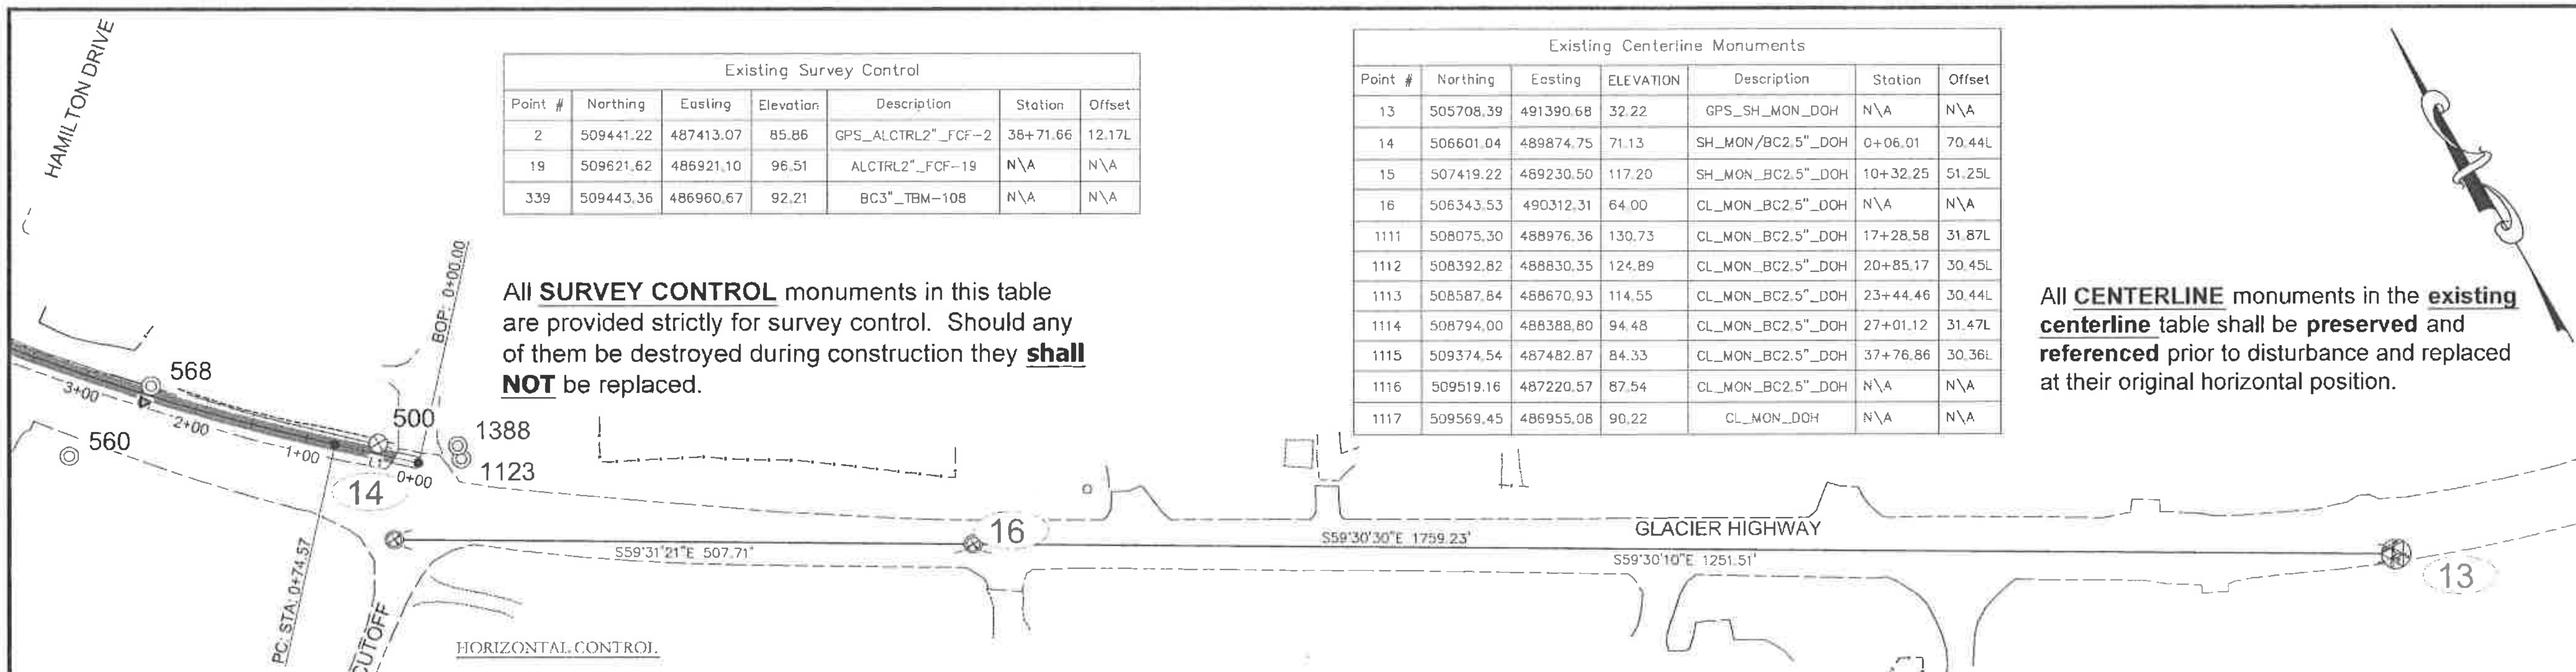
All **CENTERLINE** monuments in the **existing centerline** table shall be **preserved** and **referenced** prior to disturbance and replaced at their original horizontal position.



HORIZONTAL CONTROL

Horizontal Control for this project is based on the DOT/PF 2000 Juneau Grid

The DOT/PF Juneau Grid-2000 System is a local ground coordinate system based at USC&GS first order control station EDDIE. It relates to AKSPC zone 1 NAD83 (1992) through the following parameters:
Zone = NAD83 (1992) AKSPC ZONE 1
Grid Scale = 0.999928875
Convergence = -0°45'27.26"
Translation about USC&GS point EDDIE as follows:
AKSPC Northing = 2383469.17310 FT US
AKSPC Easting = 2512570.06318 FT US
Local Northing = 500000.0000 FT US
Local Easting = 500000.0000 FT US

Project Specific Horizontal Control

13: PI monument in well case in south shoulder Glacier Highway. Point bears S68E 156.5' +\- from the North East corner of the bus shelter, East of Sherwood Lane.
JNU Grid N 505708.39 FT US, E 491390.68 FT US
AKSPC ZONE1 N 2389290.48 FT US , E 2504037.58 FT US

14: PI monument in well case in south side Glacier Highway. Monument case lies in the intersection of Engineers Cutoff Road and Glacier Highway.
JNU Grid N 506601.04 FT US, E 489874.75 FT US
AKSPC ZONE1 N 2390203.03 FT US , E 2502533.69 FT US

VERTICAL CONTROL

The Vertical Datum for JNU Grid-2000 is MLLW Gastineau Channel tidal datum based on third order differential levels and supplemented with GEOID '99 modeled orthometric heights. The tidal epoch is 1960-1978, but this epoch has been updated with a 5 year observation period from Jan '94 to Dec '98 published Nov '99. The latest NOS publication (10-2011) on the 1983-2001tidal epoch indicates the datum has risen 0.32'.

The Project Specific Basis of Vertical Control is point # 517 "TBM BROTHER". Which is a 3.5" brass cap located in the north east abutment of Brotherhood Bridge. TBM-Brother has an observed elevation of 39.41 feet above MLLW.

RECORD OF REVISIONS

No.	DATE	DESCRIPTION

MONUMENT NOTES:

1. If any pair of control points disagrees from published value by more than 1:10,000 horizontally or vertically then a third network point must be tied to ascertain which point is in error or has been disturbed.

2. Whether listed or not, all monuments, property markers, or accessories that will be disturbed or buried shall be referenced prior to being disturbed, and re-established in their original position and a record of monument form in accordance with A.S.34.65.040 shall be submitted to the construction engineer for review prior to recording. Coordinate values listed are for informational purposes and should be used to reset monuments only as a last resort.

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Establish New Item 301(1A)A Aggregate Base Course, Grading D-1 Price Reduction

Description: This item authorizes 1,167.11 tons of non-conforming Aggregate Base Course, grading D-1 from Item 301(1)A Aggregate Base Course Grading D-1 material on Bid Schedule A, for the main path, to remain in place with a price reduction in accordance with Subsection 105-1.03.

Materials: See new Table 703-2 for tolerance changes.

Construction Requirements: No changes.

Method of Measurement: This item is Lump Sum and in accordance with Subsection 109-1.01 is not measured for

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reduce Existing Item 630(1)A Geotextile, Separation by 2,259 square yards.

Establish New Item 630(3)A Geotextile, Separation (200)

Description: This item is for geotextile separation fabric meeting the requirements of 200 lb grab tensile strength (Class 3), but not the Class 1+ specifications required for Item 630(1)A Geotextile, Separation on Bid Schedule A, for the main path.

Materials: *Modify as follows:*

729-2.01 GEOTEXTILE, SEPARATION AND STABILIZATION

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order

This is a material change to a major bid item. The original MSE Wall design had to be completely replaced to accommodate a new typical section and avoid conflict with the adjacent fish stream. The new section increases the depth, increases the block quantities, requires additional excavation, shoring, sheeting, a stepped footing, larger blocks, additional engineering, and additional ESCP control.

Replace **Sheet B3 and M1** *with the attached* **Sheet B3 and M1.**

Delete Item 511(1A)a MSE Concrete Wall – Pattern Finish

Change Order

Change Order No. 7

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order
The elevations shown in Section 203 and on the Typical Section Sheet B2 vary from the profile elevations. This change modifies the plans and specifications to provide a three foot surcharge on the fill during Stage 5 and eliminates the need for the Stage 6 surcharge.

Delete Item 203(19)a Stage 6 Temporary Surcharge

Replace **Sheet B2** *with the attached* **Sheet B2.**

Subsection 203-3.03; Stage 2 through 5: Above OHW Embankment Construction, *modify as follows:*

Summary of Quantities

ITEM NO.	ITEM	UNIT	PRICE	QUANTITY (+ or -)	AMOUNT (+ or -)
203(19)a	Stage 6 Temporary Surcharge	Ton	$20.00	-1,226	-$24,520.00
		TOTAL THIS CHANGE ORDER			**-$24,520.00**

This Change Order **decreases** the Contract Amount by **$24,520.00**.

The Contract Completion Date is not affected by this Change Order.

PLEASE INDICATE YOU ACCEPTANCE OR ACKNOWLEDGEMENT BY SIGNING AND DATING THE APPROPRIATE SIGNATURE LINE, AND THEN RETURN THE ORGINAL DOCUMENT TO THIS OFFICE.

Change Order

Change Order No. 9

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order
The Department performed test pit investigation to determine the quantity of useable excavation within the excavation limits for use as fill.

Establish New Item 203(21)a Test Pit Investigation

Description: Provide test pits in the existing ground where unclassified excavation is called for on the plans at a frequency of 300 feet or as designated by the Engineer. Test pits will be used to sample the existing material and evaluate the amount of useable excavation within project limits.

Materials: None.

Summary of Quantities

ITEM NO.	ITEM	UNIT	PRICE	QUANTITY (+ or -)	AMOUNT (+ or -)

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Establish New Item 641(8)A Drainage and Slope Stability Improvements
Description: This item improved drainage and slope stability throughout the project where erosion issues were prevalent. The work was initiated under Item 641(5)A Temporary Erosion and Pollution Control By Directive, but the work became permanent repairs and improvements. This item includes these permanent erosion and pollution control work items.

Materials: Comply with all applicable material sections for the installed material.

Construction Requirements:
Install the following for the provided plans and directives:

N/A

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order

The piezometer conduits required backfill to protect them from equipment damage after they were relocated. This change order provides that cover.

Establish New Item 203(22)a Piezometer Backfill

Description: Provide backfill to protect both piezometers installed in the fill.

Materials: Provide bedding material meeting the requirements of Subsection 204-2.01 for corrugated polyethylene pipe. Provide backfill material meeting the requirements of Borrow Type B with 100% passing the 3 inch sieve.

STATE OF ALASKA
DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

Project No.: 69500/0933037 JNU-Glacier Hwy. Multi-Use Path to UAS
Change Order No. 5

Continuation Sheet

Construction Requirements: Provide one foot of bedding material around the conduits. Provide two feet of cover four feet wide over the two installed piezometer conduits running horizontally over the fill. Ramp the backfill material from the top of the backfill to the Stage 1fill, providing a six foot long ramp. Conform to Subsection 203-3.05 for compaction of bedding and backfill.

Method of Measurement: This a lump sum and in accordance with Subsection 109-1.01 is not measured for payment.

Basis of Payment: This item is paid at the agreed upon amount of $2,705.00 and includes the resources required to provide bedding and backfill cover for the installed piezometer conduits. This item includes the bedding 1 foot around the conduit and backfill required to complete the work. Full compensation is made in accordance with Subsection 109-1.03.

Payment will be made under:

Pay Item	Pay Unit
203(22)a Piezometer Backfill	Lump Sum

Summary of Quantities

Permission for previously submitted subcontractor(s) to perform all or portions of the work described herein is as checked: ☒ Yes ☐ No ☐ N/A

Seal of Alaskan Professional Engineer *(if required)*

N/A

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

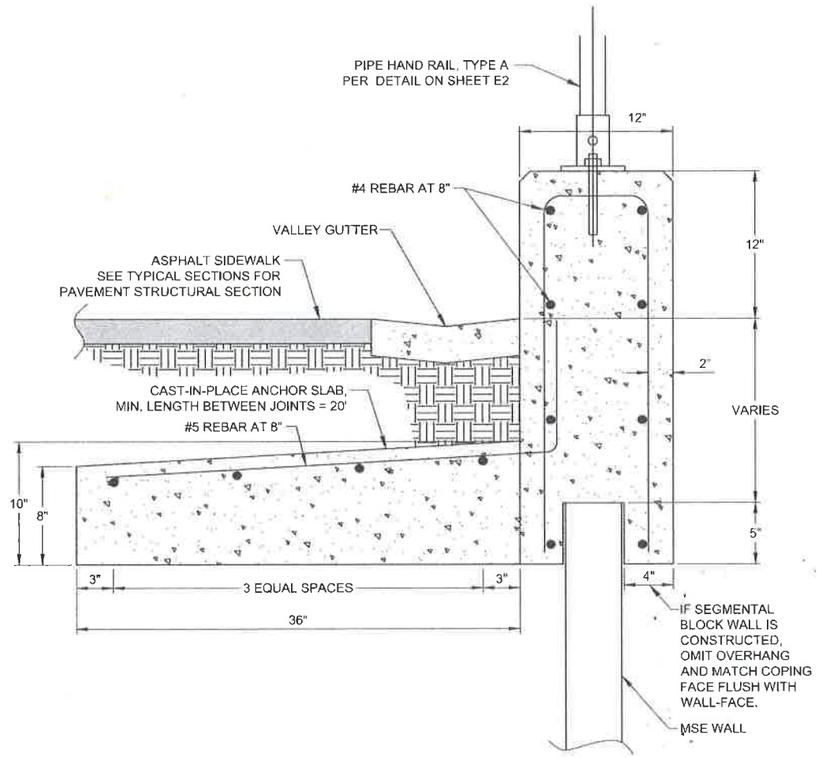
Delete Item 203(3)a Unclassified Excavation

Establish New Item: 203(3a)a Unclassified Excavation
DESCRIPTION: This item replaces Item 203(3)a Unclassified Excavation.

MATERIALS REQUIREMENTS: No material changes are required for this item.

CONSTRUCTION REQUIREMENTS: No construction requirement changes are required for this item.

METHOD OF MEASURMENT: This item is a lump sum item and in accordance with Section 109-1.01 is



CONCRETE COPING DETAIL

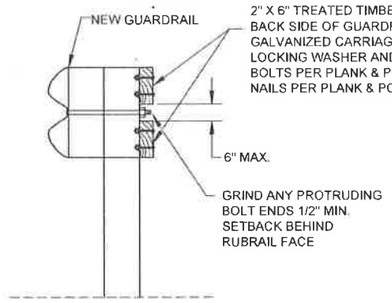
N.T.S.

GENERAL NOTES:

1. MSE WALL AND COPING DETAILS SHOWN ARE FOR CONCEPTUAL PURPOSES ONLY. DEVELOP SPECIFIC COPING DETAILS FOR THE CONTRACTOR SELECTED WALL SYSTEM. SHOP DRAWINGS SHALL BE SUBMITTED TO THE ENGINEER IN ACCORDANCE WITH 511-2.01.4.
2. DETAILS ON THIS SHEET ARE CONCEPTUAL AND TO BE USED IN DEVELOPMENT OF SPECIFIC DETAILS FOR MOUNTING PIPE HAND RAIL ON MSE WALLS. SEE SHEET E2 FOR PIPE HAND RAIL DETAILS.
3. PRECASTING OF THE COPING WILL BE ALLOWED. THE ANCHOR SLAB SHALL BE CAST-IN-PLACE.

CAST IN-PLACE COPING NOTES:

1. CASTING OF THE COPING DIRECTLY AGAINST THE PRECAST PANEL SIDES WILL NOT BE PERMITTED, AS THIS MAY RESULT IN PANEL CRACKING. THE CONTRACTOR SHALL USE A 1/4" (MIN.) COMPRESSIBLE MATERIAL ON BOTH SIDES OF THE PANEL TO ISOLATE THE COPING FROM THE PRECAST PANEL.
2. COPING JOINTS SHALL BE PROVIDED AT 33' MAXIMUM SPACING AND SHALL BE PLACED TO COINCIDE WITH PRECAST PANEL JOINTS.
3. PRECAST COPING SHALL BE PROVIDED IN 10' MINIMUM LENGTHS.



RUBRAIL DETAILS

RUBRAIL NOTES:

1. TREATED TIMBER MAY BE ROUGH SAWN HEM-FIR OR LARCH, ACZA PRESERVATIVE OR EQUIVALENT TREATED 0.4 PCF RETENTION BY ASSAY IN ACCORDANCE WITH AWPA-C2 STANDARDS MINIMUM BOARD ALLOWABLE STRESS f_c 1200 PSI.
2. 45° BEVEL LEADING AND TRAILING EXPOSED EDGES.
3. RUBRAIL IS TO BE INSTALLED ON ALL GUARDRAIL WITH THE EXCEPTION OF PARALLEL GUARDRAIL TERMINALS.

Project As-Built Drawings have been reviewed by the Project Engineer, and represent to the best of my knowledge, the project as constructed.

MANHOLE ADJUSTMENT / RECONSTRUCT DETAIL

N.T.S.

MANHOLE ADJUST/RECONSTRUCT NOTES:

1. INSTALL INVERT COVER PRIOR TO ADJUSTING/ RECONSTRUCTING MANHOLE, SEE DETAIL THIS SHEET. MAINTAIN INVERT COVER DURING ADJUSTMENT/ RECONSTRUCTION TO PREVENT MATERIAL AND DEBRIS FROM ENTERING THE SEWER SYSTEM.
2. ENSURE MANHOLES REMAIN ACCESSIBLE DURING CONSTRUCTION.
3. RAISE, LOWER, OR RECONSTRUCT MANHOLES AS REQUIRED IN ACCORDANCE WITH SECTION 604 OF THE SPECIFICATIONS AND SECTION 02402 OF THE CITY AND BOROUGH OF JUNEAU'S (CBJ) STANDARD SPECIFICATIONS AND DRAWINGS. INSTALL STEEL PLATE OVER MANHOLE OPENING AS A TEMPORARY MEASURE WHEN THE LID AND FRAME ARE REMOVED.
4. COORDINATE WITH CBJ FOR REPLACEMENT OF FRAMES AND LIDS. REUSE EXISTING FRAME AND LID IF NOT DAMAGED.
5. ADJUSTING RINGS SHALL BE REPLACED IN ACCORDANCE TO EACH MANHOLE INVESTIGATION, CONDUCTED BY THE PROJECT ENGINEER.
6. MANHOLE CASTING SHALL BE ADJUSTED TO CONFORM WITH SLOPE AND GRADE OF PROPOSED PAVEMENT.
7. ADJUSTING RINGS SHALL BE PROPERLY SIZED FOR THE EXISTING CONE OR FLAT TOP OPENING, AND INSTALLED PER MANUFACTURER'S RECOMMENDATIONS.
8. INSTALLATION OF FRAME, LID, AND ADJUSTMENT RINGS, ONTO THE EXISTING STRUCTURE SHALL BE WATER-TIGHT.
9. MANHOLE RUNGS ARE TO BE PLACED 12" O.C. FROM UNOBSTRUCTED SIDE OF MANHOLE. LAST RUNG PLACED 18" MAX. FROM BOTTOM OF MANHOLE, OVER SMALLEST PIPE.
10. AFTER MANHOLE ADJUSTMENT/ RECONSTRUCTION IS COMPLETE REMOVE INVERT COVER. REMOVE MATERIAL COLLECTED ON TOP OF INVERT COVER PRIOR TO ITS REMOVAL. REMOVE ANY MATERIAL THAT HAS FALLEN INTO THE MANHOLE AS A RESULT OF MANHOLE ADJUSTMENT/ RECONSTRUCTION.

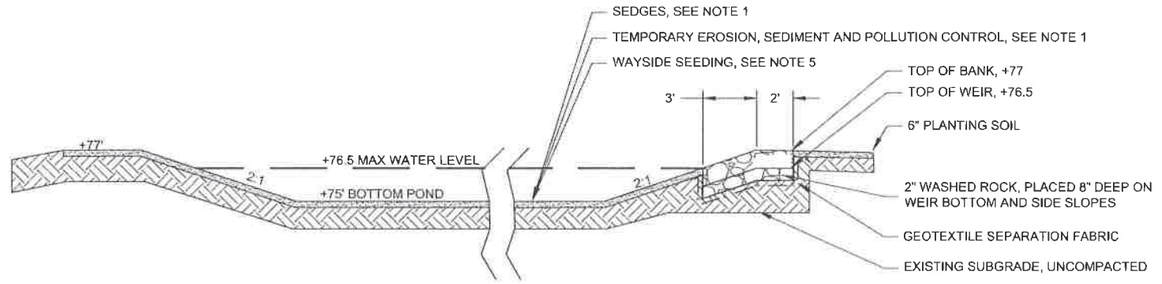
STORMWATER WETPOND 'A' WEIR ELEVATION

NTS

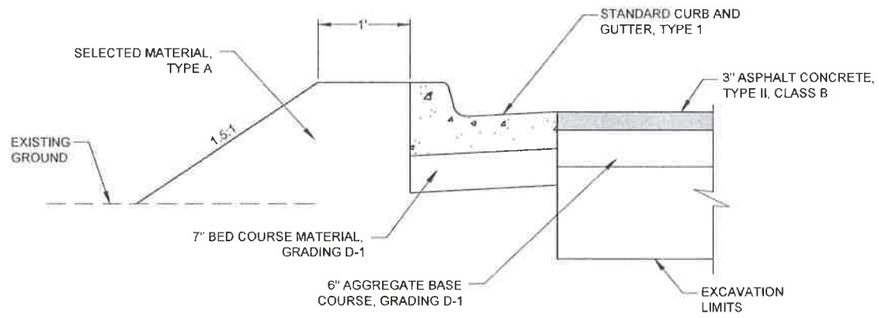


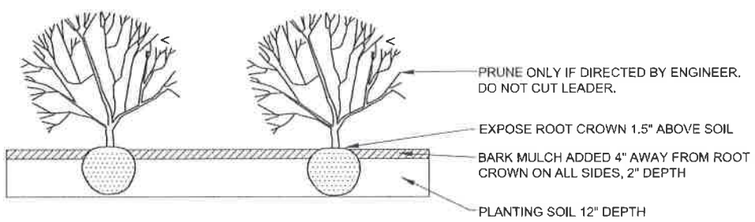
STORMWATER WETPOND 'A' TYPICAL SECTION

NTS

WETPOND NOTES:

1. WETPONDS MAY BE USED AS A TEMPORARY SEDIMENT TRAP DURING CONSTRUCTION, EITHER WITH VEGETATION ESTABLISHED PRIOR TO THE COMMENCEMENT OF CONSTRUCTION ACTIVITIES OR WITH FILTER FABRIC UNDER WASHED GRAVEL AND COARSE AGGREGATE. IF THE PONDS ARE USED AS CONSTRUCTION BMPS, THE TRAP MUST BE CLEANED OUT PRIOR TO USE AS A PERMANENT WETPOND. POND SEEDING EFFORTS SHALL BE SUPPLEMENTED WITH THE SPECIFIED SEDGE PLANTINGS FROM SECTION 621. 70% PLANT COVERAGE MUST BE OBTAINED PRIOR TO USE OF FINAL WETPONDS. PLANTING OF SAGES DOES NOT GUARANTEE 70% COVERAGE.
2. WETPOND 'B' IS A SIMILAR SECTION WITH ELEVATIONS SHOWN ON SITE PLAN.
3. THE CULVERT PIPE OUTLET IN WETPOND 'A' SHALL BE PROTECTED WITH 2" WASHED ROCK.
4. SHRUBS AND GROUND COVER PLANTS SHALL BE PLANTED ABOVE THE MAX WATER LEVEL OF THE PONDS, SEDGES SHALL BE PLANTED BELOW THE MAX WATER LEVEL OF THE PONDS.
5. THE SUBGRADE OF THE WETPONDS SHALL NOT BE COMPACTED. EQUIPMENT, MACHINERY, AND MATERIALS SHALL NOT BE PLACED IN THIS AREA PRIOR TO OR DURING CONSTRUCTION. IF THE SUBGRADE IS FOUND TO BE COMPACTED DURING CONSTRUCTION OF THE WETPONDS, BREAK UP AND LOOSEN THE SOIL TO A DEPTH OF 24" TO ALLOW FOR MAXIMUM INFILTRATION.
6. ALL SEEDING SHALL BE PERFORMED AS SHOWN ON THE PLANS.





WAYSIDE PLANTING DETAIL

NTS

PLANTING NOTES:

1. REMOVE AND DISPOSE OF ALL METAL, PLASTIC, AND NON BIODEGRADABLE MATERIALS COMPLETELY FROM ROOTBALL.
2. LOOSEN AND SCARIFY SOIL GENTLY ON SURFACE OF ROOTBALL WITHOUT DAMAGING ROOTS. AFTER PLACING THE ROOTBALL IN THE SOIL, STRIP AWAY BURLAP OR OTHER BIODEGRADABLE COVERING TO EXPOSE ALL SIDES OF ROOTBALL TO SOIL.
3. SCARIFY/LOOSEN SOIL TO A DEPTH OF 24" IN SHRUB BEDS. REMOVE 12" OF EXISTING FILL AND REPLACE WITH 12" OF PLANTING SOIL.
4. BARK MULCH ADDED TO SHRUB BEDS ONLY. DO NOT ADD BARK MULCH TO WET PONDS.

WAYSIDE CURB AND GUTTER DETAIL

Change Order

Project No.: 69500/0933037

Change Order No. 15

Project Name: JNU-Glacier Highway Multi-Use Path to UAS

		Change Order Summary:	
Contractor:	Secon, Inc.		
Address:	P.O. Box 32159	Calendar Days (+ / -):	N/A
	Juneau, AK 99803	New Completion Date:	N/A
		Amount of Change Order:	+$4,030.55

Recommended By: _____ Date: 27 Dec 2016

Title: Project Engineer

Approved By: _____ Date: 30 Dec 2016

Title: Project Manager

This change order constitutes agreement to terms, conditions and prices stated below.

Accepted By: _____ Date: 1/4/2017

Contractor's Representative

Seal of Alaskan Professional Engineer *(if required)*

N/A

Acknowledgement indicates only receipt of Change Order and not mutual agreement for basis of payment or time allowance. If a the matter cannot be resolved within 7 days from signature date, an Intent to Claim form must be submitted to the engineer within 14 days.

Acknowledged By: _____ Date: ____

Contractor's Representative

Permission for previously submitted subcontractor(s) to perform all or portions of the work described herein is as checked: ☒ Yes ☐ No ☐ N/A

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

Reason for Change Order The following is a brief description of the rationale for this change order:

1) Existing utilities were encountered from Station 16+75 to 17+45. This change order is required to excavate around the existing utilities from Station 16+75 to 17+45 to the grades shown on the plans.
2) A buried electrical ground line was uncovered during excavation of the existing Wayside Parking Lot and additional resources were required to work around the buried electrical line during excavation efforts.
3) The boundary boulders from Station 2+20 to 2+80 and from Station 5+50 to 6+10 were replaced with material to allow drainage to the valley gutter and shaping around the utility pole and load center. This work provides for a backfilled slope at these locations instead of the boundary boulders.
4) During excavation two existing underdrains were uncovered within the fill area of the path. The existing underdrains were extended to provide drainage underneath the new multi-use pathway into the new ditch line.

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Change Order

Project No.: 69500/0933037

Change Order No. 19

Project Name: JNU-Glacier Highway Multi-Use Path to UAS

		Change Order Summary:	
Contractor:	Secon, Inc.		
Address:	P.O. Box 32159	Calendar Days (+ / -):	N/A
	Juneau, AK 99803	New Completion Date:	N/A
		Amount of Change Order:	+$22,453.84

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Establish New Item 202(15)a Removal of Existing Septic Tank

Description: Remove and dispose of the existing decommissioned septic tank at Station 16+75 RT to lay the slope back to the planned slope.

Materials: Conform to Section 202 and as approved by the Engineer.

Construction Requirements: Conform to Section 202 and as directed by the Engineer.

Method of Measurement: This item is lump Sum and in accordance with Subsection 109-1.01 is not measured for payment.

Form 25D-068 (Revised 04/12) C.O. No. 19

Project As-Built Drawings have been reviewed by the Project Engineer, and represent to the best of my knowledge, the project as constructed.

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

Reason for Change Order The following is a brief description of the rationale for this change order:

1) Existing utilities were encountered from Station 16+75 to 17+45. This change order is required to excavate around the existing utilities from Station 16+75 to 17+45 to the grades shown on the plans.
2) A buried electrical ground line was uncovered during excavation of the existing Wayside Parking Lot and additional resources were required to work around the buried electrical line during excavation efforts.
3) The boundary boulders from Station 2+20 to 2+80 and from Station 5+50 to 6+10 were replaced with material to allow drainage to the valley gutter and shaping around the utility pole and load center. This work provides for a backfilled slope at these locations instead of the boundary boulders.
4) During excavation two existing underdrains were uncovered within the fill area of the path. The existing underdrains were extended to provide drainage underneath the new multi-use pathway into the new ditch line.

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

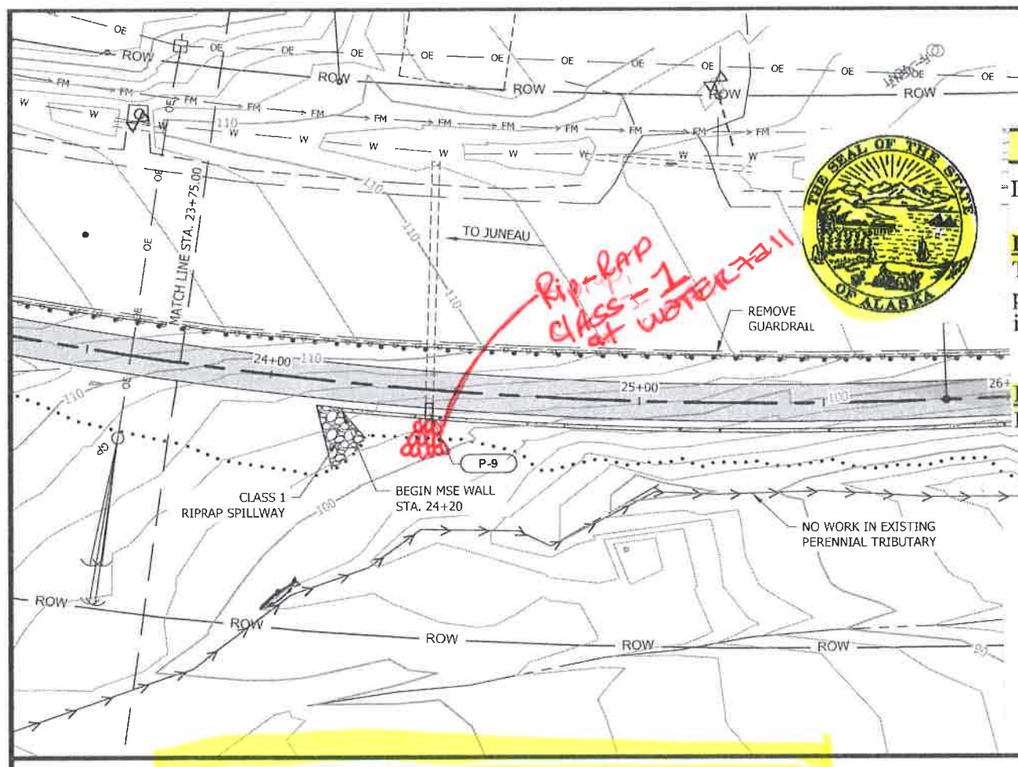
4) During excavation two existing underdrains were uncovered within the fill area of the path. The existing underdrains were extended to provide drainage underneath the new multi-use pathway into the new ditch line.

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Change Order

Change Order No. 11



DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change:
The inlet in the Auke Lake Parking Lot was much lower than the rest of the grade. The drainage system was installed per plan, but the inlet elevation for S-3 required adjustment to avoid a hazardous drop off. This change order adjusts the inlet to provide proper drainage while eliminating a potential hazard.

Establish New Item 604(8)b Adjust Inlet
Description: Provide resources to adjust Inlet S-3 from Elevation 79.5 to Elevation 81.0.

Reason for Change:
The MSE Wall was changed in design significantly from the initial design. This change order accounts for the additional survey for the new MSE Wall.

Delete Item 642(1)a Construction Surveying

Change Order No. 6

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order
An existing fence at station 16+50 RT required removal as it was within the project cut limits.

Establish New Item 202(14)a Removal of Existing Fence

Description: This item is for the removal and disposal of the existing fence at Station 16+50 RT.

Materials: None.

Construction Requirements: Comply with Section 202.

Project As-Built Drawings have been reviewed by the Project Engineer, and represent to the best of my knowledge, the project as constructed.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order:

The SKT parallel end terminal lower hinge post height exceeded 4 inches in relation to surrounding ground surface. New Item 606(17)a Parallel Guardrail Terminal Grading corrects this safety issue. The Department and Contractor mutually agreed to extend the Contract Completion Date in order to add extra work to the Contract and research solutions to the issue.

Extension of Contract Completion Date:

Construction Contract (Form 25D-7). *Change the Completion Date* from August 12, 2016 to *October 31, 2016*.

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order Items:

1. Selective Tree Removal was required to reduce safety hazards with undermined trees throughout the project.
2. Material was needed for the bench in front of the MSE Wall. Material was taken from the MSE Wall during excavation operations and placed in front of the MSE Wall to fill in the bench in front the MSE Wall in lieu of bringing in new material.
3. Modification was required to the new inlet to accommodate the planned 24 inch culvert.
4. A conflict between a planned culvert and a force water main was encountered and this change order compensates the Contractor for standby time while adjustments were made.

202(9)a	Removal of Curb and Gutter	L.F.	$29.57	+35.0	+$1,034.95
	TOTAL THIS CHANGE ORDER				+$1,034.95

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order
Due to delays on an adjacent project the connection in the Wayside parking lot was not established. This change order removes the curb and gutter in the existing driveways to allow for a connection to be established and provide a useable path from the beginning of the project to the end of the project.

Establish New Item 202(9)a Removal of Curb and Gutter
Description: Provide resources to remove the existing curb from approximate Station 37+60 RT and approximate Station 37+60 RT to Station 37+70 LT.

Materials: Comply with the plans and Section 202.

Change Order

Project No.: 69500/0933037

Change Order No. 16

Project Name: JNU-Glacier Highway Multi-Use Path to UAS

Contractor:	Secon, Inc.	**Change Order Summary:**	
Address:	P.O. Box 32159	Calendar Days (+ / -):	N/A
	Juneau, AK 99803	New Completion Date:	N/A
		Amount of Change Order:	+$20,780.56

Recommended By: _____ Date: 27 Dec 2016

Title: Project Engineer

Approved By: _____ Date: 29 Dec 2016

Title: Project Manager

This change order constitutes agreement to terms, conditions and prices stated below.

Accepted By: Maureen A Hansen Date: 1/4/2017

Contractor's Representative

Seal of Alaskan Professional Engineer *(if required)*

N/A

Acknowledgement indicates only receipt of Change Order and not mutual agreement for basis of payment or time allowance. If a the matter cannot be resolved within 7 days from signature date, an Intent to Claim form must be submitted to the engineer within 14 days.

Acknowledged By: _____ Date: ____

Contractor's Representative

Permission for previously submitted subcontractor(s) to perform all or portions of the work described herein is as checked: ☐ Yes ☐ No ☒ N/A

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

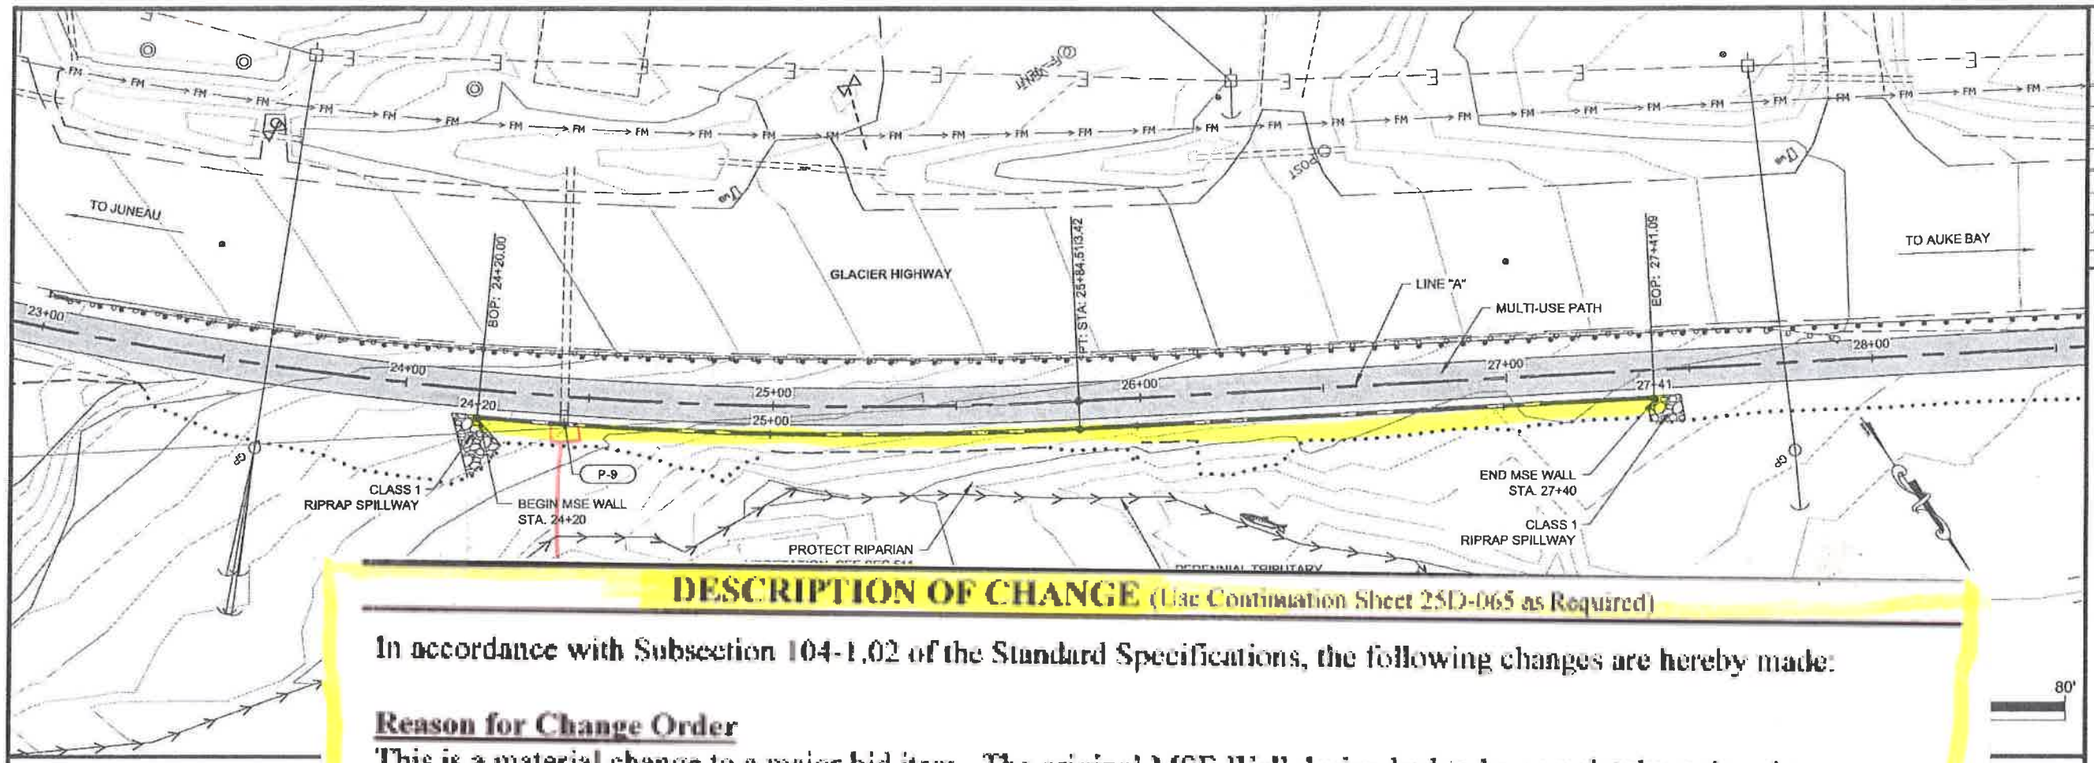
In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order

1) The Contractor and the Department discussed the use of permanent signs rather than daily traffic signs and agreed to delete the permanent construction signs and pay for the signs per day. This change order deletes the lump sum item for permanent signs.
2) The geocell on the habitat bench was installed per plan, but the face of the geocell was plastic and there were environmental concerns about the long term effects on the fish habitat. This change order makes adjustments to the habitat bench in order to create suitable fish habitat.

Delete Item 643(2)a Permanent Construction Signs.

Establish New Item 653(2)a Habitat Bench Adjustment



DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

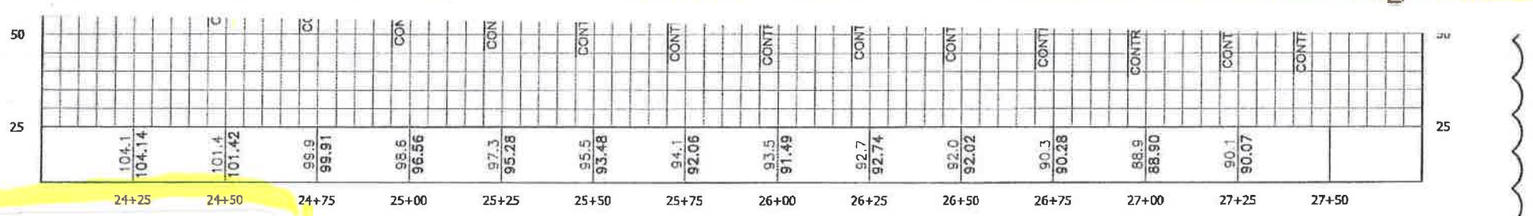
In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order

This is a material change to a major bid item. The original MSE Wall design had to be completely replaced to accommodate a new typical section and avoid conflict with the adjacent fish stream. The new section increases the depth, increases the block quantities, requires additional excavation, shoring, sheeting, a stepped footing, larger blocks, additional engineering, and additional ESCP control.

Replace **Sheet B3 and M1** *with the attached* **Sheet B3 and M1.**

Delete Item 511(1A)a MSE Concrete Wall – Pattern Finish



MSE WALL PROFILE

Project As-Built Drawings have been reviewed by the Project Engineer, and represent to the best of my knowledge, the project as constructed.

GENERAL NOTES:

1. EROSION CONTROL MEASURES WILL BE EVALUATED BY THE ENGINEER BASED ON EFFECTIVENESS. THOSE FOUND INEFFECTIVE MUST BE REPLACED OR REPAIRED WITHIN 24 HOURS FOLLOWING NOTIFICATION.
2. THE LOCATIONS OF TEMPORARY EROSION & SEDIMENT POLLUTION CONTROLS ARE RECOMMENDATIONS. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO PREPARE AND IMPLEMENT A SWPPP ACCORDING TO SECTION 641 OF THE SPECS.
3. INSTALL EROSION AND SEDIMENT CONTROL DEVICES BEFORE BEGINNING EARTH DISTURBING ACTIVITIES OR AS SPECIFIED ELSEWHERE.
4. SEED MIX TYPE 2 SHALL BE SPREAD BY HYDRAULIC METHOD TO STABILIZE DISTURBED SOILS, IN ACCORDANCE WITH THE APPROXIMATE LOCATIONS ON THE PLANS AS IMPLEMENTED IN A SWPPP ACCORDING TO SECTION 641 OF THE SPECS.
5. SEE SHEET L1, WAYSIDE LANDSCAPING PLAN FOR MORE DETAILED PREEMINENT STABILIZATION MEASURES FOR THE AUKE LAKE WAYSIDE AREA.

SERVICE CONDUIT TYPE:	RIGID METAL CONDUIT
LOCATION DATA	
LOAD CENTER:	8.7 FEET RIGHT OF STATION 2+50.7
POWER SOURCE:	UTILITY POLE ADJACENT LOAD CENTER
PHOTOELECTRIC CONTROL:	TOP OF LUMINAIRE, L1
SERVICE VOLTAGE	1 PHASE, 3 WIRE, 120/240 VOLTS AC WITH GROUNDED NEUTRAL
PROVIDE METER SOCKET?	YES SERVICE AMPS: 100A
MAIN BREAKER A:	240 VOLT, 2 POLE, 100 AMPERES
CONTACTOR:	600 VOLT, 4 POLE, 30 AMPERES
AIC RATING OF CIRCUIT BKRS:	10,000 AMPS

PANEL A

CIRCUIT NUMBER	DESCRIPTION	KVA LOAD	BREAKER AMPS	BREAKER POLES
A1	P.E. CELL	0.1	15	2
A2*	LUMINAIRE L1	0.3	20	2
A3	SPARE	0.0	20	2
A4	SPACE	0.0	---	---
TOTAL CONNECTED KVA LOAD		0.4	1.7	
TOTAL DEMAND KVA LOAD (@125%)		0.5	2.1	

* CIRCUIT THROUGH CONTACTOR

LOAD CENTER NOTES:

1. PROVIDE FAULT CURRENT LABEL ON LOAD CENTER DEAD-FRONT: "AVAILABLE FAULT CURRENT = 3677A, CALCULATED ON 18 AUG 2014."
2. CALCULATED FAULT CURRENT IS BASED ON LOAD CENTER BEING SERVED FROM A 15 KVA UTILITY TRANSFORMER. FIELD VERIFY CONDITIONS AND NOTIFY ENGINEER IF DIFFERENT PRIOR TO PRINTING FAULT CURRENT LABEL.
3. THE LIGHTING CONTACTOR SHALL BE CONTROLLED BY THE P.E. CELL WHEN THE HOA SWITCH IS IN "AUTOMATIC".

WIRING NOTES:

1. FURNISH ALL EQUIPMENT NOTED IN THE LOAD CENTER SUMMARY. SEE SUMMARIES FOR LOAD PANEL VOLTAGES, CURRENT RATINGS, SHORT CIRCUIT INTERRUPTING RATINGS, AND THE NAME OF THE SERVING UTILITY.
2. SIZE THE TYPE 2 LOAD CENTER CABINETS TO HOLD THE EQUIPMENT SHOWN IN THE WIRING DIAGRAM AND DETAILED IN EACH LOAD CENTER SUMMARY, ALLOWING SPACE FOR WIRING PER THE NATIONAL ELECTRICAL CODE. INSTALLING A METER BASE AND MAIN BREAKER IN A SEPARATE ENCLOSURE IS ALLOWABLE. HOWEVER IN THIS CASE, FURNISH A BREAKER PANEL WITH A MAIN BREAKER.
3. THE VOLTAGE FOR THE PHOTOELECTRIC CONTROL EQUIPMENT SHALL BE 240-VOLT, DERIVED FROM THE SERVICE VOLTAGE.
4. LABEL ALL CIRCUIT BREAKERS AS TO FUNCTION AND POSITION. LABEL THE SELECTOR SWITCH "LIGHTING" AND ITS POSITIONS "ON-OFF-AUTO".
5. STORE A SCHEMATIC DIAGRAM, A CIRCUIT DIRECTORY, AND A MATERIALS LIST INCLUDING THE MANUFACTURERS' NAMES AND PART/CATALOG NUMBERS, ALL LAMINATED IN PLASTIC, IN A METAL POCKET ATTACHED TO THE INSIDE OF THE LOAD CENTER.

UTILITY REQUIREMENTS:

1. INSTALL A PULL ROPE IN THE SERVICE CONDUIT AND A CAP ON THE BURIED END. MARK THE BURIED END WITH A 2"X6" STAKE.

Project As-Built Drawings have been reviewed by the Project Engineer, and represent to the best of my knowledge, the project as constructed.

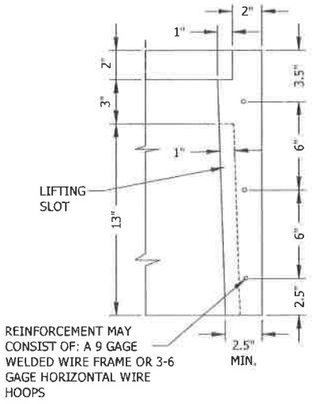
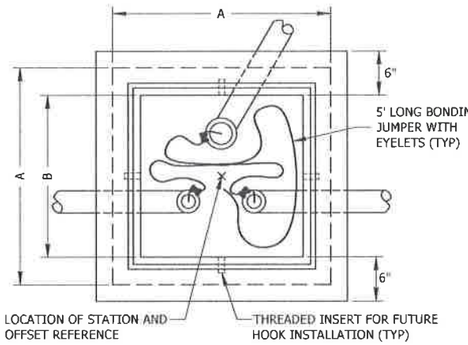
SECTION A-A

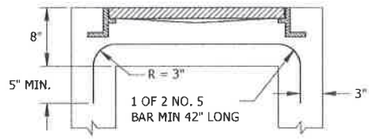


DETAIL A

TYPE IA JUNCTION BOX



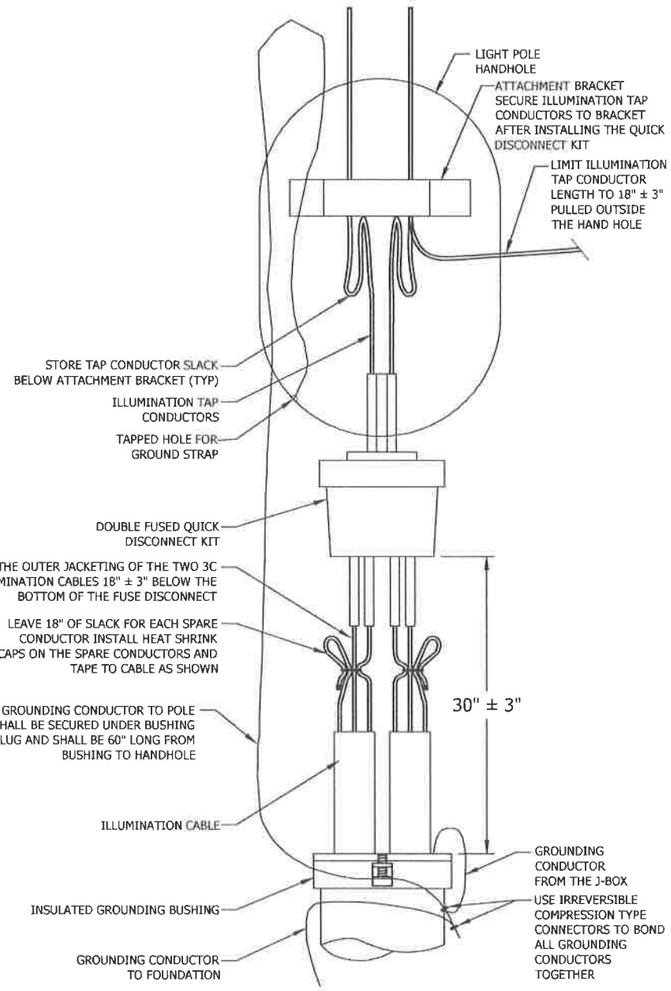
PLAN



SECTION B-B

NOTES:

1. AVOID INSTALLING TYPE IA JUNCTION BOXES IN DRIVEWAYS OR IN LOCATIONS SUBJECT TO USE BY HEAVY TRUCKS. INSTALL JUNCTION BOXES ONLY AT THE LATERAL LOCATIONS ALLOWED IN SUBSECTION 660-3.04.
2. FURNISH TYPE IA JUNCTION BOXES WITH CAST IRON LIDS THAT WEIGH A MINIMUM OF 50 POUNDS.
3. CONSTRUCT JUNCTION BOXES ACCORDING TO SECTION 501 USING CLASS A CONCRETE. REINFORCE TYPE IA JUNCTION BOXES AS SHOWN. SYNTHETIC STRUCTURAL FIBER-REINFORCED CONCRETE THAT MEETS ASTM C 1116 AND CONTAINS FIBER IN PROPORTIONS AS RECOMMENDED BY THE FIBER MANUFACTURER MAY BE ADDED FOR STRENGTH.
4. FOR JUNCTION BOXES THAT CONTAIN ILLUMINATION CONDUCTORS EXCLUSIVELY, FURNISH LIDS WITH THE WORD "LIGHTING" INSCRIBED INTO THEM. FOR OTHER JUNCTION BOXES, FURNISH LIDS WITH THE WORD "TRAFFIC" INSCRIBED INTO THEM.
5. UNDER JUNCTION BOXES, INSTALL STONE DRAINS THAT CONSIST OF POROUS BACKFILL MATERIAL CONFORMING TO SUBSECTION 703-2.10.
6. SET THE TOPS OF JUNCTION BOXES WITH THE FOLLOWING DIMENSIONS BELOW THE FINISHED SURROUNDING SURFACE:
   - 1" IN PAVED MEDIANS AND ADJACENT TO PEDESTRIAN FACILITIES
   - 1/4" IN PEDESTRIAN FACILITIES AND ROADWAY
   - 2" IN ALL OTHER AREAS
7. BOND JUNCTION BOX LIDS TO THE SYSTEM OF EQUIPMENT GROUNDING CONDUCTORS ACCORDING TO SUBSECTION 660-3.06. ATTACH BONDING JUMPERS TO THE JUNCTION BOX LIDS WITH BRASS OR STAINLESS STEEL HARDWARE.
8. INSTALL LOOP DETECTOR TAILS THROUGH ONE OF THE KNOCKOUTS OF TYPE 1A JUNCTION BOXES. AFTER SETTING THE BOXES TO GRADE, INSTALL GROUT IN THE GAPS THAT REMAIN IN THE KNOCKOUT.
9. INSTALL A 1/2" THICK PREFORMED BITUMINOUS JOINT MATERIAL AROUND JUNCTION BOXES INSTALLED IN PORTLAND CEMENT CONCRETE WALKWAYS.
10. INSTALL AN ELECTRONIC MARKER BALL IN ALL JUNCTION BOXES PER SUBSECTION 660-3.04.



LIGHT POLE HANDHOLE WIRING DETAIL

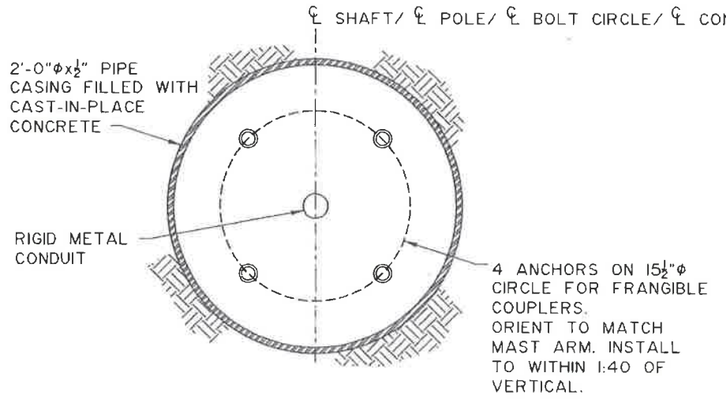
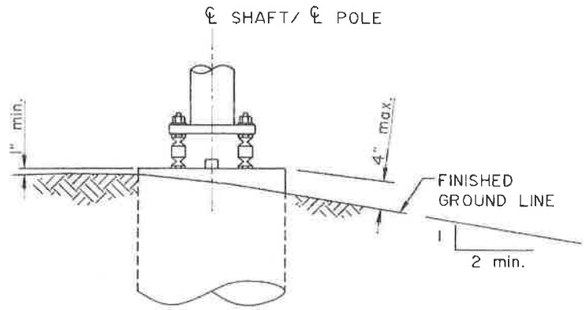
ELEVATION

CONCRETE-FILLED STEEL PIPE CASING WITH FRANGIBLE COUPLINGS
(SKIRT NOT SHOWN)



SECTION A-A



SOIL CLEARANCE DETAIL
(SKIRT NOT SHOWN)

GENERAL NOTES

FRANGIBLE COUPLING DATA

Use frangible Coupling Breakaway System, meeting NCHRP 350 test level 3 criteria, designed for impacts from any direction and having no specific torque requirements. Install components of the Frangible Coupling System in accordance with the manufacturer's written instructions.

Use this drawing when frangible couplings have the following properties:

Ultimate Shear Capacity = Vu = 5.5 kips
Ultimate Tensile Capacity = Tu = 49.8 kips

Foundation Design based on 120% of coupling ultimate capacities.

MATERIALS

CONCRETE.....Class ~~DS~~ A f'c = 4,000 psi.

PIPE PILE.....API 5L X52, Fy = 52,000 psi or ASTM A709, GR 50, Fy = 50,000 psi.

POLE DATA

Pole Height = 50' maximum
Mast Arm Length = 22' maximum
Luminaire = 50 lbs. maximum
Luminaire Projected Area = 2 square feet maximum
Pole, Arm and Luminaire Dead load <= 950 lbs.

INSTALLATION

Predrilling required.

Grout annual space between casing and soil with DS grout if not in direct contact.

Submit grounding wire details for approval.

Project As-Built Drawings have been reviewed by the Project Engineer, and represent to the best of my knowledge, the project as constructed.

TRAFFIC CONTROL NOTES:

1. MINIMUM OF ONE LANE SHALL REMAIN OPEN AT ALL TIMES IN WORK AREAS.
2. TEMPORARY DRIVING LANES SHALL HAVE A MINIMUM WIDTH OF 10'-0".
3. THE CONTRACTOR SHALL ORGANIZE CONSTRUCTION OPERATIONS SO THE TOTAL OF ALL STOPPAGES EXPERIENCED BY A VEHICLE TRAVELING THROUGH THE PROJECT DOES NOT EXCEED 20 MINUTES.
4. PROVIDE FOR CONTINUED ACCESS FOR BUSES AND USERS AT BUS STOPS AT ALL TIMES.
5. CONSTRUCTION SIGNING SHALL BE IN PLACE ONLY WHEN THE CONDITIONS EXIST FOR WHICH THE SIGNS ARE INTENDED.
6. CHANNELIZATION DEVICES IF USED AT NIGHT SHALL BE LIT IN ACCORDANCE WITH THE ALASKA TRAFFIC MANUAL.
7. DRIVEWAYS MAY BE CLOSED DURING ACTUAL WORK ON A GIVEN DRIVEWAY, PROVIDED THAT THE CLOSURE DOES NOT EXCEED 4 HOURS AND THE AFFECTED RESIDENTS HAVE BEEN GIVEN 24 HOURS NOTICE OF THE CLOSURE.
8. IT IS THE INTENT OF THIS TRAFFIC CONTROL PLAN (TCP) TO ILLUSTRATE SOME, NOT ALL, OF THE TRAFFIC CONTROL DEVICES WHICH WILL BE REQUIRED ON THIS PROJECT. ALL TRAFFIC CONTROL PLANS SHALL BE CREATED BY THE CONTRACTOR AND SUBMITTED TO THE ENGINEER FOR APPROVAL. WHERE APPROPRIATE, THEY SHALL INCORPORATE APPLICABLE DETAILS FROM THESE SHEETS.
9. THE CONTRACTOR SHALL PROVIDE PUBLIC NOTICE PRIOR TO EACH ROAD OR PATH CLOSURE. THIS WILL INCLUDE SIGNS POSTING SPECIFIC DATES AND DURATION OF ROAD OR PATH CLOSURE.

© This column shall not be used unless specified on the plans or approved by the Regional Geotechnical Engineer.

GENERAL NOTES:

1. All material and workmanship shall be in accordance with the State of Alaska, Standard Specifications for Highway Construction.
2. The contractor shall select only pipes that meet specific height of cover criteria shown on the plans or in the special provisions.
3. No more than one type of pipe may be used on any single installation or installation grouping.
4. All structural plate pipes shall be placed on a pre-shaped foundation conforming to the depth of the bottom plates with clearance for assembling to the adjacent plates allowed.
5. See Standard Drawing "Culvert Pipe & Arch Installation Details" for foundation and structural backfill details.
6. Minimum cover shall be measured from the top of pipe to the top of rigid pavement or to the top of flexible pavement subgrade. In all cases, the minimum cover shall not be less than 12". Minimum cover during construction shall be that required to protect the pipe from damage or deflecton.
7. These tables have been developed for an H-20 live load and for compacted soil weighing 120 lbs. per cubic foot or less. If compacted soil cover exceeds 120 lbs. per cubic foot, the contractor shall use the depth of cover shown in the plans for the specific pipe. Where compacted soil cover exceeds 120 lbs. per cubic foot and no specific cover requirements are provided in the plans, the contractor shall determine the required minimum pipe cover in accordance with Section 12 of the 2000 AASHTO "LRFD Bridge Design Specifications".

for Culvert
Installations
Reviewed
3-29-19
for State of Alaska.

GENERAL NOTES

1. All material and workmanship shall be in accordance with the State of Alaska, Standard Specifications for Highway Construction.
2. The contractor shall select only pipes that meet specific height of cover criteria shown on the plans or in the special provisions.
3. No more than one type of pipe may be used on any single installation or installation grouping.
4. All structural plate pipes shall be placed on a pre-shaped foundation conforming to the depth of the bottom plates with clearance for assembling to the adjacent plates allowed.
5. See Standard Drawing "Culvert Pipe & Arch Installation Details" for foundation and structural backfill details.
6. Minimum cover shall be measured from the top of pipe to the top of rigid pavement or to the top of flexible pavement subgrade. In all cases, the minimum cover shall not be less than 12". Minimum cover during construction shall be that required to protect the pipe from damage or deflecton.
7. These tables have been developed for an H-20 live load and for compacted soil weighing 120 lbs. per cubic foot or less. If compacted soil cover exceeds 120 lbs. per cubic foot, the contractor shall use the depth of cover shown in the plans for the specific pipe. Where compacted soil cover exceeds 120 lbs. per cubic foot and no specific cover requirements are provided in the plans, the contractor shall determine the required minimum pipe cover in accordance with Section 12 of the 2000 AASHTO "LRFD Bridge Design Specifications".

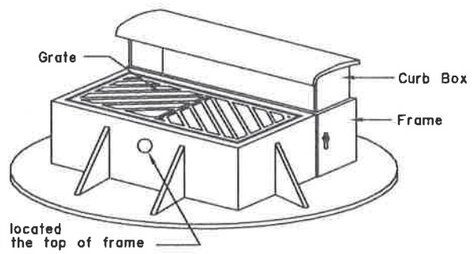
NOTES:

1. Details shown are to indicate general design only. Dimensions and design may vary among the manufacturers, except that inlet grate shall be within ¼"± of dimensions shown on this drawing.
2. Manhole lids shall be 32" in diameter and may be used with field inlet frames.
3. Type A field inlet frame inside dimensions shall be 24" x 36". Lugs will not protrude outside the concrete surface of the inlet box.
4. Grates shall be bicycle safe. Where high capacity grates are called for on the plans, they shall conform to Std. Dwg. D-25.
5. Frame and grate casting types are identified by the following abbreviations:
   C.I. = Curb Inlet
   F.I. = Field Inlet
   M.H. = Manhole
6. Flowline depression shall conform to Std. Dwg. D-23 for an on grade or sag point conditions.
7. These are the default frames and grates to be used unless shown otherwise on the drainage plans or drainage structure summary.



NOTE:
Curb Box, Grate and frame shall have a minimum total weight of 725 lb.

GUARDRAIL REFLECTOR

Guardrail Reflectors		
Type	Color	Reflectorized
A	White	Front & Rear
B	White	Front
C	Yellow	Front
D	Yellow	Front & Rear

GENERAL NOTES:

1. Cable Anchor Plate may be formed in single unit or welded fabrication.
2. Anchor Cable Assembly shall conform to AASHTO M–30 with Type II Wire Rope.
3. Sleeve for Wood Posts shall conform to the requirements of ASTM A120 and shall be of 2–inch galvanized standard pipe. Sleeve shall be a tight, pressed fit in post.
4. Bolts, nuts and washers shall conform to ASTM A–325 and galvanized in accordance with ASTM A–153.
5. Radius ID plates shall be attached to all shop–bent guardrail sections. They shall be bolted to the back side of the guardrail panel with the lower splice bolt nearest the P.C. of the radius.
6. Rail bend radius in feet shall be shown as "XX" on the radius ID plate. Digits shall be etched or stamped and have a min. height of 1 1/2" and a max. width of 3/4". The plate shall be galvanized after digits are marked.
7. All covered hardware shall comply with the AASHTO/AGC/ARTBA "A Guide to Standardized Highway Barrier Hardware", latest edition.

STEEL POST

GENERAL NOTES:

1. Attach guardrail reflectors at 50' centers beginning with the first post. Use Type A reflectors unless specified otherwise.
2. Provide hardware compliant with the AASHTO/AGC/ARTBA "A Guide to Standardized Highway Barrier Hardware," latest edition.
3. See Standard Drawing G-00 for hardware details.
4. Mount rail to block with bolt on approaching traffic side of block web.
5. See Standard Drawing G-10 for post lengths corresponding to different combinations of slope and behind-post embankment width.
6. Typical post spacing is 6'-3" center to center.
7. This barrier is acceptable under NCHRP 350, TL-3.
8. Use wood, rubber, plastic, or other NCHRP 350 or MASH approved blockouts designed to be used with steel posts
9. Use 25 linear foot transition to match height of existing or new rail elements and end treatments.
10. W6x8.5 steel post may be substituted for W6x9 steel post.

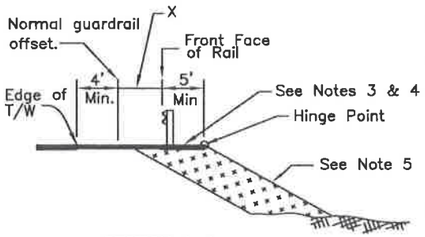
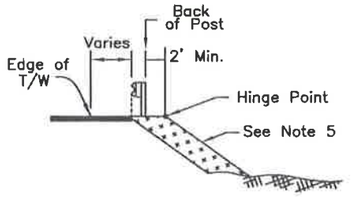
STANDARD GUARDRAIL TERMINAL WIDENING DETAIL

As Built's for 606 pad are accurate & correct to the best of my knowledge.
TM @ AKE DOT.
3-29-19



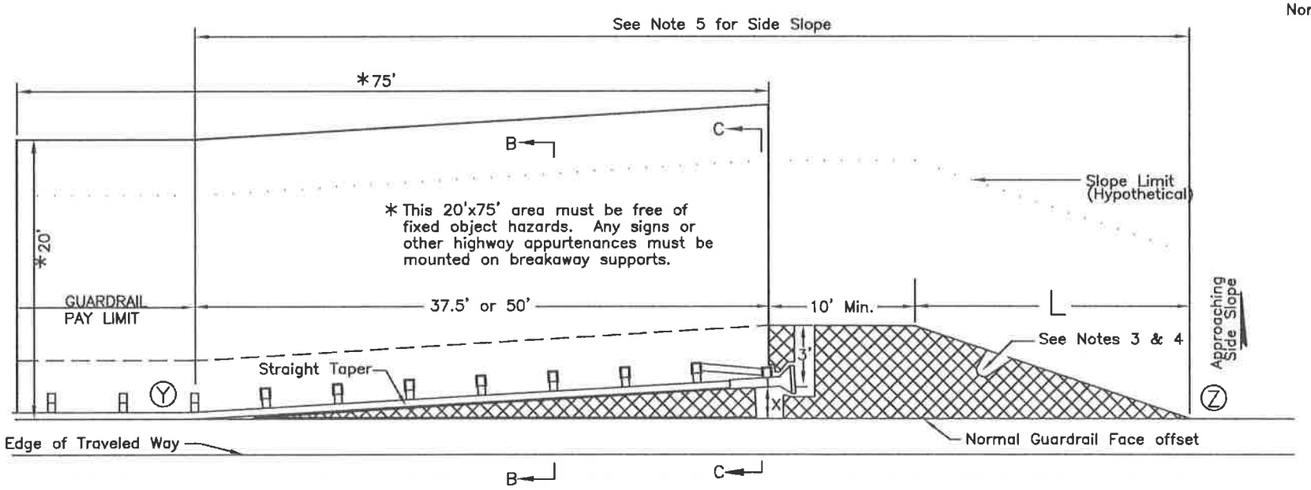
SECTION A–A



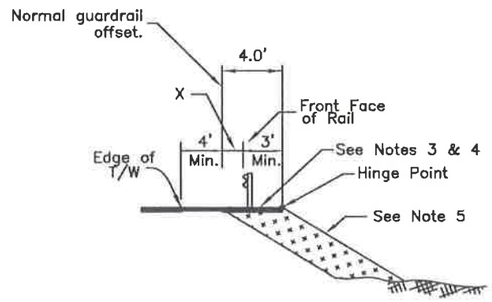
SECTION B–B
(Applies to both drawings)

GENERAL NOTES:

1. The standard detail applies to all approved guardrail terminals, including those with parabolic flares. The alternate detail may only be used with straight terminals. The terminal details shown are for illustration only – see manufacturer's drawings for actual post, rail, etc. drawings.
2. Use the standard detail for all terminals except when upgrading existing non–NCHRP 350 or MASH compliant terminals to NCHRP 350 or MASH compliant terminals where site conditions make the use of the standard detail infeasible. In that case, use the alternate detail.
3. Construct the hatched areas to match the slope of the adjacent shoulder to a maximum slope of 10:1. Maintain 10:1 for steeper shoulders. Match the slope when the shoulder slopes toward the road as well as away from the road.
4. On paved roads, the hatched areas shall be paved. On gravel roads, surface the hatched areas with the same materials used to surface the travel lanes.
5. From point Ⓨ to point Ⓩ make the side slope match the approaching side slope except where it is flatter than 4:1. In that case, the slope may be steepened to 4:1.
6. Attach a flexible marker to the first point (where the flare begins) and the end post of each terminal.
7. The maximum allowable height for foundation tubes or other steel components of terminal post breakaway systems is 4 inches above the surrounding grade.
8. The details on this sheet do not apply to Controlled Release Terminals (G–25) or Downstream End Anchors (G–13).
9. On two–way undivided roads, the details on this sheet do apply to NCHRP 350 or MASH compliant guardrail terminals on both the approach and downstream ends.



ALTERNATE GUARDRAIL TERMINAL WIDENING DETAIL



SECTION C–C

X: End offset. See manufacturer's information for the range of acceptable (NCHRP 350 or MASH compliant) end offsets for each terminal.

Taper Lengths (L) for Common End Offsets (X)		
End Offset	Standard Detail	Alternate Detail

GENERAL NOTES

1. Barriers may be used for temporary and permanent applications.
2. Provide 36" unobstructed smooth deflection area behind barrier for unanchored applications. Provide 12" unobstructed smooth deflection area behind barrier for anchored applications.
3. When anchored, install anchor pins on the side facing traffic. Precast barrier used as permanent median barrier in medians less than 8' in width shall be anchored to the roadway. When anchored in medians, install anchor pins on both sides of the barrier.
4. Provide 2" clearance between all metal reinforcement and the nearest face of concrete unless otherwise shown.
5. Normal use of precast barrier units is restricted to curvatures with radii greater than 770'.
6. Use narrow base shoulder barrier only at locations with full height backfill or equivalent structural support placed behind barrier.
7. When scuppers are not required plug them with a minimum 2" of grout.
8. Concrete grout for grouting over pins, pinning holes or grouting of scuppers shall be a non–shrinking grout, weak in strength and of thick consistency.
9. This precast concrete barrier is NCHRP 350 TL–3 approved.

GENERAL NOTES

1. Use tapered end sections only where:
   a. Barriers terminate outside the clear zone, or
   b. The regulatory speed limit is 25 MPH or below, or 30 MPH if the Engineer determines NCHRP 350 or MASH compliant end treatments are unfeasible.
2. Use air entrained concrete with minimum compressive strength of 3,000 p.s.i.
3. Provide a minimum of two inches clear cover for reinforcing steel bars except as shown otherwise.
4. Galvanize all exposed hardware in accordance with AASHTO M 232.
5. Provide reinforcing steel bars conforming to AASHTO M 31-86, grade 60.
6. Provide anchor pins conforming to AASHTO M 183 steel.
7. Provide connecting pins conforming to AASHTO M 164-86.
8. Provide four anchor pins per unit.

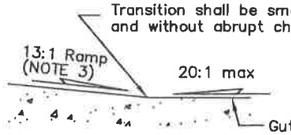
SECTION G–G

RETURNED CURB RAMP with SIDEWALK for PEDESTRIANS



DETAIL "H"

GENERAL NOTES:

1. Use the type of curb and/or gutter specified on the plans.
2. Use Mountable or Expressway curbs on medians and traffic islands.
3. Construct ramp runs and landings of concrete, regardless of whether the sidewalk is asphalt or concrete.
4. Construct ramp slopes 13:1 or flatter, flare slopes 12:1 or flatter, and sidewalk cross slopes 1.5% or flatter. If conditions require, the Engineer may increase ramp slopes to 12:1 maximum. Construct grade breaks perpendicular to ramp runs.
5. Do not construct flare slopes steeper than 10:1 measured parallel to the curb line, ramp slopes steeper than 12:1, or sidewalk cross slopes steeper than 2% (50:1), except as provided under Note 6. These are the steepest slopes allowed by law.
6. Where sidewalk slope makes it necessary to lengthen a ramp run to avoid exceeding the allowable ramp slope, do not exceed a ramp length of 15 feet. The slope resulting from that run length is acceptable, even if it exceeds the maximum slope shown.
7. Provide a coarse broomed finish on ramp runs perpendicular to the ramp slope.
8. When approved by the Engineer, curb returns may be replaced with flares at locations where access to the side of a ramp run is free of poles, utility boxes, other obstructions, or non–accessible surfaces such as a dirt planter strips. See Standard Drawing I–22 for details.
9. Install 24" detectable warning tiles for the full width of the ramp. Domes shall be in a square pattern. Align truncated dome pattern in the predominant direction of wheelchair travel to permit wheels to roll between domes.
10. 10. Construct curb ramps and detectible warning tiles in accordance with requirements for the American with Disabilities Act (ADA).

SKIRT DETAIL

GENERAL NOTES

1. Design and fabricate all shafts to support a mast arm 22' long with luminaire. Assume each offset fixture weighs 60 lbs. and has an effective projected area of 2.8 SF. Assume each Cobra head weighs 55 lbs. and has an effective projected area of 1.2 square feet. With this dead load, limit the angular rotation of the pole top to 1° 40' maximum.
2. Weld size to be determined by manufacturer.
3. Mounting height, if specified in the plans, refers to the height of luminaire above the roadway. Adjust each pole's shaft length to maintain this difference in elevation whenever slope and/or offset varies.
4. Minimum outside diameter at the top of pole equals 3-7/8". Pole diameter shall taper uniformly from the top of pole to the base plate, with a maximum taper rate of 0.15" per foot.
5. Mast arm rise may vary ±0.5ft from the values listed in the table.
6. Locate the handhole at 90 degrees to the mast arm on the side of pole downstream from traffic flow.
7. Furnish all poles with a j-hook to support the illumination tap conductors. Furnish all mast arm poles with a removable raintight cap.
8. Frangible couplings shall be NCHRP 350, Test Level 3 compliant and have no measured torque requirement.
9. Frangible couplings shall be installed into flush mounted female anchors so that no fixed hardware extends above the foundation top.
10. Install all components of the breakaway support system in accordance with the manufacturer's written instructions.
11. Fabricate the skirt from four pieces of 0.06" thick 3003 h-14 aluminum sheet. Bend each plate to provide corners with a 3/4" radius. Assemble the skirt with #10 x 3/8" self tapping stainless screws or pop rivets. The assembled skirt measures about 12-7/8" square.

DESIGN NOTES:

Design Standard: 2001 Standard Specifications for Structural Supports for Highway Signs, Luminaires and Traffic Signals with 2006 interim.

Design Load: 1,000 lbs axial, 2,000 lbs shear, 50,000 ft-lbs moment.

Construction Standard: Latest edition of the State Of Alaska Standard Specifications for Highway Construction with Special Provisions.

NOTES:

1. This foundation is approved for electrolier and breakaway traffic signal applications in cohesionless soils with an N1-60 value of 10 or greater per AASHTO T-206, "Standard Penetration Test" (SPT). This foundation shall not be used if any of the following are encountered; water table above the bottom of foundation, very loose soils, organic soils, cohesive soils (clay), or soils susceptible to frost jacking. If any of these conditions are encountered, stop foundation work and contact the Engineer.
2. Place foundation in drilled or excavated hole with centerline of foundation located at the station, offset, and elevation specified in plans. Set foundation to satisfy the conditions depicted in clearance detail.
3. Form the foundation in corrugated metal pipe conforming to Subsection 707-2.01 of the Specifications.
4. Provide 1.5 extra turns at each end of the spiral reinforcing steel. Reinforcing steel shall not be spliced. Tie vertical reinforcing steel to each intersection of the spiral reinforcing steel.
5. Connect ground wire near the top of spiral reinforcing steel with two irreversible connectors as shown. Fasten connectors according to the manufacturers' recommendations including the use of manufacturer specified tools. The ground wire may be bare solid, stranded, or braided copper. Protect ground wire with protective sleeve as shown and fill with silicon sealant.
6. Complete all concrete work in conformance with Sections 501, 503, and 660 of the Specifications. Use a tube with a hopper head or other approved device when dropping concrete more than 5 feet per Subsection 501-3.08. Vibrate concrete during placement by mechanical vibration per Subsection 501-3.08. Ensure anchor threads are protected from contact with concrete during pour.
7. Backfill and compact according to Section 205, and Subsections 203-3.04 and 660-3.01 of the Specifications. Use select material, Type A or sand slurry as backfill material. Ensure area below foundation meets compaction requirements and is free of loose material and debris prior to concrete work.
8. Install all anchors according to the manufacturer's written installation instructions. Anchors shall be installed plumb. Anchors greater than 1:40 out-of-plumb will result in foundation rejection.
9. When used for electrolier reduce the foundation depth 1 foot when there is no luminaire arm or the luminaire arm is less than or equal to 12 feet.
10. Grade in depth table refers to fill slopes. If foundation is in a cut slope assume flat grade in table. To determine grade in fill slopes, use the most severe grade found within an 8 foot radius of the center of the foundation. Slopes steeper than 1.5:1 require engineered depth calculation.

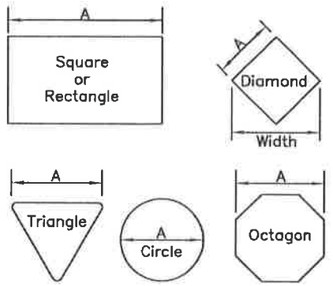
SIGN POST SPACING AS-BUILTS ARE CORRECT TO THE BEST OF MY KNOWLEDGE. REVIEWED BY: T.V.L. 3-29-19

GENERAL NOTES

1. See the standard specifications for the aluminum alloys that you may use for sign sheeting and wind framing members.
2. Fabricate all signs from 0.125" thick aluminum sheeting.
3. Sign fabricators may use alternates to the zee shaped framing member with approval of the engineer, if the frame manufacturer certifies their design equals or exceeds the strength of the zee shaped design.
4. Install one piece wind framing members on all signs up to 23.5' wide. Use one splice in each wind frame on all signs wider than 23.5'. Locate splices at least 18" from all posts and panel edges. Stagger splices in adjacent framing members at least 8.0' apart.
5. Attach wind framing members with rivets or with an engineer approved, double sided, high strength, adhesive tape. Clean and handle sheeting and framing members and apply tape in accordance with the tape manufacturer's written instructions. Install two rivets in both ends of each framing member.
6. Use 3/16" diameter rivets conforming to aluminum alloy 6061–T6 for cold driven rivets, or aluminum alloy 6061–T43 for hot driven rivets.
7. Sign fabricators may use sign panels extruded with integral framing with approval of the engineer, if the manufacturer certifies their design equals or exceeds the strength of the 0.125" thick panel with framing attached to it.
8. Frame all signs taller than 8.0' with five wind framing members located (H–0.15)/4 spaces. If needed, make a horizontal splice at the middle wind frame.
9. Do not use round pipes for sign supports.



Maximum size unframed signs using 0.125" thick aluminum sheeting.	
Sign Shape	A
Squares, Shields, and Route Markers	48"
Rectangles	48"
Diamonds	48"
Triangles	48"
Rounds and Octagons	48"

Install wind framing on all signs that exceed the dimensions listed.

Recommended By: _____ Date: 27 Dec 2016

Title: Project Engineer

Approved By: _____ Date: 27 Dec 2016

Title: Project Manager

This change order constitutes agreement to terms, conditions and prices stated below.

Accepted By: Maureen A Hansen Date: 1/4/2017

Contractor's Representative

Seal of Alaskan Professional Engineer *(if required)*

N/A

Acknowledgement indicates only receipt of Change Order and not mutual agreement for basis of payment or time allowance. If a the matter cannot be resolved within 7 days from signature date, an Intent to Claim form must be submitted to the engineer within 14 days.

Acknowledged By: _____ Date: ____

Contractor's Representative

Permission for previously submitted subcontractor(s) to perform all or portions of the work described herein is as checked: ☐ Yes ☐ No ☒ N/A

The following change(s) in the above Contract are hereby made in accordance with the terms of the Contract and under the terms and conditions stated below. Price adjustments resulting from inaccurate cost and pricing data are subject to the provisions of AS 36.30.400(c). This document shall become an amendment to the Contract and all provisions of the Contract will be applicable.

DESCRIPTION OF CHANGE (Use Continuation Sheet 25D-065 as Required)

In accordance with Subsection 104-1.02 of the Standard Specifications, the following changes are hereby made:

Reason for Change Order

1) The Contractor and the Department discussed the use of permanent signs rather than daily traffic signs and agreed to delete the permanent construction signs and pay for the signs per day. This change order deletes the lump sum item for permanent signs.
2) The geocell on the habitat bench was installed per plan, but the face of the geocell was plastic and there were environmental concerns about the long term effects on the fish habitat. This change order makes adjustments to the habitat bench in order to create suitable fish habitat.

Delete Item 643(2)a Permanent Construction Signs.

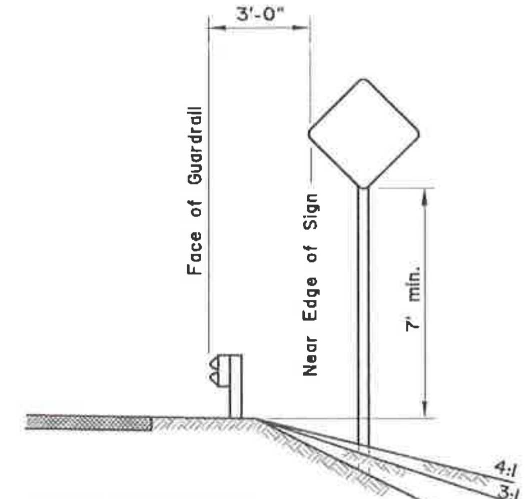
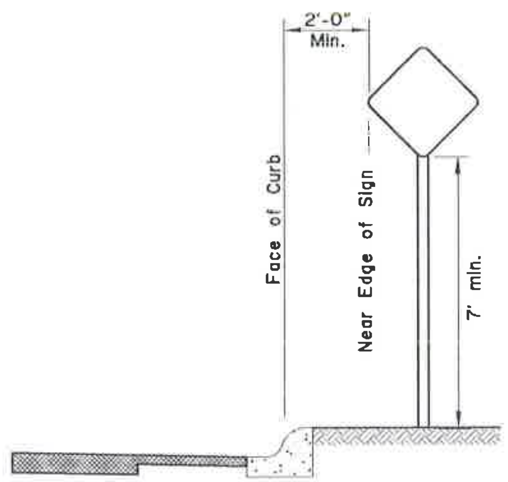
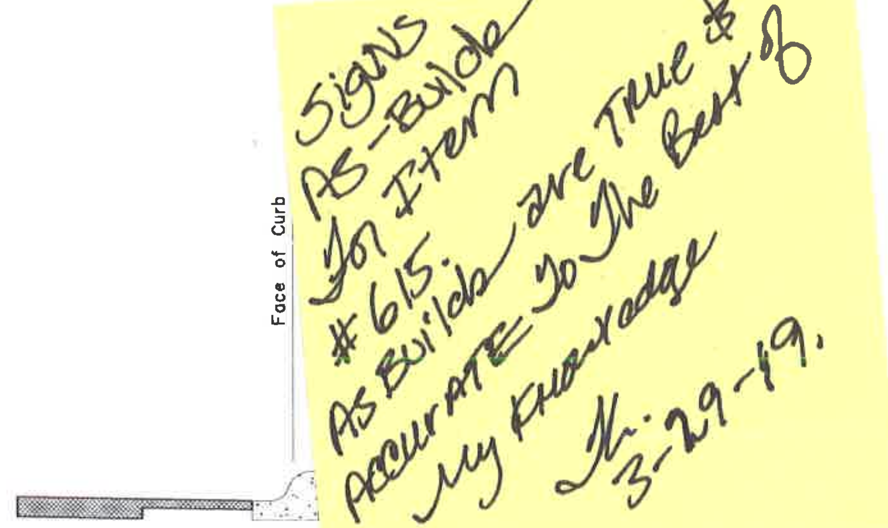
SUBGRADES 24' TO 28', ALL SLOPES



WITH GUARDRAIL
ALL SUBGRADES, ALL SLOPES

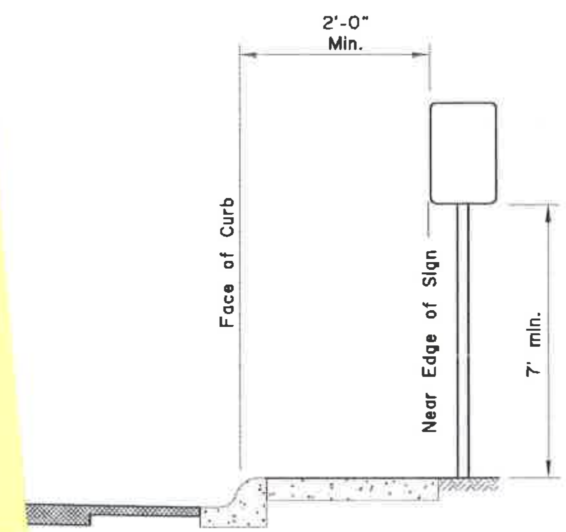


CURB WITHOUT SIDEWALK

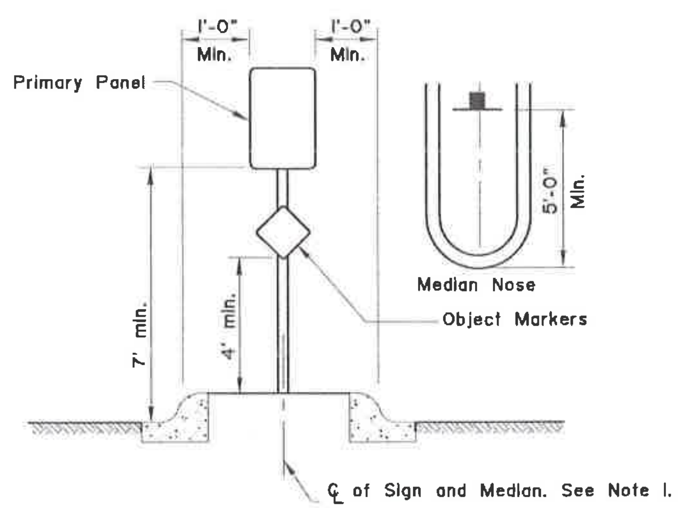


CURB WITH PARKWAY
(If R/W width permits, signs s... be placed behind sidewalk.)

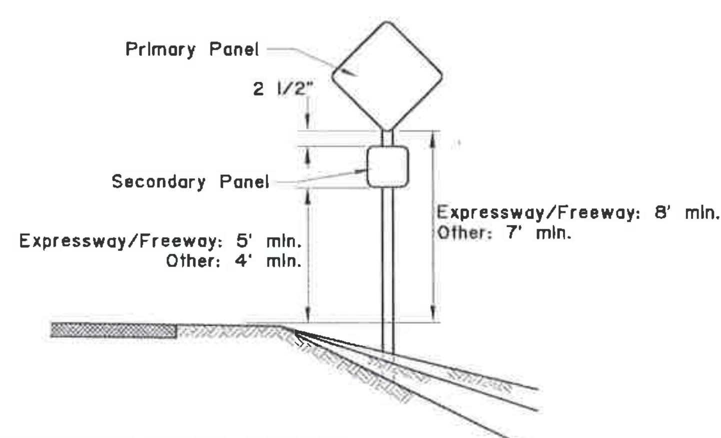
Signs As-Builds for Item #615. As Builds are True & Accurate to the Best of My Knowledge
[initials] 3-29-19.



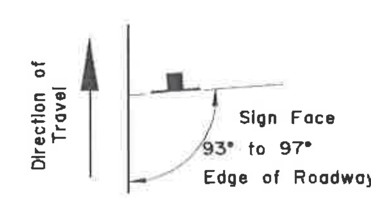
CURB WITH SIDEWALK WITHOUT PARKWAY



RAISED MEDIANS
Minimum 4' Width for Signing



SECONDARY PANEL HEIGHT
ALL TWO PANEL MOUNTING



SIGN POSITIONING

GENERAL NOTES

1. Unless shown otherwise on the plans, the standard sign offset is 12'. The minimum is 6'.
2. If signs extend over sidewalks, the minimum vertical clearance is 7'-0".
3. Add 6" to mounting height on unpaved roads.
4. If signs extend over bike paths, the minimum vertical clearance is 8' 0".
5. When signs are placed 30' or more from the edge of traveled way, mount them with the bottom of the sign at least 5' above the road surface at the near edge of the road.
6. When multiple hinged sign supports are used, mount hinges at least 7' above the ground.

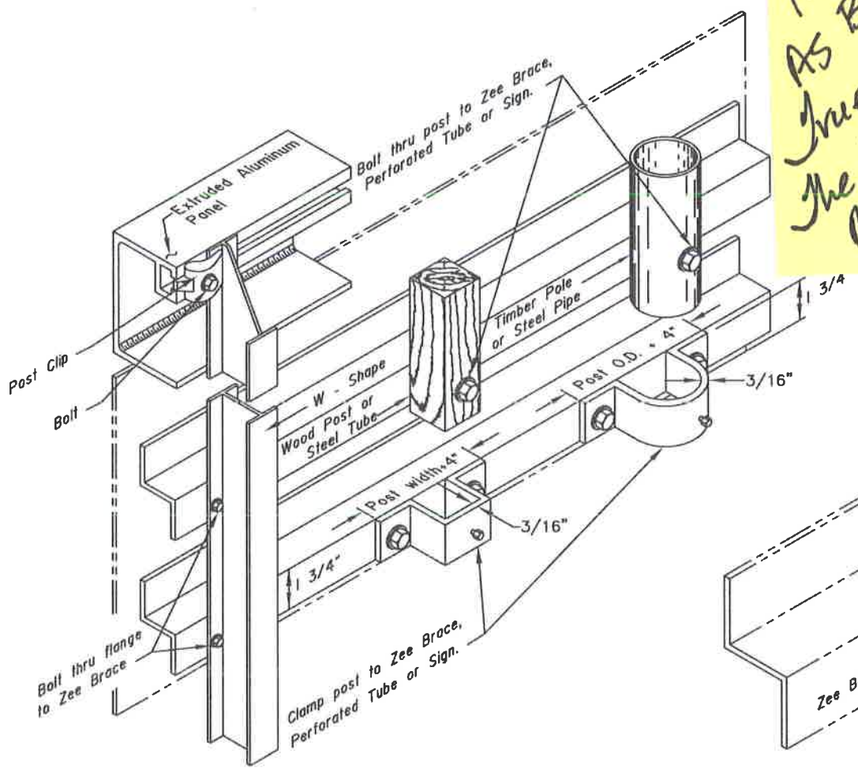
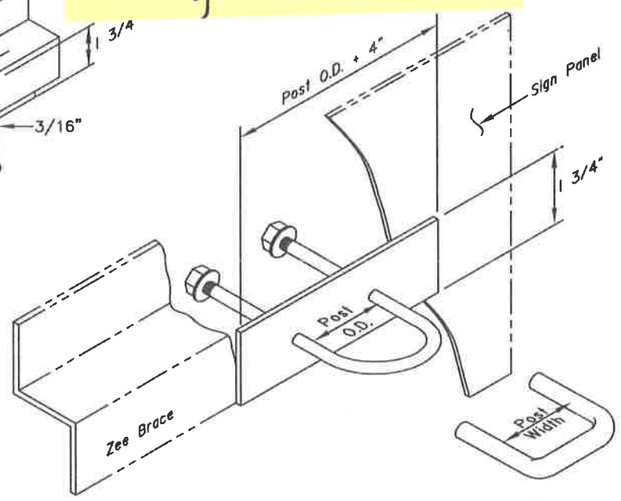
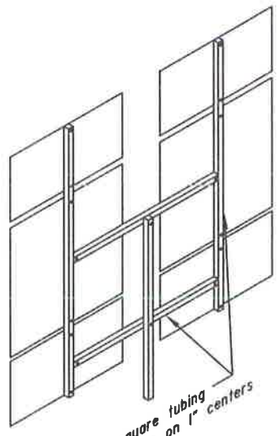
5/16" Bolt With Flat Washer

Steel Band

SIGN HARDWARE AS BUILT WE TRUE & ACCURATE TO THE BEST OF MY KNOWLEDGE REVIEWED BY T.V.L. FOR ODELL & RYELEA







GENERAL NOTES

1. Details shown indicate general design only. Dimensions and design may vary among the manufacturers.
2. Install weather tight caps on all pipe and tube post (except perforated tubing).
3. Protect sign posts installed using driving methods with drive caps during installation.
4. Bolt braces to posts at each point where they cross posts.
5. Install signs with top of post, mounting brackets, etc. with a minimum of 3" below top of sign.
6. Paint all sign mounting fasteners on sign face a color closely matching the sign face.
7. Attach all signs, zees and braces mounted to the posts with 5/16" bolts.
8. Furnish all aluminum nuts, bolts and washers with anodized finish.

PERFORATED STEEL TUBES (P.S.T.) (12 ga. – .105" Wall Thickness)		
POST SIZE (inch)	Embedment Depth	No. of P.S.T.s permitted within 7 ft path
1 1/2" x 1 1/2"	3'-0"	2
1 3/4" x 1 3/4"	3'-0"	2
2" x 2"	3'-6"	2
2 1/4" x 2 1/4"	4'-0"	1
2 1/2" x 2 1/2"	4'-6"	1

* Use 3"x3"x3/16" Stub for 2 1/2"x2 1/2" PST Applications.

PERFORATED STEEL TUBE (PST) POSTS

GENERAL NOTES:

1. Refer to Standard Drawing "Sheet Aluminum Sign and Framing" for light sign details.
2. See plans for type of post, size and embedment type.
3. To maintain crashworthiness, install no more than the number of P.S.T.s or wood posts specified in the tables within 7' of each other.
4. Do not install wood posts larger than 6"x8".
5. Use larger posts than shown on this sheet, with hinges, for multiple support signs where the supports are separated by more than 7 feet.

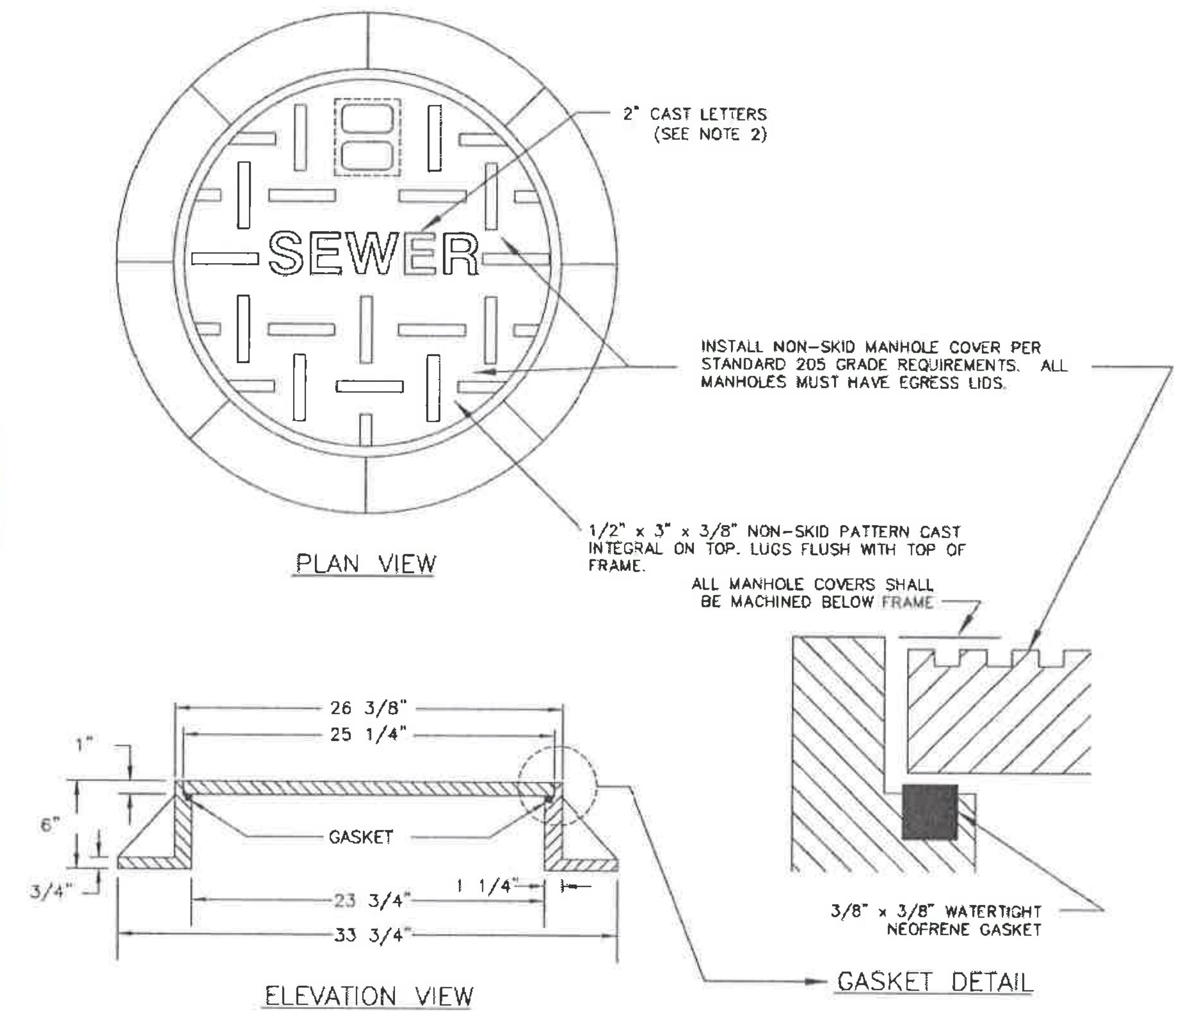
NOTES

1. USE NO MORE THAN ONE 4" ADJUSTING RING FOR NEW CONSTRUCTION OR UNPAVED ROADS. USE NO MORE THAN THREE 4" RINGS FOR RECONSTRUCTION OF PAVED OR CHIPSEAL ROADS. TOP ADJUSTING RINGS SHALL BE AN "INFRA-RISER" RUBBER ADJUSTING RING OR APPROVED EQUAL. MATCH FINAL GRADE PER TABLE CBJ STANDARD 205.
2. USE "PL POLYURETHANE SELF-LEVELING CONCRETE CRACK SEALANT" OR APPROVED EQUAL FOR "INFRA-RISER" INSTALLATION.
3. RUNGS TO BE PLACED 12" O.C. ON UNOBSTRUCTED SIDE OF MANHOLE. LAST RUNG SHALL BE 18" MAX FROM BOTTOM OF MANHOLE, AND TOP RUNG SHALL BE 6" MAXIMUM FROM TOP OF CONE. IF UNOBSTRUCTED SIDE NOT AVAILABLE, LAST RUNG SHALL BE PLACED 6" OVER SMALLEST PIPE. RUNGS SHALL BE LANE POLYETHYLENE 14" LADDER STEPS OR AN APPROVED EQUAL.
4. MAXIMUM PIPE DIAMETER SHALL BE 20" FOR A TYPE I MANHOLE. FOR LARGER PIPES, USE A TYPE II MANHOLE. MANHOLES INTERSECTED BY MORE THAN 2 PIPES, 15" DIAMETER OR LARGER, USE A TYPE II MANHOLE. MINIMUM MAINLINE DIAMETER SHALL BE 8".
5. REFER TO A.S.T.M. C-478 FOR DESIGN REQUIREMENTS AND C-478-69 FOR MINIMUM STEEL FOR BARREL AND BASE. BLOCKOUTS SHALL BE FORMED.
6. IF MANHOLE IS WITHIN A ROADWAY, COMPACTION TESTS MUST BE TAKEN ON BACKFILL EVERY 3'. DENSITY SHALL BE 95% OF MAXIMUM PROCTOR DENSITY.
7. MANHOLE FRAMES MAY BE RAISED TO ACCOMMODATE PAVEMENT OVERLAYS PROVIDED THE DISTANCE FROM THE TOP OF THE FRAME TO THE FIRST RUNG IS LESS THAN 36".

SCALE: NTS	DATE: 10/16/96	CITY AND BOROUGH OF JUNEAU, ALASKA SANITARY SEWER MANHOLE TYPES I & II
DRAWN BY: DRW	CHECKED BY: STAFF	
APPROVED BY:	REVISED: 8/14/2011	STANDARD 203



NOTES:

1. FRAME MUST BE MACHINED TO FIT WATERTIGHT NEOPRENE GASKET.
2. MANHOLE COVER SHALL BE WATER TIGHT WITH NO HOLES, SHALL HAVE THE WORD "SEWER", "WATER" OR "STORM DRAIN" CAST IN COVER AND SHALL BE PROVIDED WITH AN INTEGRAL POCKET LIFT HANDLE.
3. FRAME AND MANHOLE COVER DIMENSIONS SHALL BE IN ACCORDANCE WITH OLYMPIC CONSTRUCTION CASTINGS NO. MH30A WITH EGRESS LID, OR AN APPROVED EQUAL.
4. FRAME AND MANHOLE COVER SHALL BE DUCTILE OR CAST IRON AND A TYPE THAT WILL NOT CREATE A HAZARD FOR BICYCLE TRAFFIC.
5. IF MAINLINE IS 20" OR GREATER, PROVIDE MANHOLE WITH 30" OPENING IN COVER & FRAME.
6. ALL MANHOLE COVERS SHALL BE MACHINED BELOW FRAME AS SHOWN IN GASKET DETAIL ABOVE.

SCALE: NTS	DATE: 2/28/98	CITY AND BOROUGH OF JUNEAU, ALASKA STANDARD MANHOLE COVER & FRAME

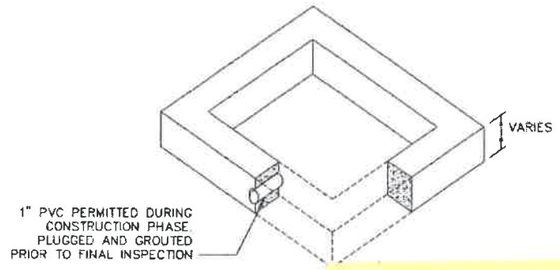
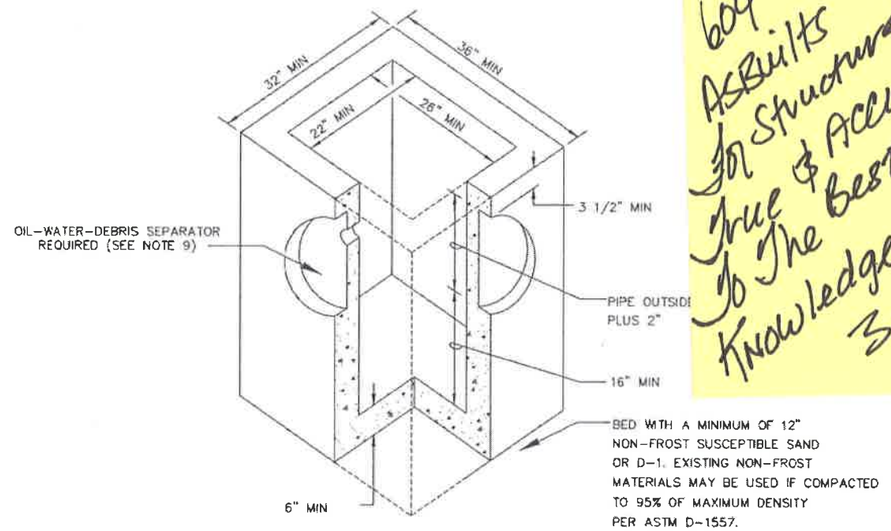
FRAME & GRATE



CONCRETE SE



CATCH BASIN

NOTES

1. FOR USE WITH TWO INLET/OUTLET PIPES OF DIAMETER 12" OR SMALLER. FOR LARGER AND/OR MORE INLET/OUTLET PIPES OR IF CATCH BASIN IS DEEPER THAN 4' FROM FINISH GRADE TO SUMP, INSTALL A TYPE I OR TYPE II STORM DRAIN MANHOLE (SEE STANDARD 303).
2. ENTIRE KNOCKOUT IS TO BE REMOVED AND SEALED SHUT AROUND PIPE. ALL PIPES ARE TO EXTEND MIN 1" AND MAX 3" INTO CATCH BASIN. GROUT INTERIOR AND EXTERIOR BETWEEN FRAME, SECTIONS, AND CATCH BASIN.
3. FRAME AND GRATE SHALL BE DUCTILE IRON. FRAME MAY BE CAST INTO THE TOP UNIT OR PLACED OVER THE OPENING AS APPROVED BY THE ENGINEER. FRAME AND GRATE SHALL BE OF A TYPE THAT WILL NOT CREATE A HAZARD FOR BICYCLE TRAFFIC.
4. CATCH BASIN SHALL MEET HIGHWAY STANDARD-20 LOAD REQUIREMENTS.
5. MINIMUM STEEL SHALL BE SPECIFIED BY ASTM C-478-69.
6. MINIMUM SUMP DEPTH SHALL BE 16".
7. ADJUSTING RING SHALL BE THE SAME SIZE AS THE CATCH BASIN.
8. THE AREA BETWEEN THE TOP OF THE CATCH BASIN AND THE FRAME SHALL BE FORMED AND FILLED WITH CONCRETE MEETING THE REQUIREMENTS OF CBJ SPECIFICATION 03302 – CONCRETE STRUCTURES. NO BRICKS, WOOD OR OTHER MATERIALS PERMITTED FOR ADJUSTING GRADE.
9. ALL CATCH BASINS THAT EMPTY INTO AN OPEN DRAINAGE SHALL BE FITTED WITH AN OIL-WATER-DEBRIS SEPARATOR DEVICE AS DIRECTED BY THE ENGINEER.

Give Hydrant As Built Is True & Accurate To The Best of My Knowledge. JVL 3-29-19.

NOTES

1. HYDRANT BARREL AND VALVE BOX SHALL BE PLUMB.
2. GROUND COVER SHALL BE 5' MINIMUM. ADDITIONAL COVER (MORE THAN 5') MAY BE REQUIRED BY THE ENGINEER.
3. WATER PIPE SHALL BE 6" MIN. D.I.P. AND ALL CONNECTIONS SHALL BE MEGALUGED OR CONNECTED WITH LOCKING FIELD GASKETS.
4. BENDS BETWEEN THE HYDRANT AND THE MAIN SHALL NOT EXCEED 11 1/4° UNLESS APPROVED BY ENGINEER.
5. ALL HYDRANTS SHALL BE PAINTED CATERPILLAR YELLOW, AND THE NUMBER OF FEET TO VALVE SHALL BE PRINTED IN BLACK 1/2" BLOCK LETTERS JUST BELOW TOP BONNET. PORT CAPS SHALL BE COLOR CODED PER NFPA STANDARD 291 AS DIRECTED BY THE CBJ WATER UTILITIES DEPARTMENT.
6. THAW WIRE SHALL BE #2 COPPER WITH TYPE THW INSULATION. THAW WIRE SHALL BE BOLTED OR CAD WELDED TO THE TEE AT THE MAIN. CONTINUITY STRAPS ARE REQUIRED ON 6" DIP. CONTINUITY AND ARRANGEMENT FOR TESTING BY CBJ WATER UTILITIES IS THE RESPONSIBILITY OF THE INSTALLER/CONTRACTOR.
7. INSTALL A PAVED HYDRANT PAD PER STANDARD 405 AND GUARD POSTS PER STANDARD 404.
8. HYDRANT SHALL BE MUELLER CENTURION 200 OR 250 WITH INTEGRAL STORZ PUMPER CONNECTION OR APPROVED EQUAL. CLOW F2500 SERIES HYDRANTS ARE NO LONGER ACCEPTED BY CBJ.
9. THIS STANDARD TO BE USED FOR ALL HYDRANTS AND BLOW-OFFS. ALTERNATE BLOW-OFF TYPE HYDRANTS ARE NO LONGER ACCEPTED BY CBJ.
10. FIRE HYDRANT TO THE VALVE SHALL BE TESTED TO A MINIMUM OF 200 PSI FOR TWO (2) HOURS PER STANDARD SPECIFICATION SECTION 02601 ARTICLE 3.5 PARAGRAPH B 2.
11. CBJ WATER UTILITIES DEPARTMENT SHALL DETERMINE FOR EACH HYDRANT INSTALLATION IF HYDRANT PLUGS SHALL BE REMOVED FOR SELF DRAINING. DO NOT BLOCK PLUG WITH THE THRUST BLOCK.

PROJECT No. 69500
Multi Use Path
Findings Summary

ADMIN FILES FINDINGS

A02 – Subcontracts is Complete-(First Tier).
(Sub Contractor – "Trucano" is Second Tier and is not listed in the Specs Book or anywhere else)
A04 - Labor Compliance Interviews – is Complete (3 prime and 5 subs)
A05 - Certified Payrolls is ordered by Dates – No in order by CPRs number.
A08 - Directives are 32. #32 needs Sub signature
A09 - RFP total: 18
A10 - IWA total: 9
A16 – Scales certs are not available
B07 – Safety Meetings is incomplete

Change of Orders –

- COs Summary Audit page is Incomplete
- #16 have a $$$ difference of 0.56
- **CO#8, #09, #10, #20 needs Contractor Signatures (not signatures in digital form).**
- Back-up files is Incomplete.

-CO Labeled as #12, in the filed form appears as #11. In CO#12 Final Date is extended to July 15 2016

-CO#22 appears in the Q Drive, but is not filed in the Admin Files folder box. Needs Signatures also.

Note:
bundle with multiple (3) "COs #11" and Directives 5 and 7 shown conflictive Numbers in COs existing list.

PAY ITEMS FINDINGS

- Estimate #18 is divided in two (2) sections: - "Line A" Multi Use Path (pages 1 to 4 in a total of 7pages)

-"Line B" Auke Lake Parking Lot (pages 5 to 6 in a total of 7pages)

- Item "# 203(3)a" and "# 203(3)b" are in conflict in CO# 18.

- Item "# 203(25)B" or "CO # 15" is not listed in the present Estimate #18.

- Item "# 604(8)a", Dollar Value $93.82, related to "CO # 17" is not listed in the present Estimate #18.

- Item "# 630(3)b", Item Created by CO #21 is not included in the present Estimate #18.
