

# FACT SHEET

## HSIP: WASILLA-FISHHOOK RD & SPRUCE AVE/PECK ST ROUNDAABOUT

Project Number 0525020/CFHWY00790

### Project Scope

To reduce the potential of multi-vehicle injury and fatal crashes, a single lane roundabout is proposed at the intersection of Wasilla-Fishhook Road and Spruce Avenue/Peck Street. This proposed mitigation was chosen, rather than a traffic signal, due to availability of right-of-way and lesser long term maintenance costs. The proposed mitigation is anticipated to reduce the severity of crashes and reduce vehicular travel speeds through the intersection. Start and end points of the project will tie into existing roadway lane configurations on the north and south sides of the intersection. Improvement of intersection lighting will be considered consistent with intersection type.

### Current Status

This project is working through preliminary design of roundabout geometry. The environmental document is in progress and survey has been received and incorporated.

### Schedule

Environmental Document - 2022  
Final Design – 2022 to 2024  
Construction – 2025

### For More Information

Contact the Wasilla-Fishhook Spruce-Peck RA project team members with questions, concerns, or comments any time.
