Klondike Highway Rehabilitation: Skagway River Bridge to Black Lake

State Project No.: SFHWY00753

Temporary Traffic Control: Dairy Creek Culvert Replacement

How Will It Work?

Traffic in the Dairy Creek area will be narrowed to one lane to allow for the installation of a new fish passage pipe arch. The active traffic lane will be shifted to alternate sides of the existing highway and onto/off of the temporary roadway during different phases of construction as the temporary roadway is built, the pipe arch is installed, and the

Klondike Highway Temporary Traffic Control Objectives:

- **Advance Public Notice:** Provide at least 3 days' notice before major delays, lane restrictions, or road closures. Keep total stoppage time for vehicles traveling through the project area under 20 minutes.
- **Provide Local Access:** Maintain access to properties in the Dairy Creek area throughout construction, to ensure continued use by residents and businesses.
- **Prioritize Key Traffic:** Ensure minimal delays to buses and emergency vehicles. Coordinate closures to prioritize access for major sporting events. Restrict construction operations to off-peak hours to accommodate tourism traffic, whenever possible.
