#### **MEMORANDUM**

#### State of Alaska

**Department of Transportation & Public Facilities** Division of Program Development and Statewide Planning

TO:

John MacKinnon

**DATE**: April 24, 2020

Commissioner

**PHONE NO: (907) 465-2744** 

THRU

Ben White, Director <sup>BW</sup>

Program Development

FAX NO: (907) 465-6984

FROM: Maren Brantner STIP Manager MAB

**SUBJECT**: Recommend Approval of FAST

2019-2023 TIP Admin Mod 2

**Memo Correction** 

Enclosed for your review and approval is Administrative Modification 2 to the Fairbanks Area Surface Transportation (FAST) Planning 2019-2023 Transportation Improvement Program (TIP). The FAST Policy Board approved Administrative Modification 2 to the FAST 2019-2023 TIP on April 15, 2020.

In accordance with the agreement between FAST and the Alaska Department of Transportation and Public Facilities (DOT&PF), the Fairbanks metropolitan planning organization (MPO) coordinator and FAST Policy Board has determined Administrative Modification 2 to the FAST 2019-2023 TIP has met all the requirements of US Code Title 23, Section 134 and is fiscally constrained by the allocations made in the 2018-2021 Statewide Transportation Improvement Program (STIP). These changes are exempt from conformity and a conformity determination is not required per 40 CFR 93.104(c).

As part of the approval, we note that FAST Planning has programmed Advanced Construction funding (AC) into their TIP. The approval of this TIP does not constitute approval for the use of AC. The use of AC must be coordinated with the federal-aid section to determine available AC authority is in place.

Your approval of Administrative Modification 2 to the FAST 2019-2023 TIP is recommended and required as the statutory designee for all state transportation planning matters.

Approved:

Date:

John MacKinnon Commissioner

Subject: Transmittal of FAST Planning FFY2019-23 TIP Administrative Modification #2

Dear Mr. Anderson,

Attached for approval and inclusion in the Statewide Transportation Improvement Program (STIP) is the Fairbanks Area Surface Transportation Planning (FAST Planning) FFY2019-23 Transportation Improvement Program (TIP) Administrative Modification #2. The FAST Planning Policy Board approved this document on April 15, 2020.

Once the Commissioner's approval is received, please incorporate TIP Administrative Modification #2 into the STIP as required under 23 U.S.C. 135. Your prompt attention to this task would be greatly appreciated by FAST Planning. If you have any questions or need additional information, please contact me at <a href="mailto:jackson.fox@fastplanning.us">jackson.fox@fastplanning.us</a> or (907) 590-1618.

Sincerely,

Jackson C. Fox
Executive Director

#### INTRODUCTION

This is the Fairbanks Area Surface Transportation (FAST Planning) 2019 – 2023 Transportation Improvement Program (FFY19-23 TIP) Administrative Modification #2. This Administrative Modification was developed primarily to document minor project changes that occurred between November 2019 and April 2020, including new project numbers and need IDs, one minor scope revision, documentation of approved use of offset funding for various project phases, and updated project phase schedules and cost estimates. This Administrative Modification was reviewed at the March 4, 2020 FAST Planning Technical Committee meeting and approved at the April 15, 2020 FAST Planning Policy Board meeting. This document was not released for a 30-day public comment period; however, both meetings were open to the public for the opportunity to provide testimony. The TIP continues to be fiscally constrained, and none of the changes trigger the need for a new air quality conformity determination.

The original FFY19-23 TIP was developed in direct coordination with projects and timelines listed in the 2045 Metropolitan Transportation Plan (MTP), the long-range transportation plan for the Fairbanks and North Pole areas adopted by the FAST Planning Policy Board in December 2018.

Development of the TIP was initiated in January 2019 following development of the 2045 MTP and adoption of revised project scoring criteria and a new project nomination form. A call for project nominations was issued, and 10 project nominations were received – including seven road projects and three non-motorized projects, as summarized below:

| Road  | Projects   | Score |
|-------|--|-------|
| 1.    | 5 <sup>th</sup> Avenue Reconstruction                | 158   |
| 2.    | Lacey Street Reconstruction                          | 150   |
| 3.    | Bradway Road Reconstruction                          | 117   |
| 4.    | Peridot Street Rehabilitation                        | 107   |
| 5.    | Woll Road Resurfacing & Widening                     | 101   |
| 6.    | Roland Road Improvements                             | 100   |
| 7.    | Nelson Road Widening                                 | 90    |
| Non-r | notorized Projects                                   |       |
| 1.    | City Bike Lane Striping & Signing                    | 123   |
| 2.    | Airport West Bicycle & Pedestrian Facility           | 121   |
| 3.    | Chena Lakes/Plack Road Bicycle & Pedestrian Facility | 81    |

Due to funding limitations with carrying forward projects from the FFY17-20 TIP and eligibility concerns with some of the projects nominated, only two road projects (5th Avenue and Woll Road) and one non-motorized project (Airport West Bicycle & Pedestrian Facility) were incorporated into the Draft TIP. The Draft TIP was reviewed on February 6, 2019 by the FAST Planning Technical Committee, and approved on February 27 by the FAST Planning Policy Board for release for public review and comment. The Draft TIP was subsequently issued for public comment March 3 to April 3, and a public open house event was held on March 12. The document also included a draft Air Quality Conformity Determination, which had the same public comment period, and an Interagency Consultation on the draft determination took place on March 27. In total, 44 comments were received on the Draft TIP during the public comment period. Revisions were then made to the TIP based on comments received, new information about project schedules, and estimates prepared by the Alaska Department of Transportation & Public Facilities (DOT&PF). The final draft of the TIP was then reviewed again by the Technical Committee on April 3 and adopted by the Policy Board on April 17 without amendment.

The original TIP and Administrative Modifications #1 and #2 are fiscally constrained and were developed in conformance with 23 USC 134, 49 USC 5303, 23 CFR Part 450, sections 174 and 176 (c) and (d) of the Clean Air Act as amended (42 USC 7504, 7506 (c) and (d)), 40 CFR Part 93, Title VI of the Civil Rights Act as amended (42 2000d-1) and 49 CFR Part 21, 49 USC 5332, Section 1101(b) of the SAFETEA-LU (Pub. L 109-59 and 49 CFR part 26, 23 CFR part 230, provisions of the Americans with Disabilities Act of 1990 (42 USC 12101 *et seq.,)* 49 CFR parts 27, 37, and 38, the Older Americans Act as amended (42 USC 6101), 23 USC 324, Section 504 of the Rehabilitation Act of 1973 (29 USC 794) and 49 CFR 27 and all other applicable federal requirements for Metropolitan Planning Organizations.

#### **Air Quality Conformity**

The FFY19-23 TIP was developed in direct coordination with projects and timelines listed in the 2045 MTP for which an Air Quality Conformity Analysis was completed that found the following key determinations:

 Total regional vehicle-related PM2.5 and NOx precursor emissions associated with implementation of the 2045 MTP for the required analysis years of 2019, 2025, 2035, and 2045 have been estimated and found to be below the applicable motor vehicle emission budgets established under the Moderate State Implementation Plan.

- All CO conformity requirements are met.
- Interagency consultation was conducted in accordance with federal requirements.

The Federal Highway Administration (FHWA) and Federal Transportation Administration (FTA) reviewed the Air Quality Conformity Analysis and approved the conformity determination on January 30, 2019. Since the FFY19-23 TIP was based on the projects and timelines listed in the 2045 MTP, 40 CFR 93.122(g) permits reliance on the regional emissions analysis from the MTP. Every project in the FFY19-23 TIP was included in the 2045 MTP and associated Air Quality Conformity Analysis, with the exception of one project – Woll Road Resurfacing & Widening. This project proposes to resurface the existing roadway and widen shoulders to better accommodate bicyclists, pedestrians, and move mailboxes further away from the travel lanes, and is exempt from the requirement to determine conformity in accordance with 40 CFR 93.126 – Pavement Resurfacing and/or Rehabilitation; Widening Narrow Pavements; Shoulder Improvements; and Projects that Correct, Improve, or Eliminate a Hazardous Feature. Based on this analysis, FAST Planning finds the FFY19-23 TIP meets air quality conformity requirements.

This draft determination was issued for public comment March 3 to April 3, 2019, concurrent with the Draft FFY19-23 TIP. No public comments were received regarding air quality during the comment period. An Interagency Consultation on this analysis was also performed on March 27 with federal and the local air quality planning agencies, including the FTA, U.S. Environmental Protection Agency (EPA), Alaska Department of Environmental Conservation (ADEC), and Fairbanks North Star Borough (FNSB) during the public comment period and no issues were raised with the determination. Following approval of the FFY19-23 TIP by Alaska DOT&PF, the document will be transmitted to FHWA and FTA for their joint approval of the determination.

#### **Performance Measures**

The table on the following page summarizes the anticipated benefit of each project in the FFY19-23 TIP making progress towards achieving the performance measures included in the 2045 MTP. FAST Planning has adopted the Alaska DOT&PF's targets for each the following measures:

- Safety (Fatalities & Serious Injuries; Motorized & Non-motorized)
- Pavement & Bridge Condition
- Travel Time Reliability
- Congestion Mitigation & Air Quality (CMAQ)

For safety, FAST Planning has revised and adopted new project scoring criteria with safety considerations being the highest weighted category. This new criteria was used to score the new projects incorporated into the FFY19-23 TIP. For pavement and bridge condition, the TIP is funding many resurfacing and reconstruction projects where pavement is failing, including partnering with Alaska DOT&PF on resurfacing projects on the National Highway System through the FAST Improvement Program. For travel time reliability, the TIP includes many project that improve connectivity to provide alternate routes, widened shoulders to accommodate space for vehicles should a traffic accident occur, and resurfacing projects that reduce the amount of maintenance activities on those roads. And for CMAQ, by policy FAST Planning invests 20-percent of our federal funds on non-motorized projects to provide transportation alternatives to vehicles.

| #  | Project<br>▼  | Safety<br>• | Pavement<br>& Bridge<br>Condition | Travel Time<br>Reliability | CMAQ |
|----|---|-------------|-----------------------------------|----------------------------|------|

#### **Major Projects**

Major projects from the previous FFY17-20 TIP that were completed include Noble Street Upgrade and Birch Hill Bicycle & Pedestrian Facility. In this TIP, major projects anticipated to be completed include Cowles Street Reconstruction, Cushman Street Bridge Rehabilitation, Gillam Way Reconstruction, and Yankovich/Miller Hill Road Reconstruction projects. Two of these projects have recently experienced delays, as outlined below, and schedule adjustments were made between the FFY17-20 TIP and FFY19-23 TIP:

- Cushman Street Bridge Rehabilitation this project was delayed two years to accommodate replacement of the Wendell Avenue bridge, which is scheduled for construction over two years starting in 2020. The Wendell Avenue bridge project is GO bond funded and was recently unpaused by former Governor Walker.
- Yankovich/Miller Hill Road Reconstruction this project has been delayed two years due to ROW acquisition (numerous strip acquisitions on residential parcels) needed to widen Yankovich Road.

#### **Transportation Control Measures**

The EPA designated the Fairbanks and North Pole areas as nonattainment areas for carbon monoxide (CO) in 1991. In 1998, Fairbanks was reclassified as a "serious" nonattainment area for failing to attain the ambient eight-hour CO health standard by the December 1995 deadline. As a serious nonattainment area, Fairbanks was required to prepare a State Implementation Plan (SIP) that demonstrated attainment by December 2000. In July 2002, the EPA announced the Fairbanks serious CO nonattainment area attained air quality standards for CO by its attainment date. In July 2004, the EPA announced it approved a CO Maintenance Plan and re-designated the Fairbanks CO nonattainment area to attainment with an effective date of September 27, 2004.

A portion of the FNSB, including the entire Metropolitan Planning Area, was also designated as a nonattainment area for Particulate Matter (PM 2.5) in 2009. In November 2013, the EPA proposed a new rule, effective July 2014, that identified those states in nonattainment for PM2.5 as "moderate" areas and proposed a new due date for submittal of moderate nonattainment area SIPs to EPA. The ADEC along with the FNSB developed a SIP and associated PM2.5 emissions budgets and submitted to the EPA on December 31, 2014. The EPA later reclassified the nonattainment area from "moderate" to "serious" with an effective date of June 9, 2017. Reclassification requires an

update to the SIP to meet additional requirements that were triggered upon the reclassification. ADEC issued a Draft Serious SIP for public review and comment in May 2019. It is not known at this time what Transportation Control Measures (TCMs) will be included in the Final SIP; however, previous TCMs in the Moderate SIP included the following:

- Expanded availability of plug-ins
- Mass Transit System
- Anti-Idling & Diesel Emission Reductions
- Federal Motor Vehicle Control Program

Significant progress has been made on all of these TCMs since development of the Moderate SIP in 2014. The only remaining work to complete at this time is finishing the last of the plug-in installations at two locations in Fairbanks, both of which are anticipated to be complete by August 2019.

#### **ACRONMYMS AND DEFINITIONS**

#### **General Definitions**

AC - Advance Construction

ACC – Advance Construction Conversion

BANK - Banking

AMATS – Anchorage Metropolitan Area Transportation Solutions

*CMs* – Contingency Measures

EPA – Environmental Protection Agency

FHWA - Federal Highway Administration

FAST Act – Fixing America's Surface Transportation Act

FAST Planning - Fairbanks Area Surface Transportation Planning

FTA - Federal Transit Administration

MAP-21- Moving Ahead for Progress in the 21st Century

MPO - Metropolitan Planning Organization

M & O - Maintenance and Operations

PPP - Public Participation Plan

SAFETEA-LU - Safe, Accountable, Flexible, Efficient Transportation Equity Act - Legacy for Users

SIP – State Implementation Plan

TAP - Transportation Alternative Program

TCMs – Transportation Control Measures

TIP - Transportation Improvement Program

#### SURFACE TRANSPORTATION FUNDING SOURCES

**3PF (Third Party Funds)** – Funding contributed by parties other than the state usually to provide required matching funds.

**AC (Advance Construction)** – An innovative financing tool permitted under FHWA rules that, with approval of the FHWA, allows the state to begin a project using state funds prior to the availability of federal funds. This tool allows the state flexibility to use its resources to more efficiently schedule project start-ups.

**ACC (Advance Construction Conversion)** – Accounting tool to track the repayment of state funds used to begin a project prior to the availability of federal funds.

**AARC** – Funds available through the Alaska Railroad Corporation.

**Bank** – Funds that were banked from one year to the next under agreement with ADOT&PF.

**CMAQ (Congestion Mitigation/Air Quality)** – These funds are for projects that can be proven to reduce traffic congestion and/or improve air quality in federally designated non-attainment areas. Projects such as park and ride lots, transit bus replacement, vehicle inspection and maintenance program improvements, signal coordination, ride sharing, and paving for dust control qualify for these funds. The federal funds ratio varies and is either 90.97% or 100% depending upon the specific category of work.

**FAF (FAST Planning Appropriation Funds) and FAM (FAST Planning Appropriation Match)** — These funds are other FAST Planning funds used to supplement projects. Examples of funding sources include:

- 381 Funds made available in FY07 under SB381. CH82/06/120/18, AR60685.
- **DEOB/Offset** Federal funding, including the non-federal share, that has been de-obligated from another federal project and is now available for use on another project. This funding is shown as informational only and only after it has been approved by the proper authority for changes and overruns during construction or to bring a project up to low bid, as requested, prior to the submittal of a PDA request.
- **GF** General fund appropriation available for use on any project.
- SB46 A FY12 state fund appropriation of \$5 million available to any project in the FAST Planning TIP. CH5/11/100/8, AR65818.
- **SB160** A FY13 state fund appropriation of \$7.5 million available to any project in the FAST Planning TIP. CH17/12/132/25, AR58609.
- SB230 A FY11 state fund appropriation of \$5 million available to any project in the FAST Planning TIP. CH43/10/36/24, AR65439.

**ILLU (Illustrative)** – Indicates projects that would be funded and advanced if funding becomes available either through receipt of additional funds or because another project cannot be advanced; the specific source or sources of funds will be determined when and if the project is selected to be funded.

**NHPP (National Highway Performance Program)** – In MAP-21 Section 1106, Congress designated the NHPP to provide support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a state's asset management plan for the NHS. This funding code incorporates previous NHS, IM and some BR fund codes. The federal funds ratio is 90.97%.

**CONP** – Funds made available to the FAST Planning Coordinator's office from the City of North Pole.

**PL** – These funds are designated for the mandatory planning tasks the department undertakes, including preparation of the Statewide Transportation Plan (SWTP) and State Transportation Improvement Program (STIP), statistical measurements of the transportation system (traffic volumes, pavement condition, accident locations, causes and severity, and physical characteristics of roads and highways), mapping, and management systems. In Alaska, these metropolitan planning funds can be used in any urban area within the state. Planning processes and special planning studies are eligible activities within this program. The federal funds ratio is 90.97%.

**SM (State Match)** – The state's share of project costs required to match federal program funds. Depending on the particular federal program requirements, the state's share of the costs, the state match required, will vary from as little as zero percent to as much as 50%. Most often the state's share will range from 9.03% to 20%.

**STP (Surface Transportation Program)** – Flexible funding that may be used by the state and localities for projects on any Federal-aid highway, including the NHS, bridge projects on any public road, transit capital projects, bus terminals and facilities. Unlike other states, Alaska is allowed to use these funds on any public road in Alaska, regardless of classification. The federal funds ratio varies, typically 93.4% if spent on interstate routes or 90.97% otherwise.

TAP (Transportation Alternatives Program) – The Moving Ahead for Progress in the 21st Century Act (MAP-21) replaced the Transportation Enhancement (TE) activities with the Transportation Alternatives Program (TA), a new program, with funding derived from the NHPP, STP, HSIP, CMAQ and Metropolitan Planning programs, encompassing most activities funded under the Transportation Enhancements, Recreational Trails, and Safe Routes to School programs under SAFETEA-LU. The federal funds ratio can be 80% or 90.97%. This program of funds is found in the STIP under Need ID 30689.

**RPL (Metropolitan Planning)** – In Alaska, these funds can be used in any urban area within the state. Planning processes and special planning studies are eligible activities within this program. The federal funds ratio is 90.97%.

#### Transit and Rail Fund Codes

**5307 (Capital and Operating Funds for Urbanized Areas)** – These funds are distributed to eligible urban areas according to a federally mandated formula based on population, population density, and level of public transportation service. The eligible transit operations in Alaska for this program are in Anchorage and Fairbanks. Urban areas with populations over 200,000 (Anchorage) receive funds directly from FTA and may use their funds for capital investments. Urban areas with

populations under 200,000 (Fairbanks) may use the funds for both operations and capital projects. In each case the project selections are made by the MPO and are listed in its TIP.

**5307RR - FTA (Alaska Railroad Passenger Operations)** – A portion of Section 5307 funds, Capital and Operating Funds for Urbanized Areas specifically set aside for the Alaska Railroad for costs related to passenger operations.

5309 - FTA (Capital Program) - This program provides capital assistance for three primary activities:

- (5309BU) New and replacement buses and facilities
- (5309FG) Modernization of existing rail and ferry systems
- (5309NS) (New Starts) New fixed-guideway systems (including ferry systems)

**5311 (Non-urbanized Area Formula Program)** – This program provides funding to enhance public transportation in rural and small urban areas. It also assists in the maintenance, development, improvement, and use of public transportation systems. A component of this program is the Rural Transit Assistance Program (RTAP), which provides training and technical assistance to transit operators. The federal funds ratio is 90.97% for capital projects and project administration, and up to 56.86% for operating assistance. RTAP projects are 100% federally funded.

**5337GR (Section 5337 State of Good Repair)** – A new formula-based State of Good Repair program is FTA's first stand-alone initiative written into law that is dedicated to repairing and upgrading the nation's rail transit systems along with high-intensity motor bus systems that use high-occupancy vehicle lanes, including bus rapid transit (BRT). These funds reflect a commitment to ensuring that public transit operates safely, efficiently, reliably, and sustainably so that communities can offer balanced transportation choices that help to improve mobility, reduce congestion, and encourage economic development.

**5339 – (Bus and Bus Facilities) –** Funding for capital expenses for eligible rural public transit systems.

### FAST Planning FFY19-23 Transportation Improvement Program (TIP) Administrative Modification #2 - Summary of Changes Approved April 15, 2020

|    | Project                                     | Description   |
|----|---|---|
| 1  | College Road Bus Pullouts                   | Removed \$200k Utilities phase funding in FFY20 and added \$2.5k Utilities phase placeholder in FFY22 per DOT; removed FFY21 AC from Construction phase (slated for construction in FFY22 in latest Design Status Report); added \$10k in STP funding to ROW phase per DOT's latest estimate                  |
| 2  | Chena Riverwalk Stage III                   | Moved FFY20 Utilities phase placeholder to FFY21 per DOT and changed funding from CMAQ to STP   |
| 3  | Coordinators Office                         | Corrected FFY20-23 match amounts from calculation error   |
| 4  | Cushman Street Bridge Rehabilitation        | Moved FFY20 Design phase placeholder to FFY21   |
| 5  | FAST Improvement Program                    | Removed FFY20 Utilities phase placeholder (STP) and added \$23.5k in offset funding approved by Executive Director 01.23.20; added \$260k in offset funding to FFY20 Design phase approved by Policy Board 02.12.20; moved FFY20 ROW phase placeholder to FFY21   |
| 6  | FAST Intersection Improvement Program       | Added \$174k in offset funding to FFY20 Construction phase approved by Executive Director 02.05.20 (high bids rejected in FFY19 and funds were deobligated to be bundled with FAST Improvement Program bid package in FFY20); updated Need ID and Project Number in coordination with current design projects |
| 7  | FAST Sidewalk Improvement Program           | Added \$161k in offset funding to FFY20 Construction phase approved by Executive Director 02.04.20; updated Need ID for "Growden Area Accessibility Improvements" ATAP project  |
| 8  | McGrath Road Upgrade                        | Added \$150k in offset funding to FFY20 Utilities phase approved by Technical Committee 02.05.20  |
| 9  | Minnie Street Upgrade                       | Reduced Preliminary Engineering FFY20 Design phase from \$975k to \$880k, and reduced Final FFY22 Design phase from \$1.3 million to \$1.125 million per DOT's latest estimate; changed Project Number to "TBD"; revised TIP scope for consistency with DOT project scope                                     |
| 10 | Non-motorized Plan Update                   | Added \$37k in offset funding to FFY20 Planning phase approved by Executive Director 01.23.20   |
| 11 | North Pole Streetlight Standardization      | Removed FFY21 AC from Utilities phase (not needed unti FFY22 construction year)   |
| 12 | Old Rich Hwy Intersection Improvements      | Moved FFY20 ROW phase placeholder to FFY21, and moved FFY21 Utilities phase placeholder to FFY22  |
| 13 | Sign Replacement Stage III                  | Move FFY20 Design, ROW, and Utilities phase placeholders to FFY21 per DOT   |
| 14 | Tanana Loop & South Chandalar Intersections | Added \$45k in offset funding to FFY20 Design phase approved by Executive Director 02.21.20; added \$456.6k in offset (\$151.1k), STP (\$102.9k), & CMAQ (\$202.6k) funding to FFY20 Construction phase approved by Technical Committee 02.25.20  |
| 15 | Yankovich/Miller Hill Road Reconstruction   | Reduced Utilities phase from \$730k to \$500k per DOT's latest estimate   |

#### **Policy Board Action Items** 04.15.2020

Motion: To authorize the Executive Director to sign and send the PM2.5 Non-attainment Area CMAQ Funding Plan Letter to DOT&PF. (Welch/Edwards). None opposed. Approved.

Motion: To accept the Technical Committee's recommendation\* and accelerate Holmes Road Reconstruction Project from medium- to short-range in the MTP and TIP. (Welch/Cleworth).

\*To recommend to the Policy Board to add the "Holmes Road Reconstruction" project to the FFY19-23 TIP as an Illustrative project and change the scope of the project to include consideration of widened shoulders, separated path, sidewalks, or bike lanes.

**Amendment to Motion:** To eliminate "separated path" from the scope. (Cleworth/Matherly). Two in favor. Five opposed. (Matherly, Ward, Tomaszewski, Welch, Edwards). Motion failed.

**Vote on Original Motion:** None opposed. Approved.

**Motion:** To resubmit the BUILD Grant application for the Cowles Street Reconstruction project. (Welch/Tomaszewski). None opposed. (Matherly absent). Approved.

Motion: To approve FFY2019-23 TIP Administrative Modification #2. (Welch/Ward). None opposed. (Matherly absent). Approved.

Ryan Anderson, P.E.

Chair, Policy Board

4/16/2020

Date
