STATE OF ALASKA
DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES
DIVISION OF PLANNING AND PROGRAMMING
RESEARCH SECTION
2301 Peger Road
Fairbanks, Alaska 99701

The contents of this report reflect the views of the authors who are responsible for the facts and the accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the Alaska Department of Transportation and Public Facilities. This report does not constitute a standard, specification or regulation.

Executive Summary

Alaska highway system maintenance costs have been compiled and summarized at the request of Robert W. Ward, Commissioner of the Department of Transportation and Public Facilities. The State highway system was subdivided into three geographic regions and eight roadway types. The regions as shown in Figure 1 are as follows:

- Region I includes most of the Central, and all of the South-central and Southeast maintenance regions.
- Region II includes the Interior maintenance region in its entirety.
- Region III includes all of the Western maintenance region and that portion of the Central maintenance region lying west of the 165th parallel, extended south to the Kuskokwim River, thence to the Bering Sea along the meander line of the Kuskokwim River.

The roadway types are categorized as:

- Type I: 4-lane paved urban routes
- Type II: 4-lane paved rural routes
- Type III: 2-lane paved urban routes
- Type IV: 2-lane paved rural primary routes
- Type V: 2-lane paved rural secondary routes
- Type VI: 2-lane gravel secondary routes
- Type VII: Minimum service routes (< 20 feet gravel surface)
- Type VIII: 2-lane local routes (paved or unpaved)

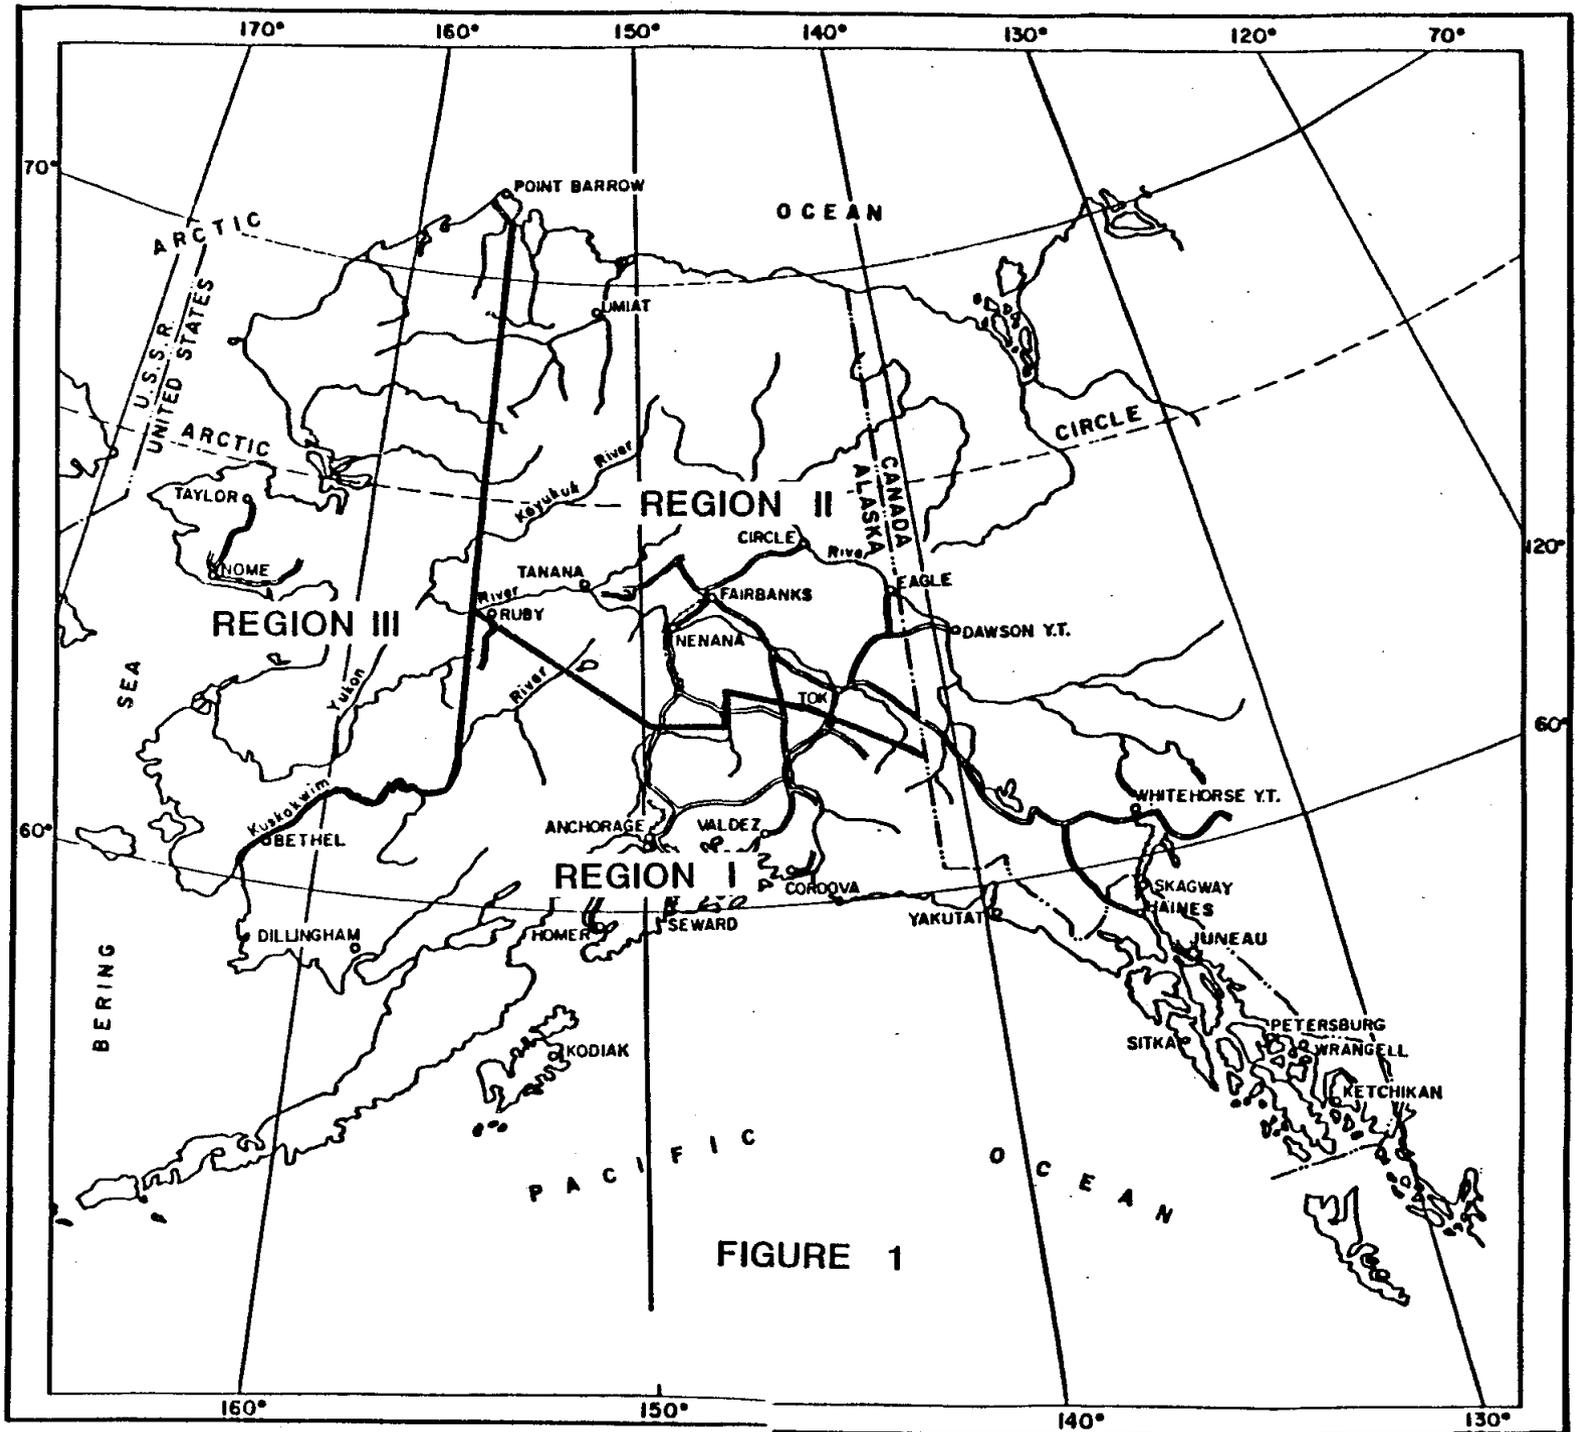

FIGURE 1

Table 1 summarizes the average total maintenance costs per lane mile for each roadway type in each region. These data are graphically shown in Figure 2. The overhead rate was derived by dividing the highway maintenance budget by the sum of administrative and facilities maintenance costs. It was estimated that 20% of administrative costs were expended on airport maintenance overhead and were therefore subtracted from that budget before computing the highway maintenance overhead rate. More detailed cost breakdowns are available within the main body of the report.

It should be noted that the Maintenance and Operations Division currently functions on a deferred maintenance budget, i.e. only basic preventive maintenance can be performed. As a consequence, the life of a roadway is significantly shortened. This is evidenced by the 10% increase of paved highway mileage exhibiting fatigue cracking state-wide between 1978 and 1981 (from the 1978-1981 Pavement System Inventory).

Table 1

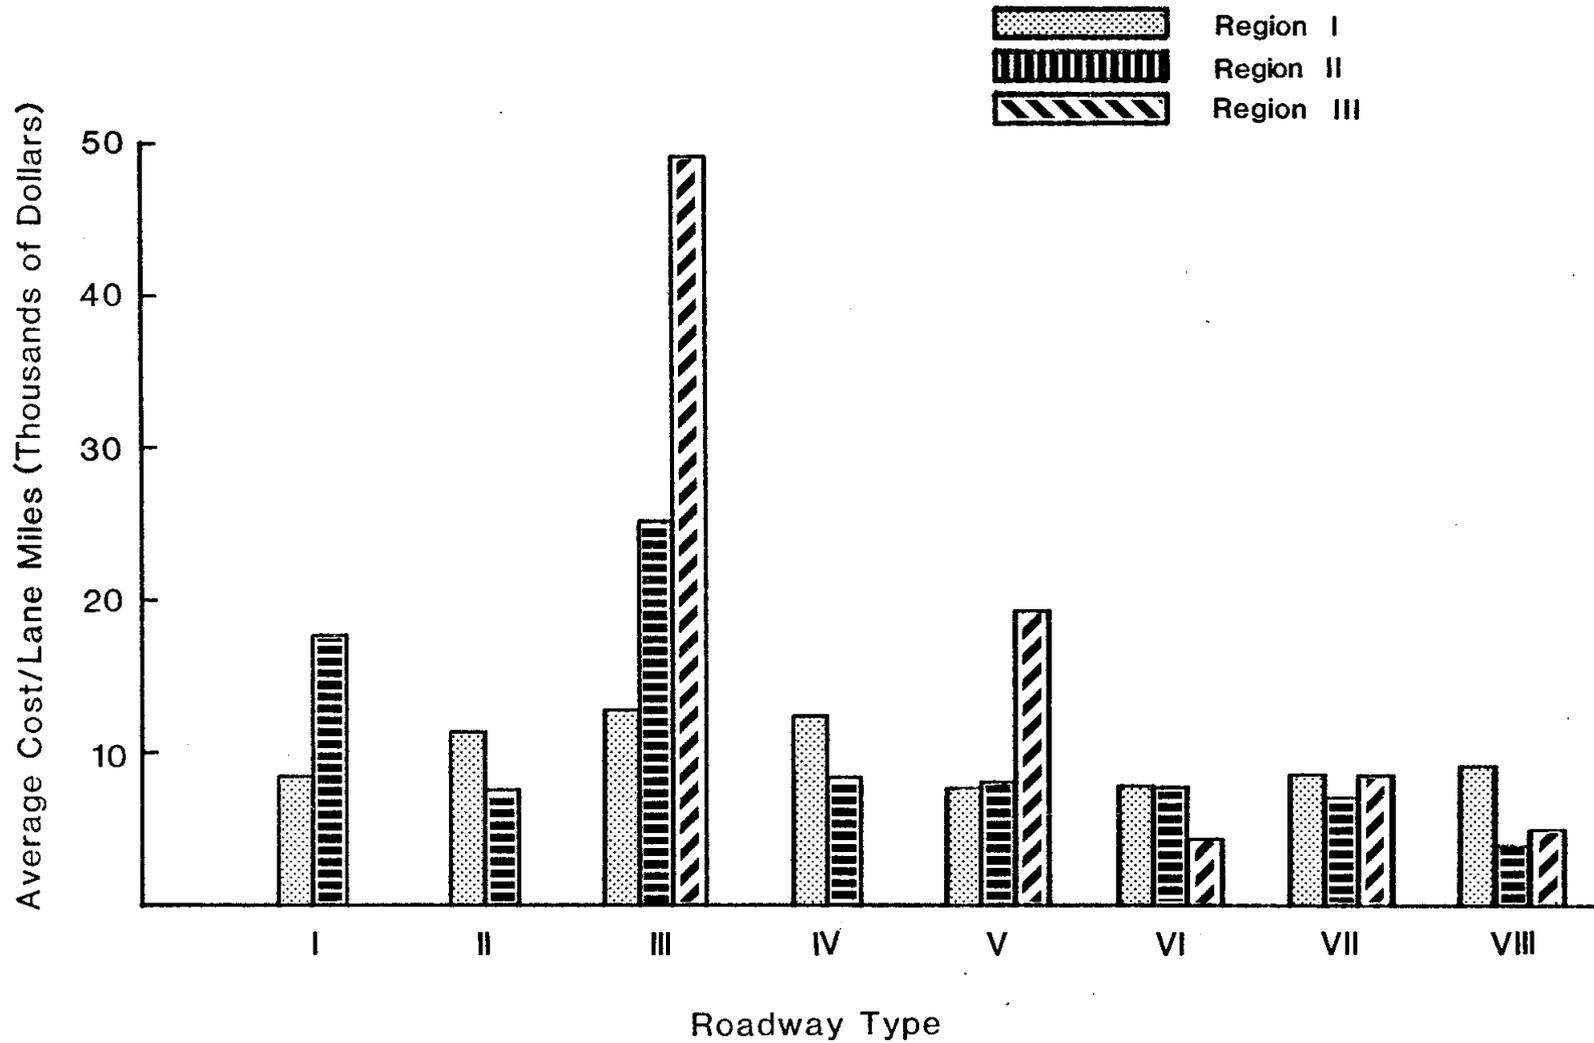

SUMMARY OF AVERAGE TOTAL MAINTENANCE COST/LANE MILE/YEAR
Including Overhead Costs

Roadway Type	Typical Surface Width (ft.)	Region I			Region II			Region III		
		Maintenance Cost	Overhead (31%)	Total	Maintenance Cost	Overhead (31%)	Total	Maintenance Cost	Overhead (31%)	Total
I	48	\$ 6,418	\$ 1,990	\$ 8,408	\$13,519	\$ 4,191	\$17,710	-0-	-0-	-0-
II	48	8,670	2,688	11,358	5,751	1,783	7,534	-0-	-0-	-0-
III	24	9,774	3,030	12,804	19,247	5,967	25,214	\$37,486	\$11,621	\$49,107
IV	24	9,464	2,934	12,398	6,395	1,982	8,377	-0-	-0-	-0-
V	24	5,816	1,802	7,618	6,153	1,907	8,060	14,751	4,573	19,324
VI	32	5,970	1,850	7,820	5,890	1,826	7,716	3,294	1,021	4,315
VII	18	6,527	2,023	8,550	5,396	1,673	7,069	6,470	2,006	8,476
VIII	24	6,944	2,153	9,097	2,982	924	3,906	3,784	1,173	4,957

Figure 2

COMPARISON OF AVERAGE TOTAL MAINTENANCE COSTS

(Including Overhead Costs)

Introduction

This report was initiated at the request of Commissioner Robert W. Ward for the compilation and assembly of information showing the average cost per mile for maintenance of the State highway system.

Average maintenance costs per mile are compiled for each route in the State highway system with the routes divided into eight types of roadways within each of three geographic regions of the State as defined under the "Definitions" section. All route mileage shown in the General Road Log are converted to equivalent 12 foot travel lane widths. For example, one mile of roadway surface 24 feet in width equals two lane miles. The report furnishes highway maintenance information showing:

1. The average cost per lane mile for each route subdivided into the appropriate roadway types by region.
2. The average cost per lane mile by route within each of the three geographic regions.
3. A summary of the average cost per lane mile for each roadway type within each region.
4. The average cost per lane mile for the major types of service performed by Maintenance and Operations (M&O) based on the total mileage of each roadway type within the regions.
5. A statewide summary of the average cost per lane mile for each M&O service type and a total statewide average maintenance cost per lane mile.

The tabulated numerical information in this report is illustrated by Figures 3 through 9.

Since this report is intended to be a working document, the organization is somewhat different than normal. The report begins with a broad overview of the data compiled, then becomes more detailed as it progresses.

DEFINITIONS

Definition of Geographic Areas

To determine roadway maintenance costs the highway system was divided into three geographic areas identified as Regions I, II and III, and as shown in Figure 1.

Region I includes most of the Central, and all of the Southcentral, and Southeastern maintenance regions. This region basically includes all areas south of the Alaska range and not contained within Region III shown in Figure 1. Region I contains 52.55% of the total lane miles of all State maintained routes.

Region II is exclusively the Interior maintenance region and lies north of the Alaska Range and east of the 156th parallel. Region II contains 37.10% of the total lane miles of all routes.

Region III includes the Western maintenance region and that portion of the Central maintenance region lying west of the 165th parallel extended south to the Kuskokwim River, thence to the Bering Sea along the meander line of the Kuskokwim River. Region III contains 10.35% of the total lane miles of all routes.

Definitions of Roadway Types

The definitions of the eight roadway types as shown by Table 2 were established using the Department of Transportation and Public Facilities General Road Log dated 01/01/81 together with information obtained from the Alaska Highways Annual Traffic Volume Report, Volume 1, 1978.

Table 2

<u>Type</u>	<u>Description</u>
I.	4-Lane Paved Urban
II.	4-Lane Paved Rural
III.	2-Lane Urban Paved Primary
IV.	2-Lane Paved Rural Primary
V.	2-Lane Paved Rural Secondary
VI.	2-Lane Gravel Secondary Arterials
VII.	Minimum Service Road (less than 20 ft. Gravel Surface)
VIII.	2-Lane Local Routes (Paved or Unpaved)

Expanded definitions for each of the eight type headings are as follows:

Type I, 4-Lane Paved Urban

This roadway type includes all 4-lane routes under F.A.U. (Federal Aid Urban) designation as shown in the Annual Traffic Volume Report, and is described in the General Road Log as four paved traffic lanes. This type totals 4% of the route mileage in the State highway system.

Type II, 4-Lane Paved Rural

Type II roadways include all 4-lane routes not designated F.A.U. in the Annual Traffic Volume Report. This type totals 2% of the route

mileage in the State highway system.

Type III, 2-Lane Paved Urban Primary

Type III roadways include all 2-lane paved routes under F.A.U. designation and urban F.A.P. (Federal Aid Primary) designation as shown in the Annual Traffic Volume Report. This type totals 4% of the route mileage in the State highway system.

Type IV, 2-Lane Paved Rural Primary

Type IV roadways include all 2-lane paved rural routes under F.A.P. designation as shown in the Annual Traffic Volume Report. This type totals 27% of the route mileage in the State highway system.

Type V, 2-Lane Paved Rural Secondary

This type includes all 2-lane paved routes under F.A.S. (Federal Aid Secondary) designation as shown in the Annual Traffic Volume Report. This type totals 9% of the route mileage in the State highway system.

Type VI, 2-Lane Gravel Secondary Arterials

Type VI roadways include all 2-lane gravel surfaced routes greater than 20 feet in width. Some routes of this type are non-federal aid routes while others are F.A.S. designated routes. This type totals 34% ✓ of the route mileage in the State highway system.

Type VII, Minimum Service Roads (Less than 20 ft. Gravel Surface)

Type VII roadways include all unpaved routes described in the General Road Log as being less than 20 feet in width. This type totals 4% of the route mileage in the State highway system.

Type VIII, 2-Lane Local Roads (Paved or unpaved)

Type VIII roadways include all routes described in the General Road

Log which are not included in type I through VII. The majority of the routes in this group are 2-lane local roadways. While this roadway type may actually include any of the other seven roadway types, it is not possible to determine the individual route costs since these routes were grouped by M&O for cost accounting purposes. This type totals 16% of the route mileage in the State highway system.

Discussion of the Data

The Division of Maintenance and Operations currently maintains approximately 10,500 lane miles of roadway. The distribution of lane miles by region and roadway type is summarized in Table 3 below. Descriptions of regions and roadway types are found in the section entitled "Definitions".

Table 3
Summary of Roadway Mileage (Lane Miles)

<u>Region</u>	<u>Roadway Type</u>								<u>Total</u>
	<u>I</u>	<u>II</u>	<u>III</u>	<u>IV</u>	<u>V</u>	<u>VI</u>	<u>VII</u>	<u>VIII</u>	
I.	331	116	379	1,727	707	1,055	193	1,004	5,512
II.	67	88	45	1,066	290	2,051	98	186	3,891
III.	<u>0</u>	<u>0</u>	<u>8</u>	<u>0</u>	<u>2</u>	<u>468</u>	<u>102</u>	<u>505</u>	<u>1,085</u>
Totals	398	204	432	2,793	999	3,574	393	1,695	10,488

The average cost per lane mile is summarized in Table 4. It must be remembered that these costs relate to a roadway section one mile in length and 12 feet in width. For example a 2-lane primary rural roadway (Type IV) in Region I with a 24 foot paved surface would cost on an average of \$9,464 per lane mile each year or \$18,928 per mile ($\$9,464 \times 24/12$) to maintain. The same roadway type with a 30 foot paved surface would cost \$23,660 per mile each year ($\$9,464 \times 30/12$) to maintain.

Figures 3 through 7 compare the average costs of maintaining the various types of roadways. Because of the variations in unit costs for labor, equipment, materials and shipping, the data shown in these figures do not allow direct comparison between regions for the level of maintenance performed.

TABLE 4

SUMMARY OF MAINTENANCE COSTS

Roadway Type	Maintenance Service	Climatic Region		
		I	II	III
4-Lane Urban (Type I)	Roadway Surface	1,071	2,264	-0-
	Roadside	2,576	1,102	-0-
	Traffic Services	1,330	6,761	-0-

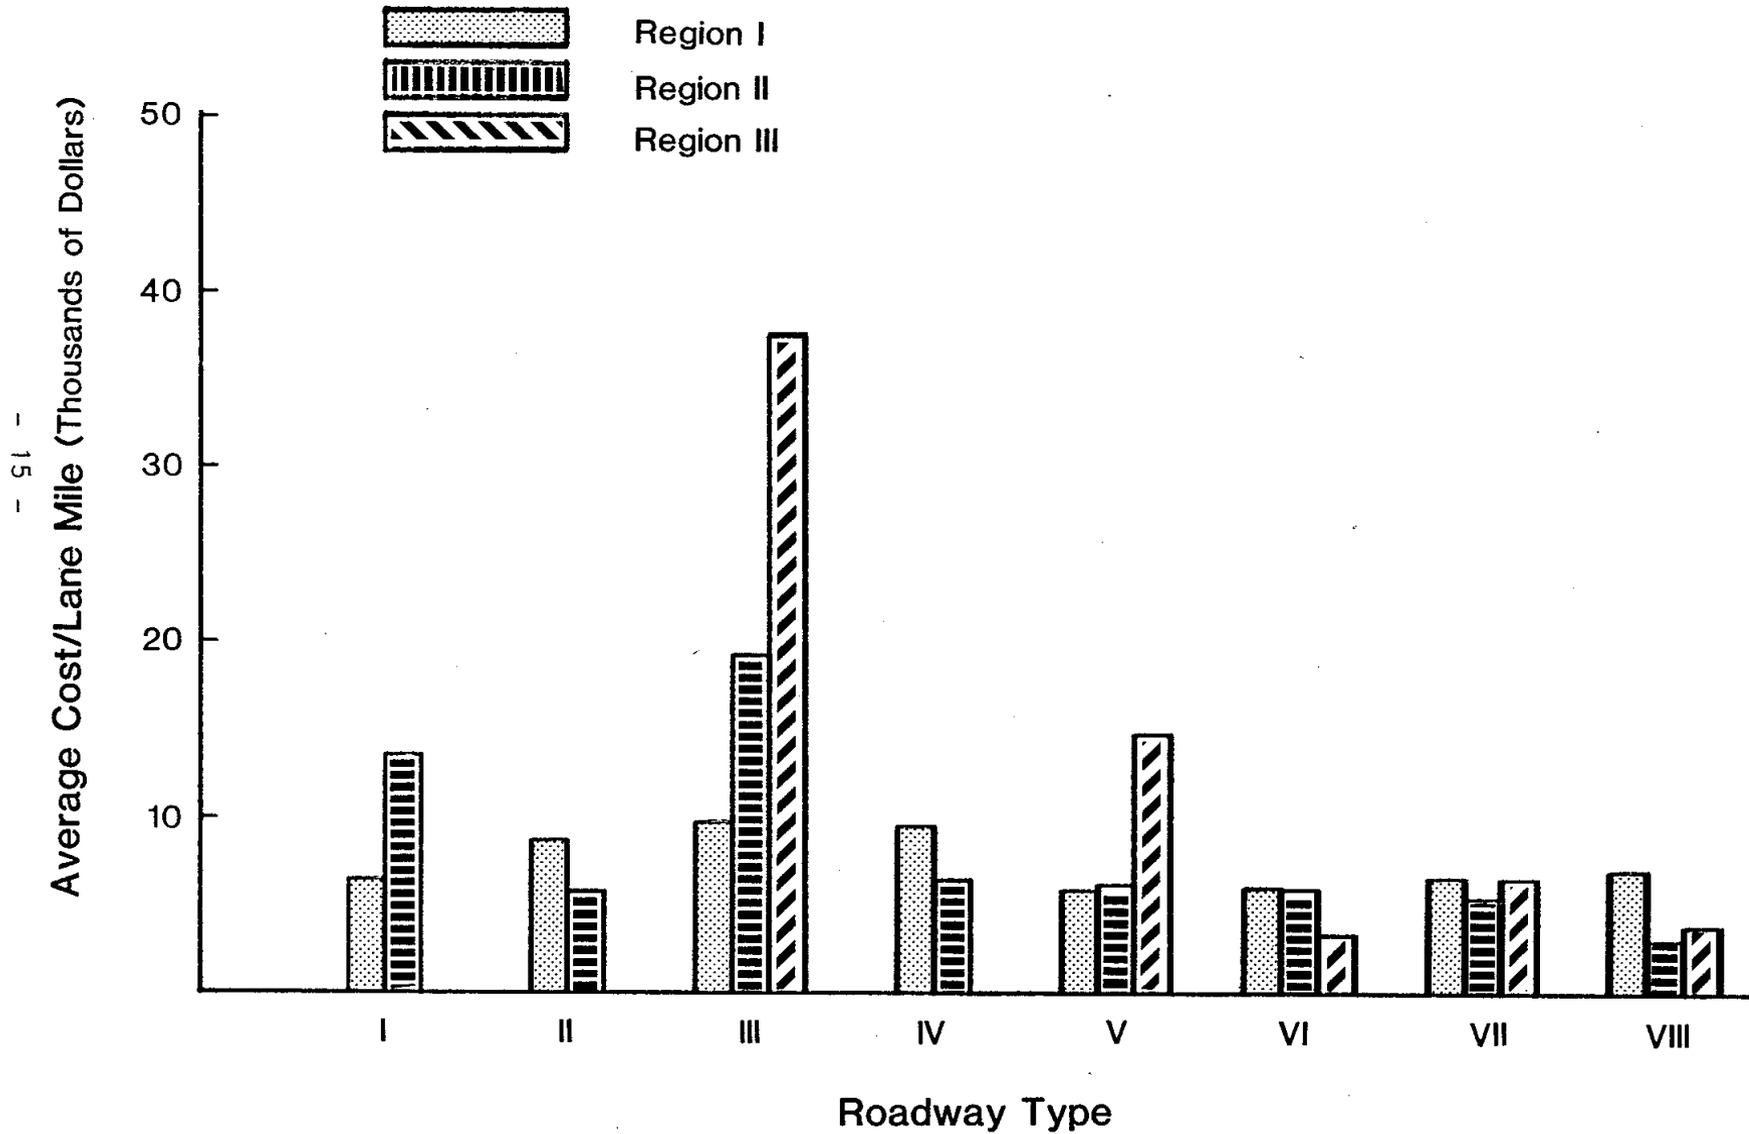

Figure 4

Comparison of Average Roadway Surface Maintenance Costs

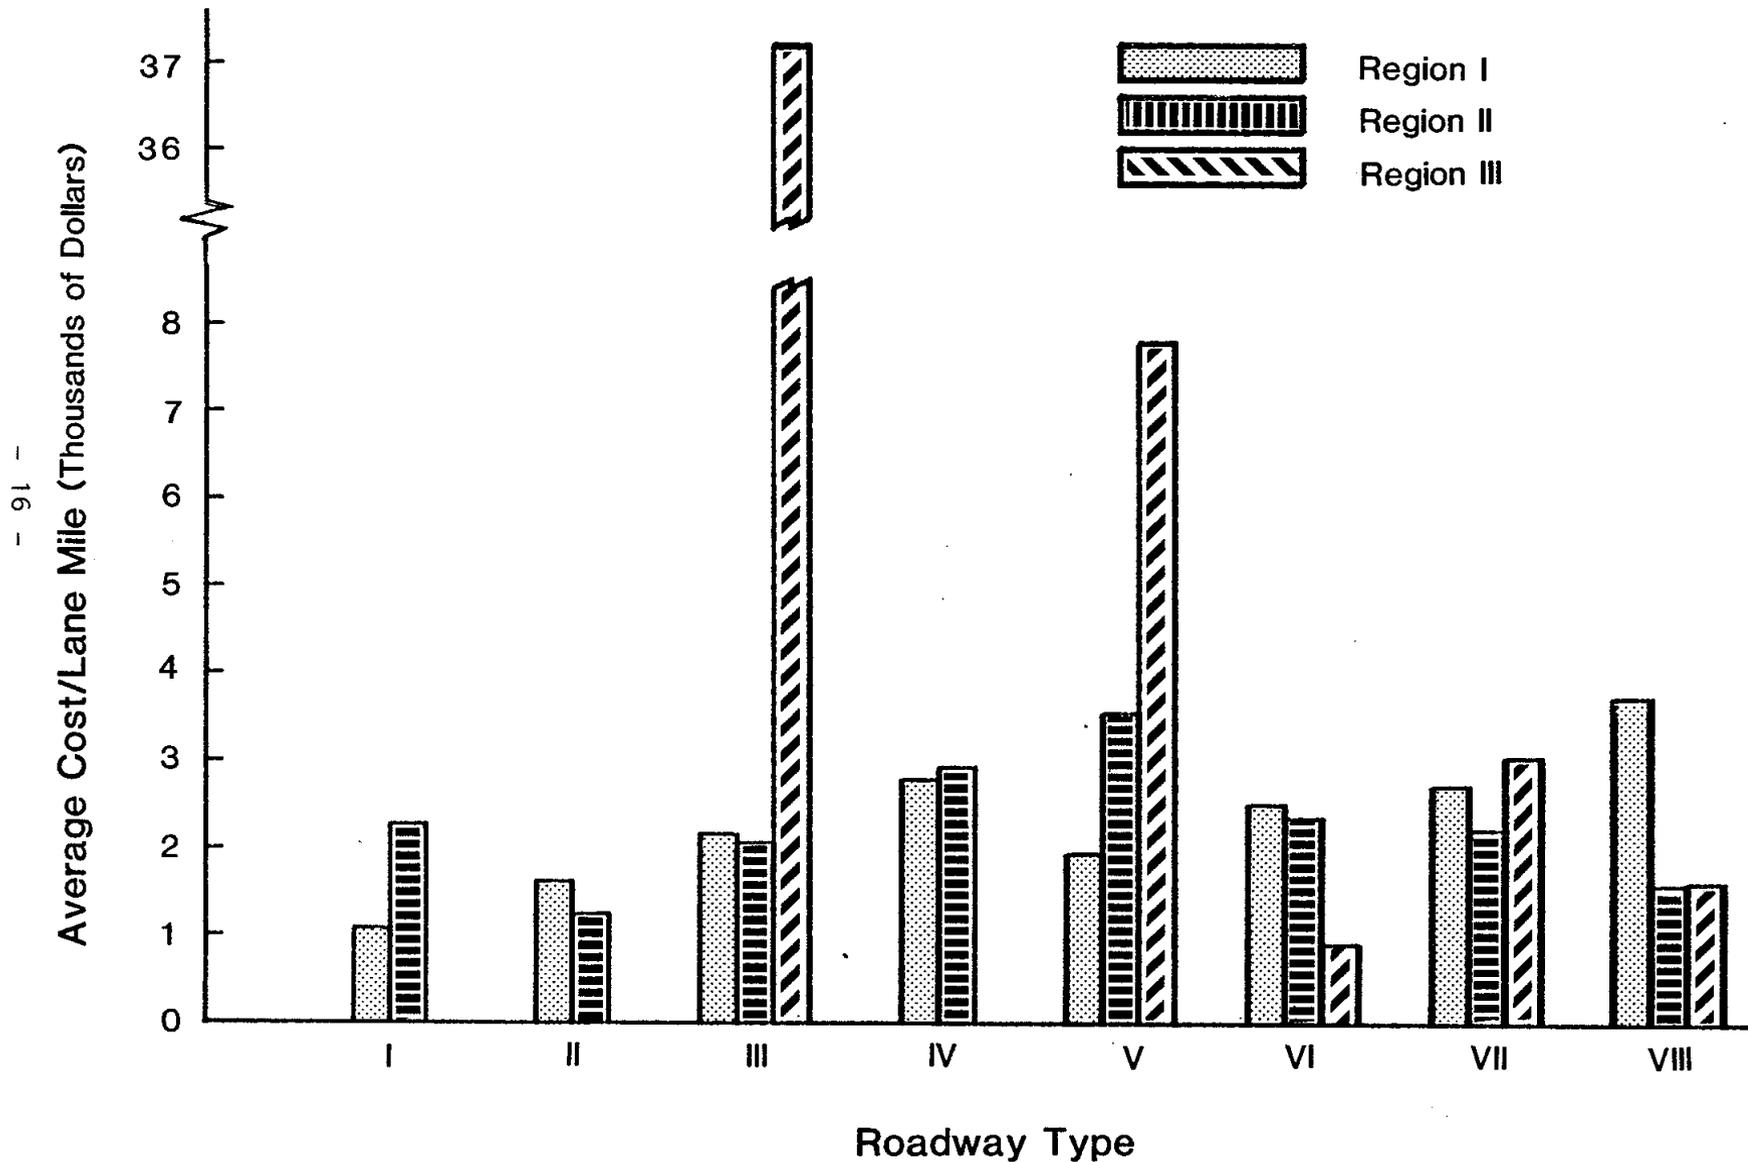

Figure 5

Comparison of Average Roadside Maintenance Costs

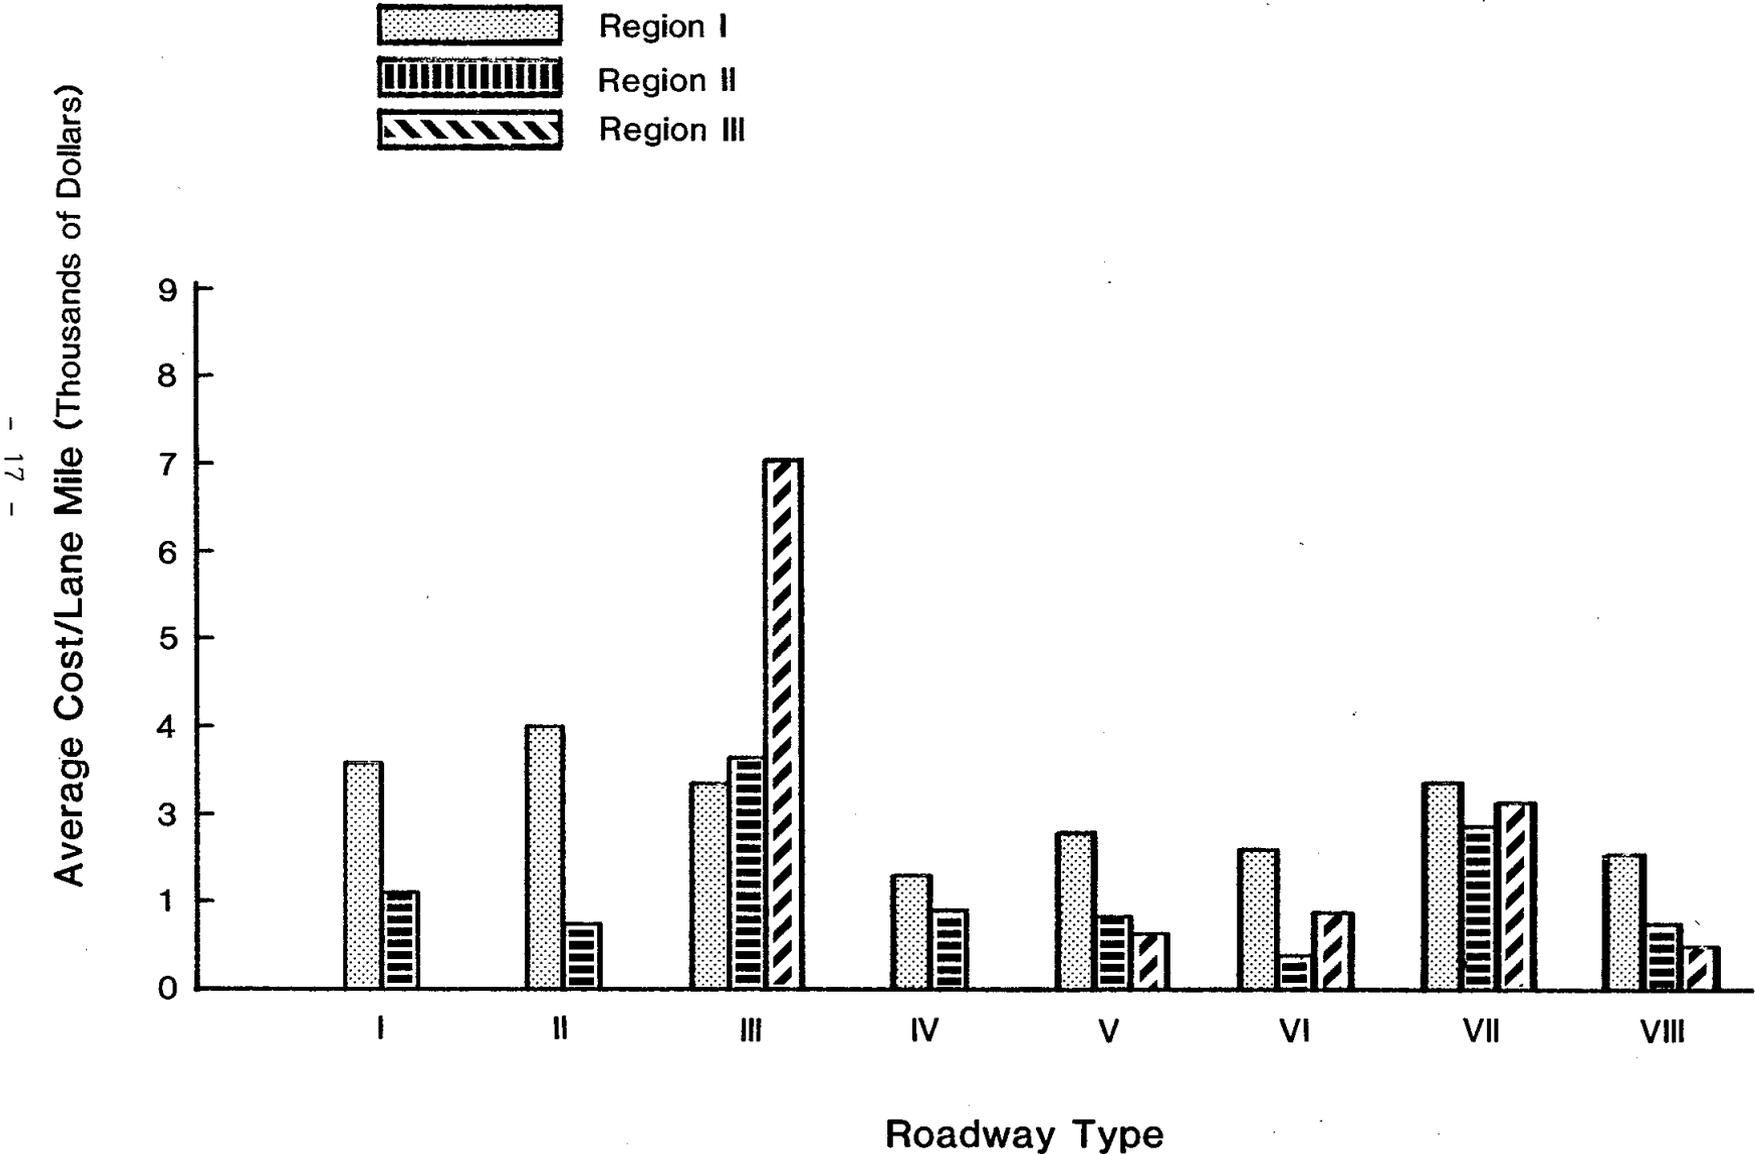

Figure 6

Comparison of Average Traffic Services Costs

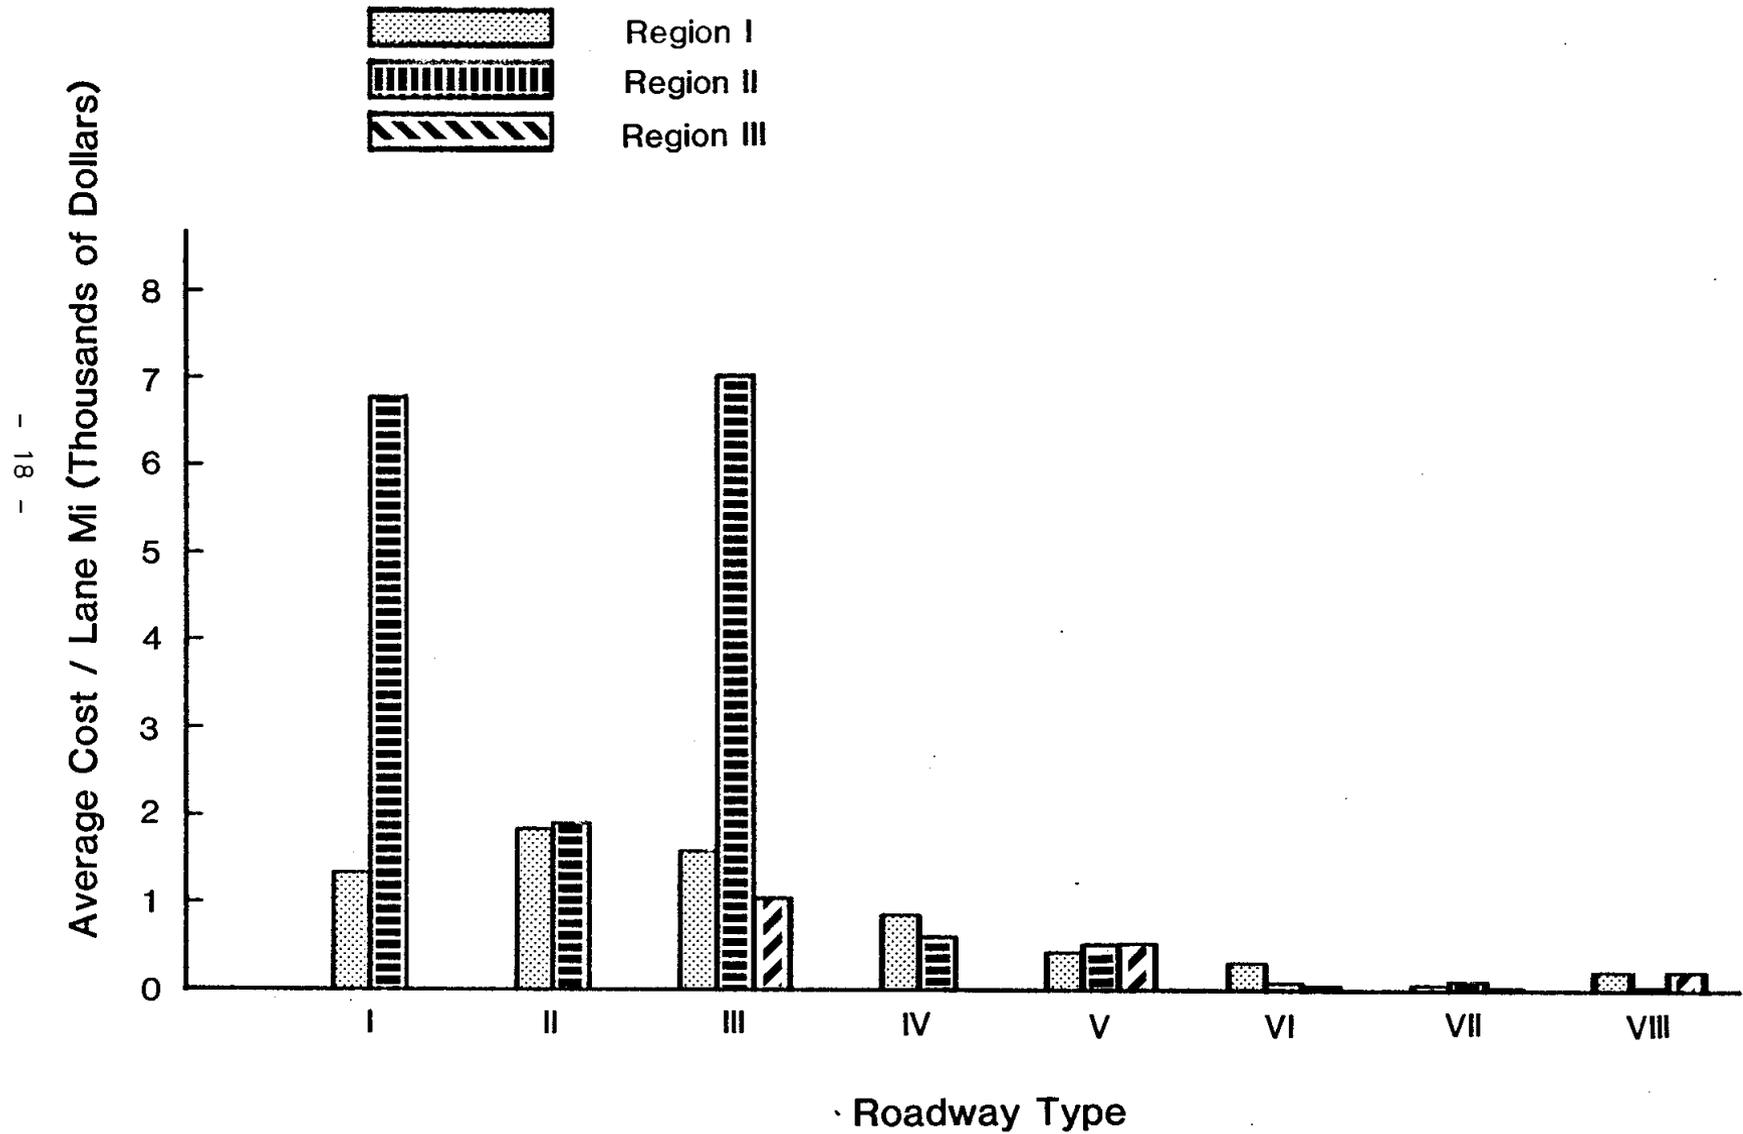

Figure 7

Comparison of Average Snow & Ice Control Costs

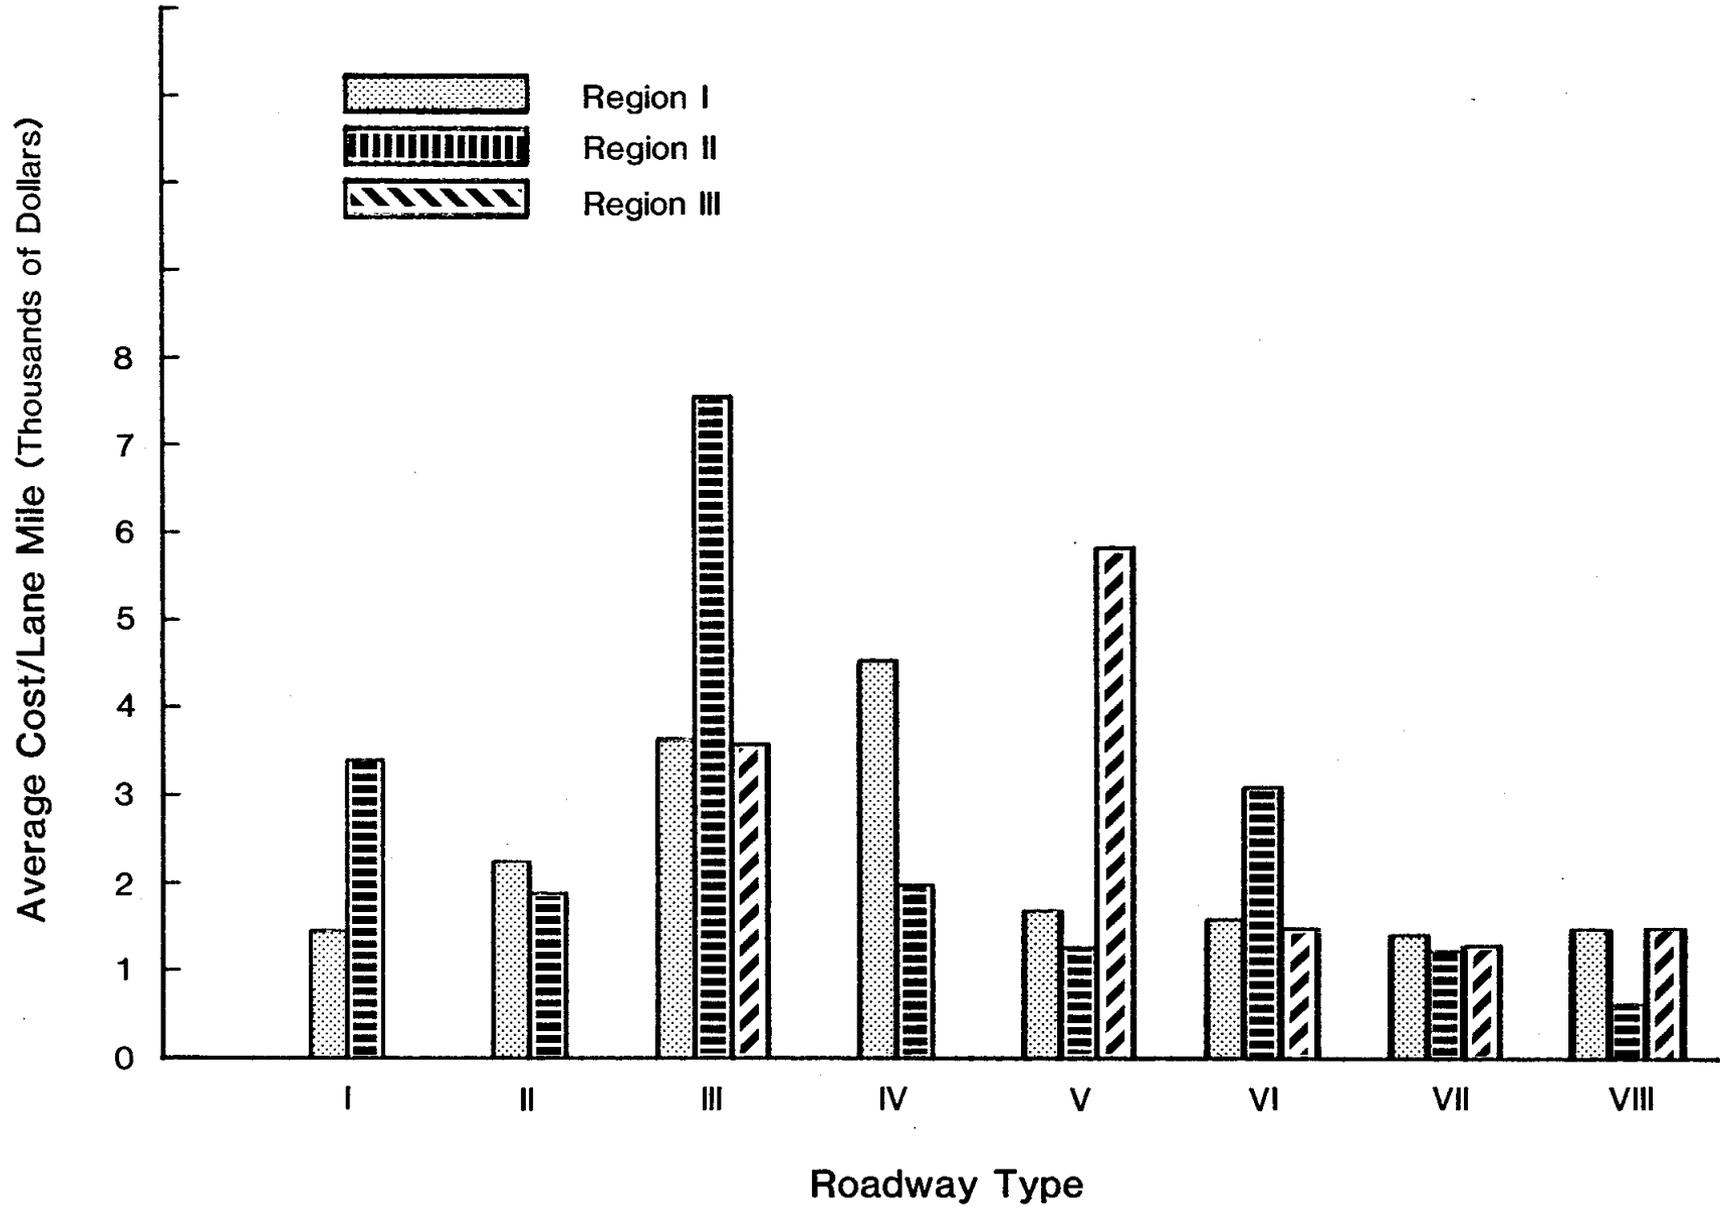

Figure 8 shows the distribution of expenditures in each region for each roadway type and simply shows the relative costs of the four types of maintenance service.

It should be noted that while the arithmetic average (mean) is useful, it can be misleading, especially when large variances in the data are involved. Figure 9 shows these variations and where the mean falls within these data. As can be seen from Figure 9, the maximum cost/lane mile for any given roadway type can be as great as 10 times the mean cost. These variations may be a function of terrain, traffic, design, construction techniques, age of the facility, etc. It is generally better to estimate the cost of maintaining a roadway type based on a similar section rather than an average cost.

By dividing the total roadway maintenance costs by the administrative and facilities maintenance costs, overhead was computed to be 31%. Since an estimated 20% of the administrative costs were aviation maintenance related, the calculations were reduced by this amount before the computation of overhead. The overhead costs were not included in the data presented unless specifically noted.
