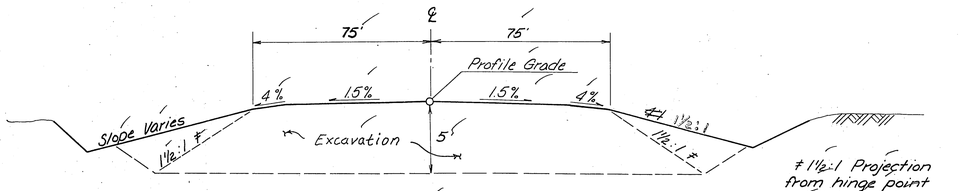
ACCESS ROAD
STA. "A" 12+60 to STA. "A" 20+78.45



‡ 1½:1 Projection from hinge point shall be used to determine the width of excavation.

RUNWAY
TYPICAL WASTE REMOVAL SECTION

GENERAL NOTES:

1. Vertical and Horizontal alignments shown on these plans are subject to minor field revisions.
2. Pipe conduit lengths and locations are approximate only and are subject to field adjustments.
3. Clearing and Grubbing Limits shall be 10' beyond the slope limits in cut areas and 5' beyond the slope limits in fill areas.
4. If the Contractor elects to stockpile useable excavation for reuse elsewhere on the Project, no measurement of quantities will be made and all work involved shall be considered a subsidiary obligation of the Contractor.
5. All waste material shall be disposed of at approved locations on the Project Site or at an adjacent site with proper approvals. The Engineer will determine the height and width of the waste embankment adjacent to the Runway. In no case shall the waste be above the Runway. The designated waste area adjacent to the Runway is available for all project waste if the Contractor elects to use this area.
6. A Cushion Blanket (4" minus material) 12" thick shall be placed on all woven Geotextile overlaps. This material shall be included for payment as Embankment.
7. When rock material is encountered in seeding limits, that area shall not be seeded.
8. Stationing for the property monuments are approximate only. The exact location of the existing property monuments are to be tied out and reset by a Registered Land Surveyor. See Section 701. This work shall be considered incidental to other items of work.

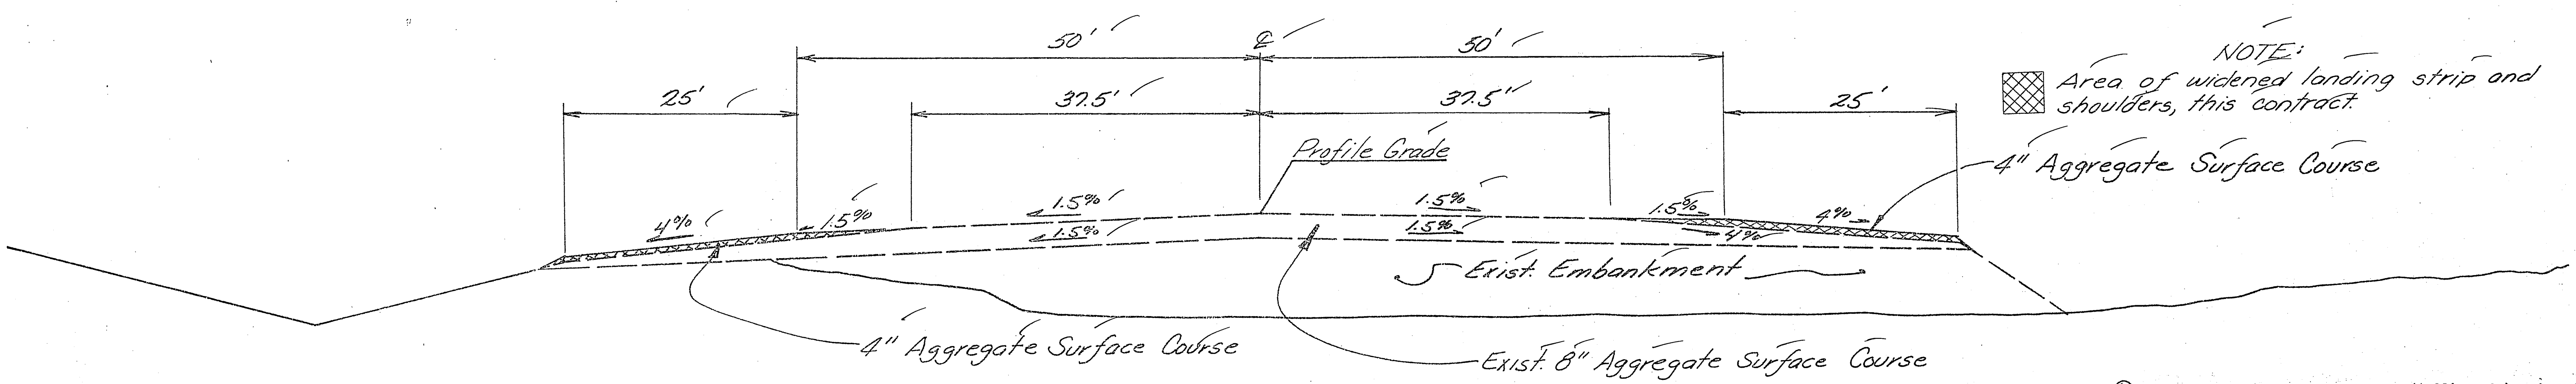
TYPICAL RUNWAY SECTIONS

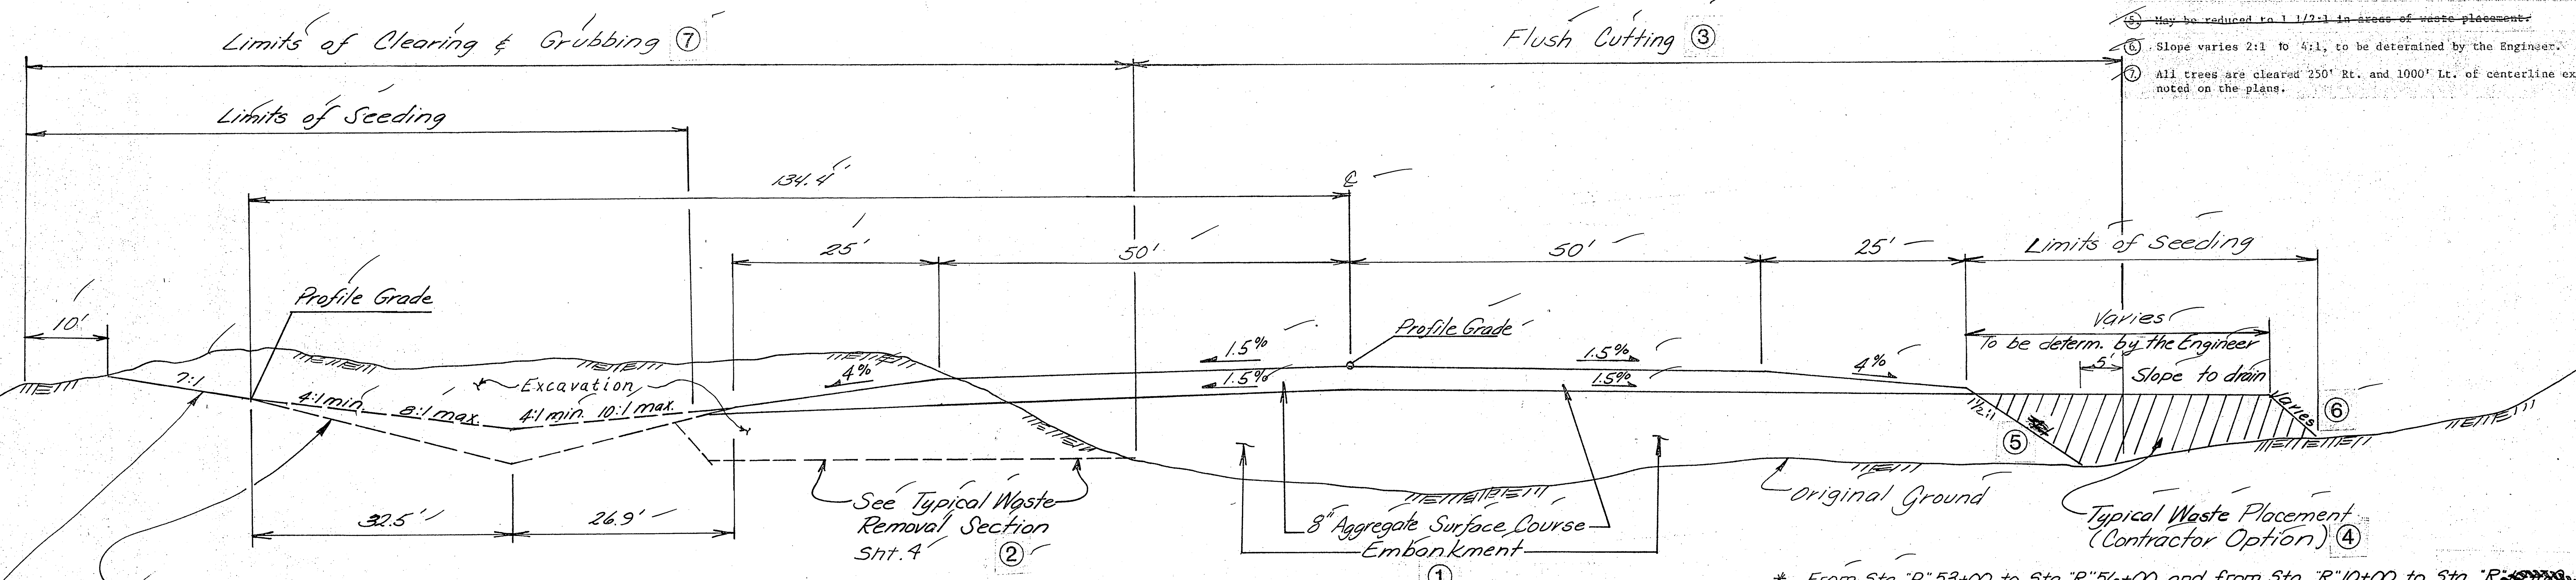
STATE	PROJECT DESIGNATION	YEAR	SHEET NO.	TOTAL SHEETS
ALASKA				



RUNWAY SECTION

STA. "R" 10+60 TO STA. "R" 45+40

1. When minimum depth of embankment (4.33' at C_L) cannot be achieved, refer to Typical Waste Removal Section.
2. Waste material may include vegetation, muskeg, organic soils and other materials which are unsuitable for use in Embankment as determined by the Engineer. Note: The thickness and amounts of waste material varies throughout the project. The Typical Waste Removal Section does not apply when in ground suitable for embankment.
3. Flush cutting shall be done in lieu of Clearing and Grubbing, and shall be paid for as Clearing and Grubbing.
4. No waste placement shall be permitted between Sta. "R" 51+00 and "R" 52+00.
5. ~~May be reduced to 1 1/2:1 in areas of waste placement.~~
6. Slope varies 2:1 to 4:1, to be determined by the Engineer.
7. All trees are cleared 250' Rt. and 1000' Lt. of centerline except as noted on the plans.



Ditch slope & depth varies. See sheets 8-10 for flowline elevation.

Ditch section does not apply between Sta. 10+00 & Sta. 10+60. Use a 4:1 fillslope.

Rock may be encountered with pockets of unsuitable material. Construct as directed by the Engineer. Rock may need to be wasted and additional rock obtained from clear zone if directed.

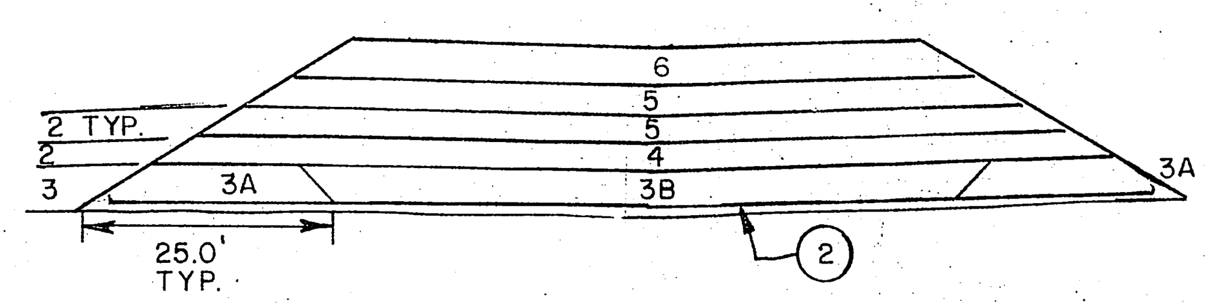
RUNWAY SECTIONS

STA. "R" 45+40 TO STA. "R" 56+00 *
STA. "R" 10+00 TO STA. "R" 10+60 * ‡ ⊞

* From Sta. "R" 53+00 to Sta. "R" 56+00 and from Sta. "R" 10+00 to Sta. "R" 10+60 reduce aggregate surface course thickness to 2."

‡ Place Reinforcing Fabric perpendicular to ℄ on original ground.

⊞ 10+00 to 10+60 Fill slopes will remain 4:1



‡ SEQUENCE OF CONSTRUCTION

STA. "R" 10+00 TO STA. "R" 10+60

1. INSTALL SETTLEMENT PLATFORMS.
2. PLACE GEOTEXTILE REINFORCEMENT, TYPE 2 PERPENDICULAR TO C_L ON ORIGINAL GROUND.
3A. CONSTRUCT OUTSIDE SECTIONS OF INITIAL LIFT.
3B. CONSTRUCT INTERIOR SECTION OF INITIAL LIFT. NEXT, WAIT 10 DAYS.
4. CONSTRUCT SECOND LIFT, 2' MAX. NEXT WAIT 10 DAYS.
5. REPEAT STEP 4 AND WAITING PERIOD, UNTIL EMBANKMENT HAS BEEN CONSTRUCTED TO THE BOTTOM OF SUBBASE.
6. CONSTRUCT AGGREGATE SURFACE COURSE LIFT.

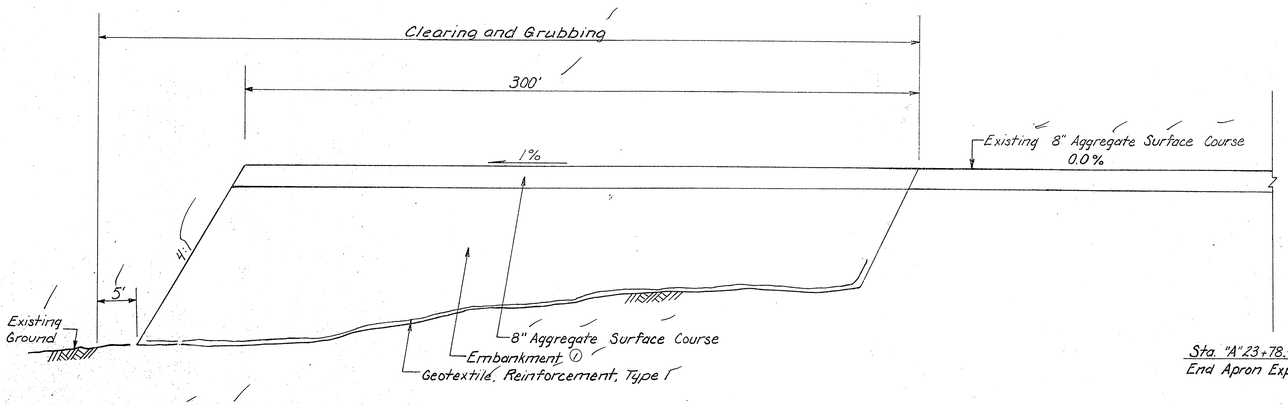
TYPICAL APRON EXPANSION SECTION

N.T.S.



General Notes

1. Minimum 5 ft depth in material unsuitable for embankment or excavate to rock or suitable base material as determined by the engineer.
2. Geotextile shall be placed over unsuitable base material and shall overlap 6'ft over rock or suitable base material. All other geotextile overlaps shall be per manufacturers recommendation.
3. Remove existing tie down anchors in conflict with Run-up pad. This work shall be considered incidental to Item 800.

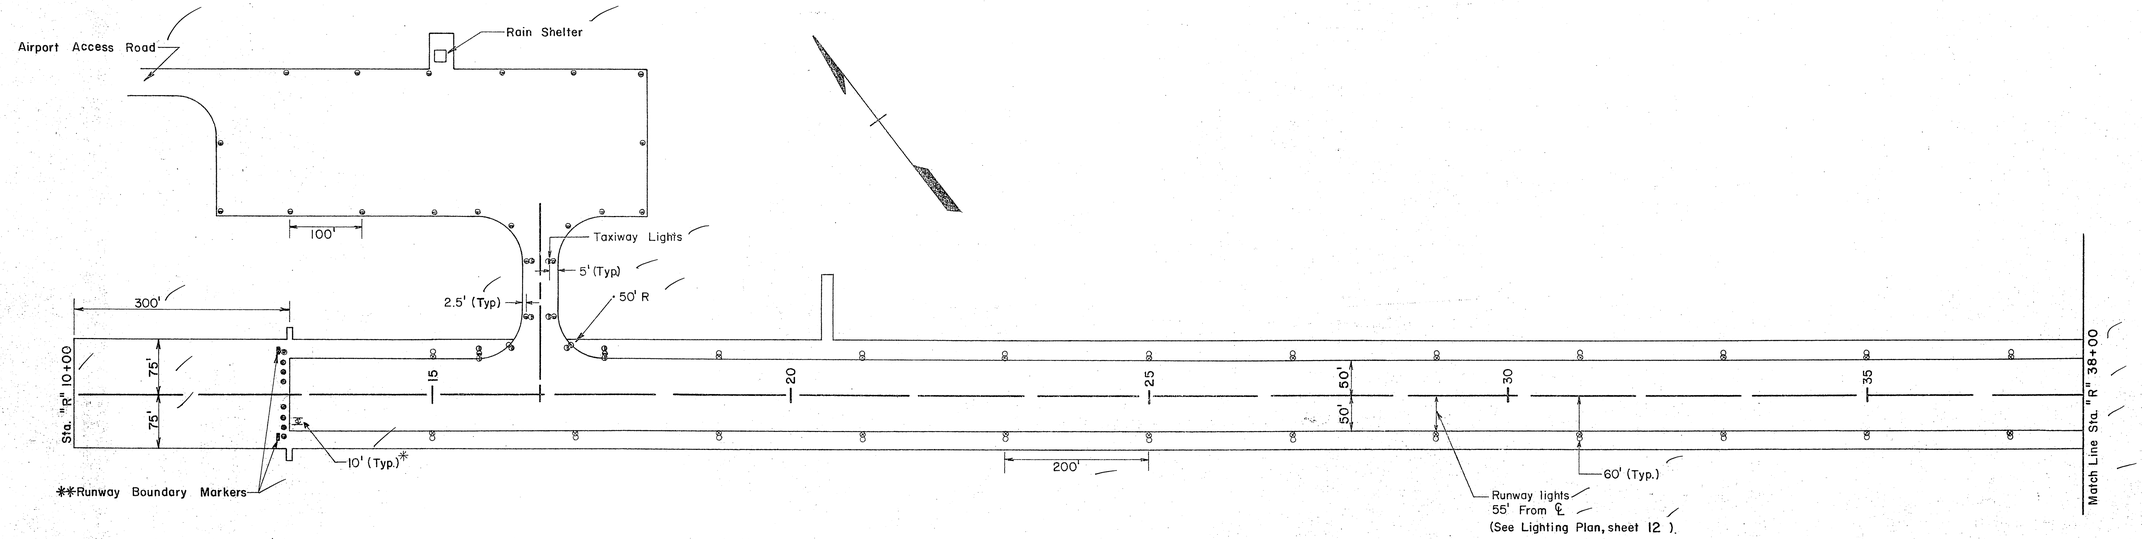
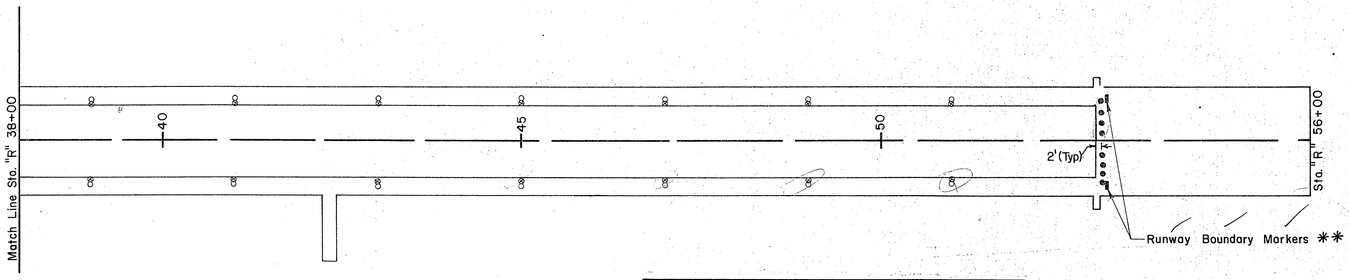
REFLECTIVE MARKER PLAN





* Threshold Reflective Markers shall be placed in line with and approximately 5' outboard (away from centerline) of each threshold light. See lighting plan sheet 12.

** Remove existing Runway Boundary Markers located at Sta. 43+10 and install at Sta. 53+10, 50 ~~feet~~ Rt. and Lt. of ℄. See sht. 25 for details. This work shall be considered incidental to other items of work.

POWER & TELEPHONE PLAN

General Notes

1. Telephone Conduit shall be installed in the same trench a minimum of 6" spacing from Power Conduit.
2. Cable Marker Posts and Utility Marker Tape shall be incidental to condiut installation.
3. Rock excavation ~~may~~ will be encountered approximately between Sta. 0+00 to Sta. 5+00. All blasting and rock excavation shall be incidental to conduit installation.
4. Conduit shall be installed adjacent to the Left toe of slope with a min. cover of 36." Any destruction of the structural section as a result of conduit installation shall be repaired to the satisfaction of the Engineer, and at no additional cost to the state.

Designate as:
UM 2-3 Single arrester installation
UM 2-3A Parallel arrester installation
7.2/12.5kV only.

"B" minimum -
7.2/12.5kV = 15"
14.4/24.9kV = 20"

Note:
Total arrester lead length must be as short as possible.

ITEM	NO.	MATERIAL
c	1	Bolt, machine, 5/8" x required length
d	1	Washer, square, 2 1/4"
j		Screw, lag, 1/2" x 4", as required
dq	1	Eye screw, elliptical
p		Connectors, as required
av		Jumpers, as required
Uax	1	Cutout, load break type and single arrester combination (UM 2-3)
bo	1	Shackle, anchor
ek		Locknuts, as required
fi	1	Connector, hot line tap assembly
Ugc	1	Cable riser sheild, length as required
Ugk	1	Cable termination
Uhc	1	Cable support
Uhd	1	Bracket, pothead mounting
Uax	1	Cutout, load break type and parallel arrester combination (UM 2-3A)
