Attachment 1: Sponsor Certification for Construction Project Final Acceptance

Sponsor's Name

Airport

Project Number

Project Description

Section 47105(d) of the Federal Aviation Reauthorization Act of 1996, as amended (herein called the Act), authorizes the Secretary to require certification from sponsors that they will comply with statutory and administrative requirements. The following list of certified items includes major requirements for this aspect of project implementation. However, the list is not comprehensive, nor does it relieve sponsors from fully complying with all applicable statutory and administrative standards. Every certified item must be marked. Each certified item with a "no" response must be fully explained in an attachment to this certification. If the item is not applicable to this project, mark the item "N/A". General requirements for final acceptance and close-out of Federally funded construction projects are in 49 CFR 18.50. The sponsor shall determine that project costs are accurate and proper in accordance with specific requirements of the Grant Agreement and contract documents.

- 1. The personnel engaged in project administration, engineering supervision, and construction inspection and testing (were/will be) determined to be qualified and competent to perform the work.
- 2. Daily construction records (were/will be) kept by the resident engineer/construction inspector. These records document work in progress, quality and quantity of materials delivered, test locations and results, instructions provided the contractor, weather, equipment use, labor requirements, safety problems, and changes required.
- 3. Weekly payroll records and statements of compliance (were/will be) submitted by the prime contractor and reviewed by the sponsor for Federal Labor And Civil Rights Requirements (Advisory Circulars 150/5100-6 and 150/5100-15).
- 4. Complaints regarding the mandated Federal provisions set forth in the contract documents (have been/will be) submitted to FAA.
- 5. All tests specified in the plans and specifications (were/will be) performed and the test results documented. A summary of test results (has been/will be) available to FAA.
- 6. For any test results outside allowable tolerances, appropriate corrective actions (were/will be) taken.
