this edition.

Statewide Special Provisions (SSP) previously issued under a CE Directive are denoted by an "*". SSPs without the "*" are provisions that were previously coordinated with DOT&PF regions and Alaska AGC, approved by FHWA but not previously issued.
