

THRIVING COMMUNITIES

Transportation Infrastructure Technical Assistance Program

What is Thriving Communities?

U.S. Department of Transportation's (USDOT) Thriving Communities Program (TCP) aims to ensure that communities have the technical tools and organizational capacity to compete for federal aid and deliver quality transportation infrastructure projects that enable their communities and neighborhoods to thrive. TCP provides planning, technical assistance and capacity building support for transportation planning efforts in your community.

Your Transportation Planning Projects?

What transportation planning projects are you working on?

CAPACITY BUILDING NEEDS?

Use this space to share what your capacity building needs are. Assess what services you might need to complete critical transportation infrastructure projects in your community.

Technical Assistance

Offering expert guidance in transportation planning, project development, and grant application processes to help communities effectively navigate federal funding opportunities.

Skill Building

Enhancing the skills and capabilities of local organizations and stakeholders to manage and implement transportation projects. This includes training in project management, financial management, and stakeholder engagement.

Planning Support

Assisting communities in developing transportation plans that align with their specific needs and goals, ensuring that projects are sustainable and beneficial in the long term.

Community Engagement

Facilitating meaningful public involvement to ensure that transportation projects reflect the priorities and needs of the community.

Resource Identification

Helping communities identify and access funding sources, including federal, state, and local grants, to support transportation projects.
