

Seward Highway MP 75-90 Road and Bridge Rehabilitation project, April 2019. Ted Meyer, Alaska DOT&PF

Alaska's transportation workforce detours: Maximizing training opportunities and outcomes in DOT&PF's key industries

We're working to increase workforce participation in Alaska's priority occupations!

Alaska Department of Transportation and Public Facilities (DOT&PF) are teaming up with UAA's Institute of Social and Economic Research (ISER) to:

1. Model Alaska's supply and demand of workers in DOT&PF's priority occupations
2. Describe Alaska's current capacity and activity in existing training programs
3. Identify challenges and recommendations for improving the workforce development pipeline

What we're doing

We are compiling data and information from state and national databases, doing web searches, and reaching out to training programs and employers. We need input from training programs, employers, and workers to give the full picture of Alaska's employment landscape.

How you can give input

DOT's priority occupations:

- Carpenters
- Cement masons
- Electricians
- Ironworkers
- Operating engineers
- Piledrivers
- Plumbers and pipefitters
- Truck drivers
