

Huffman Road Pavement Preservation Project

Project Fact Sheet

Project Description

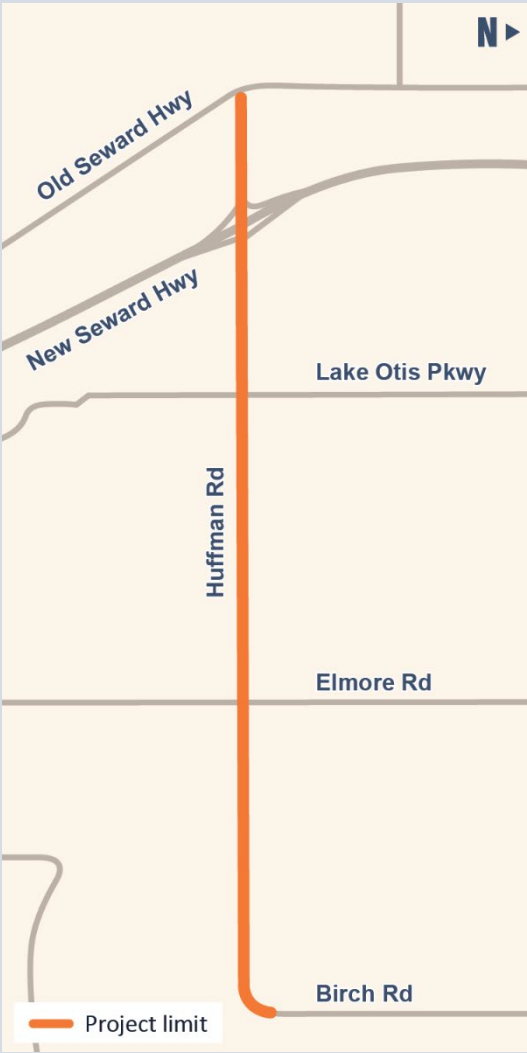

Due to deteriorated pavement condition, the State of Alaska Department of Transportation and Public Facilities (DOT&PF) proposes to resurface Huffman Road from Old Seward Highway to Birch Road as part of the larger project Anchorage Area Group A Pavement Preservation. This project would extend the service life of the roadway and reduce future maintenance costs. The key design features of this project may include:

- Resurfacing
- Drainage improvements
- Structural section repairs
- Signage & striping
- Roadside hardware
- Vegetation clearing
- Utility relocation
- Guardrail replacement and repair
- Culvert replacement and repair
- Pedestrian facilities and Americans with Disabilities (ADA) compliant curb ramps

Project Schedule

Public Involvement	Ongoing
Preliminary Design	2023 – 2025
Final Design	2025 – 2026
Anticipated Construction (or later based on available funding)	2027
