MEMORANDUM

State of Alaska

Department of Transportation & Public Facilities

Commissioners Office

TO: Distribution **DATE**: June 4, 2024

PHONE NO: 465-3900

FROM: Ryan Anderson, P.E. SUBJECT: Change in Organizational

ommissioner Structure for the Alaska
International Airport System

Effective immediately, administrative operations managers for the Alaska International Airport System will now report directly to the system's airport managers.

Throughout the Department, we have observed significant improvements in budget reporting and development by strengthening accountability at the top management levels. To further enhance the accuracy, transparency, and efficiency of our financial and operational budget processes within the International Airport System, we are establishing direct reporting structures between operations managers and the system's airport managers.

Going forward, airport managers will play a critical role in driving initiatives aimed at improving service delivery and operational performance, all while adhering to the appropriate resource and budget constraints.

Thank you for your attention to this important change and for your continued dedication to our mission.
