

# Managing Traffic During Construction: *What You Need to Know*

## *Klondike Highway Rehabilitation: Skagway River Bridge to Canadian Border*

### **PARTIAL CLOSURE**

#### **Temporary Traffic Control Objectives:**

Minimize Disruption: Maintain at least one open lane during construction whenever feasible, with flaggers directing traffic.

Prioritize Key Traffic: Ensure minimal delays to buses and emergency vehicles and avoid peak hour congestion. Coordinate closures to prioritize access for major sporting events.

### **FULL CLOSURE**

#### **Temporary Traffic Control Objectives:**

Planned Closures for Safety: Full closures may be necessary for rockfall and avalanche mitigation work, or significant excavation.

Advance Public Notice: Provide timely and clear communication to keep the public informed.

Minimize Impacts: Road and lane closures will be coordinated to minimize traffic disruptions as much as possible.
