

DOT&PF staff,  
your communications team is proud to introduce

Alaska Project Exchange

**APEX**  
Alaska DOT&PF

a set of tools to connect Alaskans to construction information

## WHAT IS IT?

**Alaska Project Exchange  
tools are:**

- Updated traffic information at **511.alaska.gov**
- Interactive construction mapper and website at **dot.alaska.gov/construction**

## What's **different** this year?

- Alaska Navigator has retired
- 511 updates are automatically uploaded
- Extra support for social media
- Increased outreach to rural communities

## BUT WHY?

**(Thanks for asking!)**

In the past we've done a good job telling people about construction **traffic impacts**, but not so good at talking about **what we're constructing** and **why it's important**.

APEX streamlines traffic info and provides more about the **what** and the **why** with a consistent statewide approach.

## Questions?
