## **INTRODUCTION**

The Alaska Office Building provides this information as a reference guide in the event of an emergency.

It is each occupant's responsibility to be aware of the procedures listed herein and the location of the buildings emergency exits so that injuries and property damage may be minimized during an emergency.

### **Emergency Telephone Numbers**

1. Juneau Fire Department	911
Juneau Police Department	911
Emergency Medical Aid	911
JPD Non-Emergency Dispatch	586-0600
2. Facilities Call Center (24 hours)	465-5689
3. Facilities Call Center Fax	465-3326
4. Building Security	465-2100
5. Parking Security	465-4090
6. State of Alaska Juneau Facilities Management	465-5683

### **Alaska Office Building Address**

350 Main Street  
Juneau, AK 99801

## **BUILDING EMERGENCY SYSTEMS**

### **1. EMERGENCY EXITS**

There are two stairwells located within the Alaska Office Building. Please familiarize yourself with their location.

### **2. FIRE ALARM PULL STATIONS**

Pull stations are located on each floor. In case of fire in or near your suite, activate the nearest pull station, regardless of whether the alarm signal is already sounding.

### **3. AUDIBLE ALARM SYSTEM**

In the event the building's audible fire alarm system activates a continuous ring; occupants should evacuate the building using the closest stairway quickly and safely.

### **4. SMOKE DETECTORS**

The building is fully equipped with numerous smoke detectors on each floor. These systems are automatically monitored so that, should one be activated by smoke or heat, the alarm signal will sound and the fire department will be alerted.

### **5. FIRE EXTINGUISHERS**

Fire extinguishers are located throughout the building. Extinguishers are intended for use in small, controllable blazes. The extinguisher should be held upright with the nozzle pointed at the base of the flames. Please do not attempt to "fight" fires unless you can do so safely.

### **6. ELEVATORS**

Do not use the elevators if there is a fire alarm. They can only be used for evacuation by the Fire Department and will not respond to lobby call buttons.

# **EARTHQUAKE**

## **Emergency Phone Numbers**

- |    |                                 |          |
|----|---------------------------------|----------|
| 1. | Fire/Police/Medical Departments | 911      |
| 2. | Facilities Call Center          | 465-5689 |
| 3. | Security                        | 465-2100 |

## **IMPORTANT DO'S**

1. Take cover under a desk, in a doorway, or in the center of the building.
2. Stay clear of bookcases, file cabinets, glass items, windows, and other similar items.
3. Follow instructions of the fire department and Facilities Management.
4. Keep calm.
5. Turn off all electrical equipment.
6. Wait for instructions from Facilities Management in the event of an extended power failure.
7. In the event of an evacuation is necessary, evacuation procedures will be announced by persons in authority.

## **IMPORTANT DONT'S**

1. Don't panic.
2. Don't use telephones.
3. Don't use elevators.
4. Don't stand near windows.
5. Don't use an open flame.
6. **DO NOT GO OUTSIDE THE BUILDING** unless instructed to do so by persons in authority. If you are outside, move away from the building to protect yourself from falling glass.

## **IMPORTANT SUPPLIES**

1. Flashlight and extra batteries.
2. Portable battery operated radio.
3. First Aid Kit and Manual.
4. Emergency food and water, non-electric can opener.

## **ELEVATOR EMERGENCY**

Elevators are a very safe mode of transportation. They do occasionally malfunction. When they do, follow these guidelines:

### **IMPORTANT DO'S**

1. Remain calm.
2. Use the automatic telephone located behind the panel or the telephone button inside the elevator cab. The phone is monitored 24 hours each day.
3. If you observe a malfunction from outside the elevator, notify the Facilities Call Center at 465-5689, State Office Building Suite 700.

### **IMPORTANT DON'TS**

1. Don't force the elevator doors open.
2. Don't panic.
3. Don't jump in elevators; the most common cause for elevators to get stuck between floors is its occupants misusing the equipment. Jumping in the elevators causes over-speed, which can activate the brakes.

### **THIS IS WHAT HAPPENS**

1. When you pick up the emergency telephone in the elevator, an operator will communicate with you.
2. The operator will obtain assistance from the elevator service company.
3. Passengers will be assisted as quickly as possible.
4. Building Maintenance is expressly forbidden from recovering people from stuck elevators. Only trained, authorized personnel of the elevator service company can accomplish this. Therefore, if you are stuck, you must wait until an elevator technician arrives at the building; this can easily take 20-30 minutes, please be patient.

## **EVACUATION**

### **Emergency phone numbers**

- |    |                                 |          |
|----|---------------------------------|----------|
| 1. | Fire/Police/Medical Departments | 911      |
| 2. | Facilities Call Center          | 465-5689 |
| 3. | Security                        | 465-2100 |

### **IMPORTANT DO'S**

1. Follow the instructions of your SERC, the fire department, and Facility Manager.
2. Where possible, assist disabled personnel to the stairwell landing where they will be picked up by emergency personnel. The SERC will coordinate this effort.
3. Close the door to your office as you leave.
4. Form evacuation line at the nearest stairwell.
5. Use stairwells for evacuation. Be alert for other tenants and fire department personnel who might also be using the stairwell.
6. Keep talking to a minimum.
7. Use handrails in stairwells.
8. Move quickly, but calmly.
9. Listen for instructions and follow them.
10. Clear emergency stairwell doors as soon as you exit.
11. Those evacuating through the northeast stairwell should proceed across the street to the assembly point in front of the City Museum. Those evacuating through the southeast stairwell should proceed down Main Street to the assembly point in front of the Court Plaza Building.
12. Please check with your Emergency Response Coordinators to verify accountability after evacuation from the building.
13. Wait for an "ALL CLEAR" announcement or for further instructions.

### **IMPORTANT DON'TS**

1. Do not try to use the elevators; they will not respond.
2. Do not return to the area to retrieve items such as purses, coats, etc.
3. Do not block stairwells, vestibules, or doorways.
4. Do not run or create a panic situation.
5. Do not return until the fire department or Facilities Management gives an "ALL CLEAR".

## **EVACUATION PROCEDURES/GUIDELINES**

The following is for the use by occupants of the Alaska Office Building, Volunteer SERCs and their alternates. Here you will find basic procedures to be followed when a fire evacuation alarm is sounded in the Alaska Office Building. **We urge all occupants of the Alaska Office Building to become familiar with at least the general evacuation procedures.**

### **Definition of Terms:**

**ERCs:** Emergency Response Coordinator. There is volunteer ERC assigned to each section within the AOB along with one alternative.

**SERC:** Senior Emergency Response Coordinator. There is one SERC assigned to each floor of the AOB along with one alternate.

**Facilities Manager:** Gareth Jones or his alternative.

**\*\*All emergency personnel can be identified by high visibility vests and hard hats\*\***

### **General Evacuation Instructions for Occupants of the Alaska Office Building:**

When you hear, or become aware of an active FIRE ALARM it is recommended that you do the following:

1. Keep calm. DO NOT panic or panic others.
2. Quickly terminate your telephone call or activities.
3. Take coat and purses ONLY if they are convenient and immediately available.
4. Progress immediately to your designated emergency exit.
5. Follow the instructions of any SERC or ERC.
6. Walk carefully and DO NOT run. There will be a lot of people converging in the stairwells at one time, so it is necessary to remain calm and yet proceed as quickly and safely down the stairs as you can. Those who have a more difficult time descending the stairs should try to use the handrails. Those who have no difficulty should allow access for those who need to use the handrails. If you see a co-worker that might need a little help, it doesn't hurt to offer some assistance if it can help to keep the egress going at a reasonable rate of speed.
7. Once you are out of the building, keep walking away from the building to allow room for those who are exiting the building behind you. Stay on the sidewalks

and follow the instructions of the SERCs. Stay out of the way of any traffic and/or responding units.

8. If you are unable to descend the stairs your ERC will direct, you to wait in a safe staging area near the stairwell but out of the traffic corridor. Once the stairwell is empty and it is made obvious that it is smoke free and not in immediate hazard, the SERC will then place you inside the stairwell landing. The SERC or ERC will be reporting your location and condition to the Facilities Manager who will alert the responding fire/rescue units. The responding units will then come and get each person left in the building in the order of most immediate peril or need at the time. This procedure is something that you will want to discuss with your SERC or ERC well in advance of any alarm. It might also be a good idea to do a practice run or two in advance preparation.
9. If smoke is present on your floor or if you are caught in smoke, immediately drop to the floor, crawl along the floor where the air is cooler, take short breaths and breath through your nose. If it becomes dark and difficult to see, you must feel your way to the exit. Using voice communications with others will help guide everyone out.
10. Once outside the building, do not try to re-enter unless instructed to do so. If a real event does occur, it may be necessary to evacuate to a staging area away from the AOB.
11. **IT IS IMPERATIVE TO STAY AWAY FROM THE BUILDINGS, INCLUDING THE PARKING GARAGES.** The authorities in command (which will be either fire or police commanders) will let us know when it will be safe to remove your vehicle from the parking garage. Attempting to get your vehicle out of the garage without proper permission will not be looked upon as an act of cooperation by law enforcement officials and could land you in more trouble than it is worth. So, the best course of advice is to follow instructions and stay out of the way. The responding authorities will have a lot to do, and have a lot of responsibility. It is best for everyone's safety to allow them to do their jobs without adding to their burdens.

**General Emergency Evacuation Instructions for all SERCs & ERCs:**

When the fire alarm is triggered the following are the general procedures to be followed when evacuating the Alaska Office Building.

1. When the fire alarm sounds, the SERC and ERC should put on their high visibility vest and walk through their assigned sector reminding all occupants to walk calmly to their egress path. If the weather is cold or wet, and there are no immediate signs of hazard (such as visible fire or smoke) occupants can quickly grab their coats and purses. The SERC should make certain that all occupants are accounted for and out of the sector area before they leave. The SERC should urge anyone who is reluctant or slow in leaving that quick but calm evacuation is mandatory FOR EVERYONE. Anyone refusing to leave must be reported to the Facilities Manager immediately.
2. An ERC of the appropriate gender should check the restroom areas and remind those inside to hurry and evacuate. The ERC should make certain that the restroom is vacant before exiting the area.
3. SERCs should check all conference rooms. If there are guests on the floor (such as attending a meeting) the SERC or ERC should direct the occupants to the proper egress pathway.
4. Each SERC or ERC should be aware of anyone on their floor or section who are unable to negotiate the stairwells due to a disability. Persons with such disabilities should be escorted to a safe area near the stairwell entrance and asked to wait there until the responding fire/rescue units arrive and can safely bring them down. If possible, it is recommended that each ERC discuss the procedures in advance with the person with disabilities. It would be helpful if someone other than a ERC could volunteer to stay with the individual until the responding units arrive for assistance. This person could be the alternate ERC or another co-worker of the disabled person.
5. Once the SERC and ERC have the floor cleared, it is recommended that they then do a final check of the area. Persons with disabilities should be safely staged inside the stairwell landing once it is clear. The SERC should then close the fire door and exit down the stairwell.
6. Upon arriving outside the building the SERC and ERC should check in with the Facilities Manager and provide the status of their sections. Include the following information: (a) were there any signs of a smoke or fire hazard present; (b) whether the section is clear or if anyone refused to egress and; (c)

most importantly, the location of any persons with disabilities left in the stairwell landing and whether there is someone with them.

7. The Facilities Manager will check off each reporting section and floor. If there is a section that does not report, the Facilities Manager should contact the SERC and request that they check into why that section has not reported. This will require that all SERC's stay close by the Facilities Manager until the Facilities Manager has received a report from all sections.
8. The Facilities Manager must inform the responding fire/rescue units of any individuals left in the building, their location, and type of disability. The Facilities Manager may need to ask an SERC to make this contact if the Facilities Manager is still waiting for sections to report. **It is imperative that the responding fire units be advised as soon as they arrive of the location of any individuals left inside the building.**
9. The Facilities Manager will have an amplified speaker horn and a whistle for crowd control and announcements. The Facilities Manager must make decisions regarding crowd movement and gathering based upon the prevailing weather, traffic and egress conditions. The Facilities Manager, with the assistance of SERCs and ERCs should attempt to keep an area clear for the arrival of any responding units. The crowd should be advised to move onto the sidewalks and to spread out so as not to block traffic or to endanger themselves or others.
10. Once the responding fire/rescue units have cleared the building for occupation, each Facilities Manager will be informed by a representative of the building management team. The Facilities Manager will then announce that everyone may re-enter the building.
11. A post-evacuation meeting will be held at a convenient time and location for all to discuss positive and negative points of the evacuation.

### **General Instructions for ERCs:**

The Division of General Services greatly appreciates the time and efforts of the volunteer Emergency Response Coordinators. Their willingness to volunteer demonstrates their dedication to the safety of their co-workers. Without this thoughtful dedication and willingness to volunteer, General Services would be forced into requiring a mandatory participation in an evacuation plan. It is our desire to keep the emergency evacuation program voluntary. The cooperation of voluntary participants is always of a high quality and helps to maintain a higher level of moral and provides for a safer workplace. Therefore, recognizing the fact that each volunteer has their day to day duties and functions of their regular job, it is hoped that the duties of the voluntary Emergency Response Coordinators be kept to a level so as not to be a burden to them

or their co-workers. With that in mind, the following are some ideas and instructions that will help in maintaining a safe evacuation program:

1. Emergency Response Coordinators should be familiar with their sections and the egress exit paths. Emergency Response Coordinators can also act as 'safety eyes and ears' and alert General Services and/or building maintenance of any situation that could hinder an emergency egress; such as blocked corridors or stairwells.
2. It is also a good idea to be familiar with the location of nearby fire extinguishers. It is **not** the responsibility of the Emergency Response Coordinator to inspect the fire extinguishers, however, if you notice an expired tag or any other problem with safety equipment, it only makes sense to bring it to the attention of General Services who will then alert building maintenance to the situation.
3. Emergency Response Coordinators should introduce new employees in their section to the fire evacuation procedures and exit routes.
4. Emergency Response Coordinators are issued an identification badge to wear during an emergency evacuation. It is helpful to the Senior Emergency Response Coordinators to have your name, floor and section written on the badge.
5. Emergency Response Coordinators should also be aware of anyone in their section who has a disability that would hinder their use of the stairwells for exit. The Emergency Response Coordinator should discuss the special procedures with the individual and make certain that you each agree on a safe area to wait for the fire/rescue units. This is also a good time to see if another co-worker would be willing to act in the capacity of a "buddy system" for the disabled person.
6. Emergency Response Coordinators should provide notice to the SERC of any planned vacation or annual leave time and arrange for an alternate to act in their absence.

### **General Instructions for SERCs:**

1. The SERC on each floor is responsible for recruiting and appointing the Emergency Response Coordinators for each sector in their area. The SERC should make certain that each of their Emergency Response Coordinators has a high visibility vest.
2. The SERC maintains and updates their listing of Emergency Response Coordinators. Periodic updates should be provided to the Facilities Manager and Division of General Services. Changes can be emailed to the Facilities Call Center.

3. Establish and maintain evacuation routes and an alternate route for each sector. This is usually only necessary when there is a change in the physical configuration of the floor space. Consideration should be given to areas where bottlenecks might occur.
4. The SERC should also check with each ERC as to the identity and location of anyone with a disability or anyone who cannot use the stairwells for egress. The SERC should maintain a listing of such persons and provide that information to the Chief Emergency Response Coordinator.
5. The SERC may be called upon to conduct meetings of the Emergency Response Coordinators in their sections to review procedures and any issues regarding the evacuation plan.
6. Senior Emergency Response Coordinators report directly to the Facilities Manager.
7. During evacuation, the SERC should be the last one off their floor, checking to make certain that they have placed anyone who cannot descend the stairs into the cleared stairwell landing to await rescue. The SERC should also make certain that all fire doors are closed tightly. The SERC should then proceed directly to the Facilities Manager to report in and to report on anyone left in the building.

## **EVACUATION SAFE HAVENS**

By prearranged agreement, occupants of the Alaska Office Building are authorized to use the lobby of The Centennial Hall during normal business hours, 7AM-5PM. In the event of frigid temperatures and if the building's evacuation process is not given an "ALL CLEAR" within a reasonable time, Facilities Management will address the occupants staged outside to relocate to the identified haven until an "ALL CLEAR" is announced.

## **FIRE**

### **Emergency phone numbers**

1.	Fire/Police/Medical Departments	911
2.	Facilities Call Center	465-5689
3.	Security	465-2100

### **UPON DISCOVERY OF A FIRE FOLLOW THESE GUIDELINES:**

1. If safe call the FIRE DEPARTMENT, 911. Give the following information:
  - Your Name
  - Address: Alaska Office Building  
350 Main St.  
Suite Number \_\_\_\_\_  
Floor Number \_\_\_\_\_
  - Explain problem: What is burning, etc. If it is safe, stay on the phone long enough to confirm that the information was received and understood.
2. Activate the nearest fire alarm pull station
3. Call the Facilities Call Center, 465-5689, and inform them of the situation.

### **WHAT TO DO IF YOU DISCOVER A FIRE...**

1. Leave the area of the fire.
2. Close all door(s) as you leave.
3. Pull the nearest fire alarm pull station to sound the alarm and begin evacuation of the building.
4. Evacuate the building using the closest stairway or move to your appointed duty as part of your suite's evacuation team.

*Note: There are fire extinguishers located on each floor. Do not return to fight the fire once you have evacuated. The Fire Department strongly advises you to leave firefighting to the experts.*

5. Check all doors and door jams for heat before entering the room with the fire.
6. Keep your back to the door to leave your escape route open.

If the fire is bigger than about one foot in diameter, the better choice may be to close the door(s) again, leave the building as quickly as possible, and let the Juneau Fire Department do their job.

### **THIS IS WHAT HAPPENS**

1. Management will assist the fire department with directions and information.
2. Please remain alert and keep conversation to a minimum. Follow instructions of Emergency Response Coordinators and firefighters.

## **FIRE PREVENTION**

### **FOLLOW THESE SIMPLE RULES TO HELP PREVENT FIRE:**

1. **SMOKING IS PROHIBITED INSIDE THE BUILDING.** Smoking is only allowed in designated smoking areas or other areas outdoors that are 20 feet or more from exterior entrances and air intakes.
2. Unplug any electrical equipment that is not working properly or is need of repair.
3. Do not overload outlets.
4. Keep heat-producing equipment away from objects that will burn.
5. Assign one person, and an alternate, to ensure all appliances, especially coffee pots, are turned off when leaving the building.
6. Store and use flammable liquids per container instructions and city/code requirements.
7. Do not allow accumulation of trash or waste materials that are flammable.
8. Do not hold suite or lobby doors open with doorstops or other items.
9. Use of supplemental heat devices, such as space heaters is not permitted.
10. Adhere to Building policies for holiday decorations.

## **INDIVIDUALS REQUIRING SPECIAL ASSISTANCE**

If you are a disabled individual or require any special assistance in emergency situations or priority one fire alarm evacuations, it is your responsibility to contact the Facilities Call Center and make sure you are on the list for emergency evacuation. Please see page 33 for the form you would need to fill out and fax.

In the event of a priority one alarm or emergency where evacuation is required we recommend any person that is disabled or on the Emergency Assistance List have a “buddy” who waits with them on the stairwell landing (the designated safe haven) until an “all clear” announcement is made, or emergency personnel arrive on scene to assist with their evacuation. Facilities Management will not be assisting in the evacuation of disable persons your “buddy”, Emergency Response Coordinator or emergency personnel will be performing this task.

## **TSUNAMI EMERGENCY**

A tsunami is a series of waves that can be dangerous and destructive. They can be caused by underwater disturbances or earthquakes. When you hear a tsunami warning, move at once to higher ground and stay there until local authorities say it is safe to return home.

### **What can I do today?**

Be familiar with the tsunami warning signs. A rapid rise or fall in coastal waters and a large earthquake are both signs to an approaching tsunami.

Know the location of your local evacuation site. Most coastal communities have a designated area on high ground that the community will meet, e.g.: a school.

Know your community's warning siren or method of letting people know a tsunami is coming.

**DO NOT** go to the water to watch the tsunami come in!

## **MEDICAL EMERGENCY**

### **Emergency phone numbers**

1.	Fire/Police/Medical Departments	911
2.	Facilities Call Center	465-5689
3.	Security	465-2100

### **IMPORTANT DO'S**

1. Call 911
2. Give the following information:
  - a. Your name
  - b. The building address: 350 Main St.
  - c. The exact location of the emergency (suite, floor, etc.)
  - d. Any details regarding the nature of the emergency (apparent heart attack, injury, etc.)
3. Notify the Facilities Call Center, 465-5689.
4. Reassure the victim that emergency assistance is on the way.
5. Have someone meet the emergency personnel at the elevators on your floor.
6. Remain calm.

### **IMPORTANT DON'TS**

Don't attempt to move the victim unless it is necessary to do so to avoid further injury (fire, etc.).

### **AUTOMATED EXTERNAL DEFIBRILLATOR (AED)**

There are multiple AEDs located in the building. If you are certified in their use, we encourage you to familiarize yourself with their locations. Training is available through the American Red Cross and the Facilities Administrative Assistant will coordinate training sessions for interested individuals. If you are interested in getting your certification, or in getting re-certified please call 465-5689.

### **THIS IS WHAT HAPPENS**

1. The Facilities Manager will meet emergency personnel in the main floor lobby and accompany them to the area.
2. The Facilities Manager or security personnel will make a report of the incident and emergency personnel will handle the situation.

## **SUSPICIOUS OBJECTS**

### **Emergency phone numbers**

- |    |                                 |          |
|----|---------------------------------|----------|
| 1. | Fire/Police/Medical Departments | 911      |
| 2. | Facilities Call Center          | 465-5689 |
| 3. | Security                        | 465-2100 |

### **IMPORTANT DO'S**

1. Obtain a good description of the object: size, color, markings, etc.
2. Identify exact location of the object: building, floor, room number and location within the room.
3. Your Agency or firm manager will determine if the immediate area needs to be evacuated and if so he/she will issue instructions to do so.
4. Contact Police first and then contact the Facilities Call Center.

### **IMPORTANT DON'TS**

1. Don't touch or disturb the object
2. Don't panic.

### **THIS IS WHAT HAPPENS**

The police department and Facilities Management will assess the situation and determine evacuation requirements.

## **BOMB THREAT**

If you receive a threat, keep calm. Have a prearranged signal to alert supervisory personnel so they may listen also. If possible, record the call.

Legitimate callers usually wish to avoid possible death or injury. Request more information by expressing a desire to save lives.

### **IMPORTANT DO'S**

#### **1. IF THE THREAT IS A BOMB, ASK THE FOLLOWING QUESTIONS:**

When is the bomb supposed to explode?

Are you sure?

What floor is the bomb on?

What kind of bomb is it?

What does it look like?

How big is it?

Where did you put it?

Did YOU set the clock?

Why are you doing this?

Why did you call me?

What do you want me to do?

What is your name?

#### **1. RECORD**

Exact wording of the threat.

#### **2. NOTIFY**

- |    |                                 |          |
|----|---------------------------------|----------|
| 1. | Fire/Police/Medical Departments | 911      |
| 2. | Facilities Call Center          | 465-5689 |
| 3. | Security                        | 465-2100 |

## **BOMB THREAT CHECKLIST**

### **Impression of Caller**

Male                       Female                      Race: \_\_\_\_\_  
 Youth                       Juvenile                       Adult                      Estimated Age: \_\_\_\_\_

### **Caller's Voice**

Calm                       Frightened                       Gasping                       Excited  
 Slurred                       Drunken                       Incoherent                       Nervous  
 Joking                       Serious                       Semi Serious                       Giggling  
 Authoritative                       Raspy                       Whispered                       Cell Phone  
 Deep Tone                       Normal Tone                       Monotone                       Nasal Tone  
 Dirty Laugh                       Nervous Laugh                       Vicious/Mean                       Confused  
 Normal Breathing                       Heavy Breathing                       Voice sounded remote  
 Stuttered                       Hesitated                       Familiar Voice                       Obviously Disguised  
 Lisp                       Accent                      What kind: \_\_\_\_\_

### **Caller's Use of Language**

Use of slang: What words were most used? \_\_\_\_\_

Other words or phrases \_\_\_\_\_

Pronunciation, selection, timing of speech:

Normal                       Reading Statement                       Faded Away  
 Average                       Limited                       Foul                       Educated                       Incoherent  
 Jerky                       Stilted                       Stammered                       Normal

### **Background Sounds**

Quiet                       Loud Noises                       Clear                       Static  
 Truck                       Bus                       Motorcycle                       Train  
 Aircraft                       Subway                       Automobile                       Construction  
 House Noises                       Office Equipment                       Machinery Noise  
 Pump Sound                       Fan                       Other Voices                       Footsteps  
 Wind                       Rain                       Thunder                       Surf Sounds  
 Bird Sounds                       Dog Barking                       Music Noise                       Crowd Sounds  
 Local Call                       Long Distance                       Phone Booth  
 Echo                       Horn/Bell/Whistle

Other Sounds: \_\_\_\_\_

## **SEARCH**

The “search” for the object is most effective and fastest if made by the normal building occupants. Object can vary in size and shape; it is a fundamental rule that the search must be made by persons who are familiar with the area and who will notice a strange or foreign object.

Care and caution must be used during the search. Do not change the environment in question through the use of radios, cell phones, temperature variations, presence of electrical current etc.

If an object is found, DO NOT MOVE, jar, or touch it. Immediately contact Facilities Management or local on-site emergency authorities.

## **EMERGENCY ALERT SYSTEM LOCAL AREA PLAN**

### **INTRODUCTION**

This Emergency Alert System (EAS) Local Area Plan was developed by the Juneau Local Area Emergency Communications Committee in cooperation with local broadcast and cable operators, the National Weather Service, and the City and Borough of Juneau. The Plan outlines the methods used to disseminate emergency information and warning to the general public in the Juneau EAS Local Area or any portion thereof, within the broadcast coverage and cable system service areas, at the request of local, State and Federal officials. This local EAS plan may be activated in response to common local emergency situations such as power outages, floods, civil disorders, earthquakes, heavy snows, toxic chemical leaks or any occurrence which poses a danger to life or property.

For more information on the EAS Local Area Plan, please see the attached document provided by the Department of Military & Veteran Affairs:  
[https://ready.alaska.gov/SEOC/Documents/Local\\_Plans/Juneau\\_EAS\\_Plan\\_V3\\_redacted\\_unlisted\\_nmbrs.pdf](https://ready.alaska.gov/SEOC/Documents/Local_Plans/Juneau_EAS_Plan_V3_redacted_unlisted_nmbrs.pdf)
