Guardian 275® translucent wall systems provide glare-free natural light to interior spaces, while also allowing for flexibility in design and long-term durability.

Guardian 275® wall systems feature lightweight sandwich panels and a framing system that holds panels in place without visible fasteners. Their innovative design provides a "snap and capture" detail that provides rapid field installation and secure holding power for a clean, uncluttered sight line that improves aesthetics and tamper resistance. Guardian 275® wall systems also offer unsurpassed protection against water and air infiltration by using only EPDM gasketing and long-lasting high-performance sealants.

GUARDIAN 275® QUICK SHIP™

Pre-engineered Guardian275® pyramid and single slope skylights with shorter lead times. [MORE »](#)

SPECIALTY APPLICATIONS

Blast and hurricane protection systems, and removable skylights. [MORE »](#)
