Mr. Ryan Anderson, Commissioner
Alaska Department of Transportation and Public Facilities
P.O. Box 112500
3132 Channel Drive
Juneau, AK 9981

Your letter of November 10, 2021 requested approval of Amendment 3 to the 2020 – 2023 State Transportation Improvement Program (STIP). The amendment addresses scope, funding, and scheduling issues on various projects around the state. None of the projects require air quality non-attainment conformity analysis. The STIP remains fiscally constrained.

In accordance with 23 CFR 450.218, the FHWA and FTA, based on the certification of the statewide and metropolitan transportation planning process for and within the State of Alaska, hereby find that the projects described in the STIP Amendment are based on a transportation planning process that substantially meets the requirements of 23 CFR Part 450 Subparts A, B, C; 49 U.S.C. Sections 5303-5304; and 23 U.S.C. Sections 134 and 135. Therefore, the amendment is approved.

If you have any questions concerning our joint action of this STIP amendment, please contact Ms. Kathryn Wenger, FHWA Community Planner at (907) 586-7428, or Mr. Ned Conroy, FTA Community Planner at (206) 220-4318.

Sincerely,

Sandra A. Garcia-Aline

Linda Gehrke, Regional Administrator
Federal Transit Administration, Region 10
915 2nd Avenue, Suite 3142
Seattle, WA 98174-1002

Dear Ms. Garcia-Aline and Ms. Gehrke:

Enclosed for your review and endorsement is Amendment 3 to the 2020-2023 Alaska Statewide Transportation Improvement Program (STIP). This STIP was developed in compliance with Title 23 - Section 135 and the state planning regulations (17 AAC 05.195).

Amendment 3 addresses scope, funding, and scheduling issues on various projects around the state. It includes a statement of the state funds budgeted to adequately operate and maintain the surface transportation system. None of these projects will require an update of the air quality non-attainment conformity analysis. In developing the final draft, we took into consideration all the comments we received during the public review. The comments will be available on the Department's STIP webpage. Enclosed please find a fiscal summary and a detailed funding plan. More information can be found on the Alaska Department of Transportation and Public Facilities (DOT&PF) STIP website at www.dot.alaska.gov/stip.

As specified in 23 CFR §450.218, the State certifies that the transportation planning process is being carried out in accordance with all applicable requirements of:

- (1) 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304, and this part;
- (2) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d- 1) and 49 CFR part 21;
- (3) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- (4) Section 1101(b) of the SAFETEA- LV (Pub. L. 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- (5) 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (6) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;

"Keep Alaska Moving through service and infrastructure."

- (7) Sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- (9) Section 324 of title 23 U.S.C., regarding the prohibition of discrimination based on gender; and,
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

We request your approval of Amendment 3 to the 2020-2023 Alaska STIP.

Sincerely,

A handwritten signature in black ink, appearing to read "Ryan Anderson". The signature is fluid and cursive, with a long horizontal stroke at the end.

Ryan Anderson, P.E.,
Commissioner

2020-2023 Alaska Statewide Transportation Improvement Program

Alaska Department of Transportation & Public Facilities

Division of Program Development and Statewide Planning

Introduction to the STIP

The Alaska Statewide Transportation Improvement Program (STIP) is the state's four-year program for transportation system preservation and development. Federal statutes (23 USC 135) require that in order to use federal transportation funding, the state must develop a STIP. The STIP must cover all surface transportation improvements for which partial or full federal funding is approved and that are expected to take place during the four-year duration of the STIP. Alaska's surface transportation program is mostly driven by federal funds and requirements. It includes: interstate, state and some local highways, bridges, ferries, and public transportation.

There are many projects that are not required to be in the STIP. The STIP does not include aviation projects because Federal Aviation Administration (FAA) has its own similar system of project evaluation and funds distribution. Ports and harbors projects are not included in the STIP since financial assistance for ports and harbors is provided through the state-funded Municipal Harbor Facility Grant Program. Also, it is not required for the STIP to include wholly state-funded projects, or other projects that do not require action from the U.S. Department of Transportation.

Overview

This document is the 2020-2023 STIP. It meets the requirements of Title 23 United States Code, Title 23 Code of Federal Regulations, and Title 17 of the Alaska Administrative Code. It is fiscally constrained based upon reasonably expected funding. Staff reviews projects in the STIP for consistency with local land-use and transportation plans, as well as with applicable state policies and plans including the Statewide Long Range Transportation Plan (SLRTP), the Highway Safety Improvement Plan (HSIP), the Alaska Statewide Active Transportation Plan, including regional transportation plans and others.

Projects in the STIP are consistent with, and implement, the policies of the SLRTP *Let's Keep Moving 2036: Policy Plan*. Following a risk-based analytical approach, the plan articulates policies for new facilities, modernization, system preservation, system management and operations, economic development, safety and security, livability, community and environment, and transportation system performance. It identifies action steps for each of the policy areas and identifies transportation performance measures. Plan documents include a Policy Plan, a Trends and System Analysis, and a Freight Element. The SLRTP is available on the DOT&PF website at <http://dot.alaska.gov/stwdplng/areaplans/>.

The STIP is consistent with other planning efforts including: DOT&PF's HSIP, approved regional transportation plans (components of the SLRTP), Transportation Improvement Programs (TIPs) prepared by Metropolitan

Planning Organizations (MPO) in both Anchorage and Fairbanks, municipal comprehensive plans, and tribal transportation plans. The STIP also reflects the goals of the state administration to support economic development, and seeks opportunities to link resource-rich areas to the state's highway, port, and rail systems.

STIP Revisions

STIP projects do not always proceed on schedule, so in order to maximize the state's ability to use its federal spending authority, projects not ready to advance at a critical time may yield their place in the schedule to other projects that are ready to go. Such changes require amendments to the STIP using procedures established in state and federal law and, except for minor or administrative changes, require a public notice and comment period. All revisions to the STIP have specific approval, review, and public notice requirements; all of which are reviewed, tracked, and approved by Alaska DOT&PF, Federal Highway Administration (FHWA), and Federal Transit Administration (FTA). There are three main types of STIP revisions: an amendment, an administrative modification, and an incorporation by reference.

Amendment (AMD): An amendment is a formal, publically noticed revision of the STIP required when making certain types of changes. Amendments are not complete until they are approved by FHWA and FTA. The department provides notice of a proposed amendment by publication of a notice in a newspaper of general circulation and by written notice informing MPO's, tribes, and others affected by the amendment. The notice describes the amendment and the effect of the amendment on the STIP, solicits comments, and provides for a comment period of 30 days following publication of the notice. An amendment is required when adding or removing a project from the STIP, when making changes to a project that have a significant increase or decrease in funding amount, a major change in fund scheduling, when adding a phase to a project, or when making major changes to the description and/or title of a project.

Administrative Modification (AM): An administrative modification is an informal revision of the STIP where the changes are minor and public notification is not required. An administrative modification may not affect fiscal constraint. Administrative modifications do not require FHWA or FTA approval.

Incorporation by Reference (INC): Transportation Improvement Programs (TIPs) are incorporated into the STIP by reference. Typically, the STIP will incorporate TIPs from MPOs, (see "Metropolitan Areas" below) and Federal agencies such as Western Federal Lands (WFL), and the Bureau of Indian Affairs (BIA).

Public Involvement

Federal regulation, state regulation, state statute, and department policies and procedures govern public involvement in the transportation planning process. These laws and procedures guide the consultation and coordination required with tribes, MPO's, other (non-MPO) municipalities, and communities. DOT&PF solicits and evaluates public involvement during the project nomination period, during the public review period of the Draft STIP,

and when amending an approved STIP. Interested parties may submit comments via the internet at www.dot.alaska.gov/stip or to the planners in Anchorage, Fairbanks, or Juneau. A Regional Area Planner map can be found at the STIP website.

The department updates the STIP website often, making it the best place to check the dates for online meetings and public comment opportunities. <http://www.dot.alaska.gov/stip>.

Fixing America’s Surface Transportation (FAST) Act

On December 4, 2015, President Obama signed the Fixing America’s Surface Transportation (FAST) Act (Pub. L. No. 114-94) into law – the first federal law in over a decade to provide long-term funding certainty for surface transportation infrastructure planning and investment. The FAST Act authorizes \$305 billion over federal fiscal years 2016 through 2020 for highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, research, technology, and statistics programs. As this STIP includes years beyond the Fast Act, it is assumed that available funding will continue to increase at a rate of 2% annually beyond the FAST Act years.

FFY20 FAST Act Funding for Alaska

The FAST Act maintains performance-based multimodal programs and reforms established under the Moving Ahead for Progress in the 21st Century (MAP-21) Act by focusing on safety, maintaining infrastructure condition, reducing traffic congestion, improving efficiency of the system and freight movement, protecting the environment, reducing delays in project delivery and, for the first time, providing a dedicated source of funding for freight projects.

The FAST Act provides for a predictable, long-term funding certainty for surface transportation infrastructure planning and investment through core formula programs such as:

- National Highway Performance Program (NHPP),
- Surface Transportation Block Grant Program (STBGP),
- Congestion Mitigation and Air Quality Improvement Program (CMAQ),
- Highway Safety Improvement Program (HSIP),
- Railway-Highway Crossings (set-aside from HSIP),
- Metropolitan Planning,
- National Highway Freight Program (NHFP), and the
- Ferry Boat Formula Program.

For more detailed information regarding the FAST Act, please visit the web site: <http://www.fhwa.dot.gov/fastact/>

Other Project Categories

Highway and Transit Maintenance and Operations (M&O) - After a project is completed and opened to public use, it is included in the department's routine maintenance schedule. Federal planning regulations require the STIP demonstrate that appropriate funds are available to adequately maintain and operate the surface transportation system as a whole. Most of the funds used to pay for maintenance and operations are state funds in the annual state operating budget.

Maintenance and operation forces are organized geographically into regions, with field offices in Fairbanks, Anchorage, and Juneau. The field offices manage highway maintenance stations distributed along the highway system and at key airports. Each region is staffed to adequately operate and maintain Alaska's highways. Maintenance is the responsibility of the state or local agencies that own and operate the roads and typically is not eligible for federal funding assistance, although certain types of preventive maintenance activities are eligible for federal funding.

Maintenance and operation responsibilities include all the activities to keep our state highways, bridges, airports, buildings, and harbors in good condition and safe for the traveling public. These include pavement repair, snowplowing, snow hauling, brush cutting, guardrail repair, sign maintenance, street/traffic light repair, drainage structures, fence maintenance, airport light repair, airport safety, security, and facility repairs.

Metropolitan Planning Organizations (MPOs) - Federal regulation requires that each state transportation department develop a STIP for all areas of the state outside of MPOs. For metropolitan areas, the MPOs develop their own TIPs, which are approved by the Governor or his/her delegate and are incorporated by reference into the STIP. Alaska has two MPOs: Anchorage Metropolitan Area Transportation Solutions (AMATS), and Fairbanks Area Surface Transportation (FAST). Each TIP and all amendments are incorporated by reference into the STIP and are linked to the STIP website at www.dot.alaska.gov/stip.

Public and Human Service Transportation (Transit) projects in the STIP - The Federal Transit Administration (FTA) administers several public and human services transportation grant programs that provide financial assistance to develop new transit systems and to improve, maintain, and operate existing systems. Like highway federal-aid programs, each public transportation program has different requirements intended to meet specific needs as determined by Congress. While some funds flow directly from FTA to designated recipients with the legal authority to receive and dispense federal funds, such as cities, towns, regional governments, Alaska railroad, or transit authorities, DOT&PF administers many of the grant programs in Alaska according to the specific requirements of each.

EPA Air Quality Issues and Congestion Mitigation and Air Quality (CMAQ) Projects

Alaska has air quality nonattainment areas and maintenance areas. “Nonattainment” areas are those areas that fall below air quality standards. “Maintenance areas” are those that now meet air quality standards, but need funds to maintain the improvements and programs that brought their air quality up to acceptable standards.

- Portions of Anchorage and the Fairbanks North Star Borough are classified as maintenance areas for carbon monoxide (CO).
- Juneau’s Mendenhall Valley and portions of Eagle River are currently classified as coarse particulate matter (PM-10) maintenance areas.
- A portion of the Fairbanks North Star Borough has been classified as a nonattainment area for fine particulate matter (PM-2.5).

While the air quality of Alaska cities has improved dramatically for CO and PM-10 since the early 1980s, Anchorage, Fairbanks, and Juneau are required to continue to measure air quality impacts of transportation projects under the federal Clean Air Act. These communities, with assistance from the Alaska Department of Environmental Conservation (ADEC), must periodically prepare updates to the State Implementation Plan (SIP) that demonstrates maintenance of CO and PM air quality standards.

The Clean Air Act prohibits federal actions that could cause new air quality violations or otherwise jeopardize attainment of air quality standards. This policy requires a review of all planned transportation projects in Alaska’s nonattainment and maintenance areas to ensure they will not lead to decreased air quality. This analysis, known

as “transportation conformity,” requires a demonstration that highway and transit projects are consistent with the most recently approved maintenance SIP emissions budget for CO and/or PM, now and in the future.

Metropolitan Transportation Plans (MTP) and TIP projects proposed for construction within air quality nonattainment and maintenance areas must undergo regional and project-level analysis to make sure they conform to the SIP. Regional analysis looks at the combined emission impacts of all projects in an area for each year within the TIP timeframe, an approximately twenty-year period. The regional analysis must consider all transportation projects, regardless of funding source. Project-level analysis looks at the emission impacts at the project location to ensure no new localized “hot-spot” violations of the air quality standards will result.

Air Quality Emission Caps - In nonattainment and maintenance areas air quality emission budgets are required as part of approved SIPs for communities. These approved conformity caps or air emission “budgets” cannot be exceeded in future years. Conformity is a requirement where the TIPS and MTPs are shown to not exceed the emission budgets or that projects will not cause or increase any air quality problems. Federal rules require that conformity determinations on TIPS and MTPs be updated within 18 months of any newly approved emission budget. Federal rules also require that conformity determinations on TIPS and MTPs are updated every 4 years to incorporate the latest planning assumptions, growth projections, vehicle miles travelled (VMT), and fiscal constraint. Additionally, conformity determinations are required when changes or amendments to TIPS and MTPs trigger the requirement. Limited maintenance plans, such as those for carbon monoxide in Anchorage and Fairbanks, and particulate matter (PM10) in Eagle River and Juneau, do not require the emission budget test, but they still require a conformity determination.

Rural Particulate Matter - Recent air monitoring in rural areas of Alaska indicates that some areas experience high concentrations of particulate, mostly dust. One source of the particulate matter in these communities is the road dust from the use of vehicles (cars, trucks, and four-wheelers) on unpaved roads. DOT&PF and ADEC are working together to identify possible solutions to the problem. Community outreach is underway in some areas to bring local ideas into the process:

- watering roads during dry periods,
- use of chemical additives (salts) mixed with water to alleviate dust,
- speed limits and limiting mechanized travel,
- rerouting traffic away from elder’s homes or schools (areas with sensitive people: elders and children), and
- road paving.

All control options have both advantages and disadvantages. In order to find a practical option for each area, it will likely be necessary to tailor a specific solution to that area.

Project Programming in the STIP

The STIP is made up of projects, divided into phases, scheduled according to the time estimated to accomplish each phase and the funding needed to complete it. Each funding source has different requirements or objectives, so the final selection of projects for the STIP depends on the available funding.

Multi-Phase, Phase 0 – This phase identifies programs that have multiple projects and for individual projects where the phases of work required for the improvements have yet to be defined. Examples include;

- Anchorage Metropolitan Area Transportation Solutions (AMATS) and the Fairbanks Area Surface Transportation (FAST) Community Transportation Program Allocations,
- Recreational Trails Program,
- Transportation Alternative Program,
- Pavement and Bridge Rehabilitation Program,
- Highway Safety Improvement Program, and the
- Alaska Railroad and Public Transit System Programs.

Miscellaneous/Other, Phase 9 – This phase identifies projects which do not result in physical construction. Examples of projects include bridge inspections, workforce development, safety education programs, inventory and condition surveys, information technology, and planning activities not funded directly with dedicated planning funding.

Statewide Planning and Research, Phase 8 – This phase is used for planning and research, development, and technology transfer (RD&T) activities funded with dedicated planning funding.

Design (Preliminary Engineering), Phase 2 - The design or preliminary engineering phase outlines a project and through increasingly detailed steps refines the project to develop highly specific project plans that construction contractors use to guide their work. A larger or more complex project may include a reconnaissance study to outline the issues involved, identify and analyze alternative solutions, and provide comparisons of the alternatives. Every project will entail some level of environmental review; the more complex or controversial projects may need detailed environmental impact studies, while simpler, routine projects may qualify for categorical exclusions. During the environmental review, design staff develops practicable or reasonable alternatives to the extent necessary to evaluate environmental impacts and estimate costs. Not all costs can be identified at this point, however, that will come as the project is further developed.

The design process also includes preliminary right of way and utility identification and, if needed, detailed right of way and utility phases. Some projects may warrant a project-specific public involvement plan (PIP) to inform the public and to ensure that all reasonable alternatives are identified and that public and agency concerns are considered and addressed before committing to a preferred action. Support groups such as bridge,

geotechnical/materials, hydrology, traffic, right-of-way, surveying, and utilities will also prepare specific studies, reports and design documents as needed as the project progresses.

Right of Way, Phase 3 - During the design phase the right-of-way (ROW) staff review the preliminary plans for each alternative under consideration in the environmental process. The staff prepares base maps and estimates of the probable number of parcels for each alternative and their acquisition and relocation costs. Each alternative is also assessed in terms of the number and socio-economic effects of residential and business relocations it causes. The results are included in the project's environmental document.

After the design of the project is completed and approval is given to move ahead, the ROW staff appraise the fair market value of land needed, including affected improvements, negotiate property acquisitions, relocate any displaced persons or businesses, and certify the department's ownership or land interest. They also are charged with controlling encroachments and disposing of lands no longer needed for public use.

Construction, Phase 4 - The construction phase includes all activities involved in building or altering an existing road or structure, including clearing land, demolition, excavation, moving material to establish curve and grade, drainage, fill, pavement, erection of bridges, guardrails, traffic signals, lighting, culverts, and traffic control. Depending on the project and location, it may also include temporary detours, steps to prevent or mitigate environmental problems and landscaping. Construction may take anywhere from a few days or weeks to several years to complete.

Utilities, Phase 7 - For each alternative under consideration in the design phase, the utilities engineer reviews preliminary plans that show line, grade, slope limits, and clear zone widths, and the plans are shared with the affected utility companies. The utility determines the adjustments and relocations necessary to avoid conflict with the project (which may warrant revising design plans), designs the changes to its facilities, and prepares plans and cost estimates to support the relocation agreement. In some cases, DOT&PF or a consultant performs the utility relocation design for relocation work to be included in the contract. The utilities engineer will verify adjustments or relocations necessary for each alternative and rough cost estimates. If additional right-of-way is necessary to accommodate utility relocation, these requirements will be shared with the ROW section for inclusion into the ROW cost estimates. After the design is completed and the project is approved to proceed, utility relocations may begin. Relocation may be performed by the utility company, by a contractor managed by utility or the department, or as part of the department's highway contract.

Each of these phases may involve anywhere from a few months to many years to complete. Some projects require all of these phases, while others may need only design and construction phases. In addition, depending on the complexity of the project, each phase may consist of a number of intermediate stages. The life of a project, from identification to completion may range from a few months (rare) to many years.

Transportation Performance Management and Performance Based Planning and Programming (TPM and PBPP)

Transportation Performance Management (TPM) is a strategic approach that uses system information to make investment and policy decisions to achieve national performance goals.

In short, Transportation Performance Management:

- Is systematically applied, a regular ongoing process.
- Provides key information to help decision makers allowing them to understand the consequences of investment decisions across transportation assets or modes.
- Improves communications between decision makers, stakeholders and the traveling public.
- Ensures targets and measures are developed in cooperative partnerships and based on data and objective information.

When implemented effectively, performance management can improve project and program delivery, inform investment decisions, focus staff on leadership priorities, and provide greater transparency and accountability.

Federal Regulations

The Federal Transportation Acts, MAP-21 and the FAST, set forth seven national goals for the Federal-aid highway program (23 USC 150 (b)) and identified seven performance measure areas.

The national goals outlined in 23 USC 150 (b) are:

- (1) Safety: To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
- (2) Infrastructure condition: To maintain the highway infrastructure asset system in a state of good repair.
- (3) Congestion reduction: To achieve a significant reduction in congestion on the National Highway System.
- (4) System reliability: To improve the efficiency of the surface transportation system.
- (5) Freight movement and economic vitality: To improve the National Highway Freight Network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.
- (6) Environmental sustainability: To enhance the performance of the transportation system while protecting and enhancing the natural environment.
- (7) Reduced project delivery delays: To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

The performance measure areas outlined in 23 USC 150(c) are:

- (1) Pavement condition on the Interstate System and on remainder of the National Highway System
- (2) Performance of the Interstate System and the remainder of the NHS

- (3) Bridge condition on the NHS
- (4) Fatalities and serious injuries – both number and rate per vehicle mile traveled – on all public roads
- (5) Traffic Congestion
- (6) On-road mobile source emissions
- (7) Freight movement on the Interstate System

DOT&PF Performance Management

Per 23 USC 150 (d) the DOT&PF has set performance targets in support of national performance measures. The DOT&PF collaborated with Metropolitan Planning Organizations (MPOs) and other stakeholders to finalize targets. All targets have been sent to FHWA. With the exception of the safety and on-road mobile source emissions, performance measure and targets are focused on the National Highway System.

This 2020-2023 STIP helps to implement the Alaska Long Range Transportation Policy Plan and the Transportation Asset Management Plan. This STIP includes projects that will help Alaska meet performance targets and make progress toward national goals and performance measures. These include a variety of projects focused on improving pavements, rehabilitating or replacing deficient bridges, and reducing fatalities and injuries.

Alaska DOT&PF is actively working toward linking plans and programs with a performance based planning and programming approach. Below is a description of current project selection processes that are in place for the National Highway Performance Program, National Highway Freight Program, Highway Safety Improvement Program, Congestion Mitigation and Air Quality Program and Alaska Community Transit Program. These are the programs that have the most impact on performance measure and target attainment; therefore, project selection processes for these programs should prioritize projects which will help the State to meet performance targets. There are other projects and programs that may minimally contribute. For example, the Community Transportation Program (funded with Surface Transportation Program funding) funds road improvements for non-NHS roads, but often provide safety improvements that help the state to meet safety targets.

National Highway Performance Program

Preliminary criteria have been developed for ranking projects using a performance-based planning approach. The following criteria were established: safety, pavement condition, bridge condition, traffic (AADT), and unique benefits. The NHS projects in the STIP have been through the ranking process as a trial; however, most projects were already initiated and the ranking did not drive individual project selection and programming. The ranking process is now being applied to all new projects starts.

The process is still in the beginning stages leaving room for improvement, especially regarding data collection and comparison of disparate project data, including project cost, readiness, geographic factors, and other unknown factors. Additional research and work is necessary to refine the process. Recently, a research project has begun to

evaluate the current criteria and process used, using a prominent research firm and a Technical Advisory Committee to guide and assist with the process. While the ranking process is not yet fully developed and implemented, the NHPP projects in this STIP are anticipated to help the state meet targets by addressing safety concerns, deficient bridges, and poor pavement conditions. Alaska is currently meeting and on track to continue to meet targets for the National Highway System.

National Highway Freight Program

Alaska has developed a Statewide Freight Plan consistent with federal guidance as specified in the Fixing America's Surface Transportation (FAST) Act. The FAST Act calls for State Freight Plans to identify the intended use of National Highway Freight Program funds; the LRTP does not contain projects, so this information is presented in separate Freight Investment Element Implementation Guidance. This document can be found at http://dot.alaska.gov/stwdplng/areaplans/modal_system/freightplan.shtml.

A list of potential NHFP projects was developed by Alaska DOT&PF, which requested input (through the Plan's Freight Working Group) from a diverse range of stakeholder including AMATS, FAST, the Alaska Railroad Corporation (ARRC), Fairbanks International Airport, Ted Stevens Anchorage International Airport, and the Port of Anchorage. While only a limited number of these projects can be funded through the NHFP, it is important to recognize the full list of opportunities, many of which may be advanced through other means. The "long list" of projects was reviewed with the proposing agencies. Based on their input, and on Alaska DOT&PF's goal of balancing investments across geographies, modes, and freight activities to address the needs and opportunities identified in the LRTP Freight Element, a plan for utilizing Alaska's NHFP funds was developed.

Congestion Mitigation and Air Quality Improvement Program

CMAQ projects are chosen using emissions data and other congestion and traffic and emission modeling tools. Projects which will reduce mobile source emissions with quantitative results, especially in nonattainment areas, rank highest. Many projects can be hard to rank, due to difficulty in measuring emission reductions relative to project improvements.

Highway Safety Improvement Program

Regional Traffic and Safety Engineers in Alaska's three regions (Northern, Central, and Southcoast) screen crash data and consider other information to identify projects. Projects can be either ranked or non-ranked. Ranked projects are implemented at locations with high crash history and are ranked by analyzing the benefit cost of specific safety-related improvements using estimated crash reduction factors and improvement costs. Non-ranked projects are implemented at locations with potential for severe crashes identified in State Highway Safety Program (SHSP) strategies and may be spot or system-wide improvements. System-wide, or systemic, improvement projects are implemented to reduce potential for fatal and serious injuries by mitigating road conditions or characteristics associated with specific crash types.

The regions conduct follow-up studies to determine the effectiveness of completed projects. HQ Traffic and Safety summarizes the overall effectiveness of the statewide program in the annual HSIP Report. The HSIP Handbook provides additional detail: http://dot.alaska.gov/stwddes/dcstraffic/pop_hsip.shtml

Alaska Community Transit Program

Alaska's goals and objectives for rural transit systems are:

Goal 1: Reduce the number of vehicles that have passed their ULB life by 3% annually.

- Prioritize the replacement of vehicles that have passed their ULB.

Goal 2: Reduce the number of vehicles not in a SGR by 3% by 2020.

- Dispose of vehicles that pose an irreparable unacceptable safety risk or provide the necessary repairs and/or refurbishment to place the vehicles back in SGR status.

Grant applications for the purchase of transit vehicles and facilities are accepted by DOT&PF annually. The following are considered when prioritizing investments:

- Availability of match funds
- Replacement capital takes precedent over expansion capital
- Location of the public transit system. Buses are more difficult to maintain in rural and landlocked areas. In addition, it takes longer for delivery of a vehicle, as much as 9 to 12 additional months
- Vehicle minimum age standard is met or exceeded
- Vehicle minimum mileage standard has been met or exceeded
- Potential of refurbishment
- Spare ratio

The Federal Transit Administration (FTA) also accepts applications twice a year. Once for Bus and Bus Facilities and the second time for Low or No Emission Vehicles. These applications are considered discretionary and scored by FTA.

The STIP Website

www.dot.alaska.gov/stip is where you will find the most current information on the STIP and the projects planned for your area.

STIP and Project Reporting Tools

There are several ways to view the current approved STIP and historical STIP documents, all of which are linked to the main STIP website. The official version of the STIP is the PDF version linked to the main site and the most recently approved on the revision summary table. The official version will be a complete packet including contact information, this introduction, project pages, and other relevant information located in the appendices at the end.

Every time the STIP is updated, the details will be added to the revision table along with a link to the approved STIP associated with that revision.

The live search (<http://www.dot.state.ak.us/stwdplng/cip/stip/search.shtml>) allows users to select STIP project information based on filters they choose. If no filters are chosen, all projects in the STIP will be listed. Using this tool, a user can get a custom list of STIP projects, choose how they are sorted, and decide whether they want a report in Excel or HTML format. It is also possible to search the STIP by program, such as all project that have been awarded through the Community Transportation Program (CTP), or all NHS program projects. If you query a programmatic Need ID, and select "Show IRIS Projects", the individual projects under that program will be identified, and include the status, and project manager. If a user is interested in projects receiving a specific funding type, using the fund class search a report can be generated to show all projects that have the selected funding, such as safety or Surface Transportation Program (STP) funds. You may also search all active Statewide Projects, including state funded projects at <http://dot.alaska.gov/projects-status/>. As always, you can also contact area planners with any specific program questions and they will be happy to provide detailed information. Contact information is provided in the STIP introduction and on the STIP website.

If you have trouble accessing information, or want to report an issue, please contact the STIP office for assistance.

Alaska Statewide Transportation Improvement Program

Procedures for Revisions

Introduction

The purpose of the State Transportation Improvement Program (STIP) Manual is to set forth definitions and procedures to be used for processing revisions to the Statewide Transportation Improvement Program (STIP) and the process to incorporate Metropolitan Planning Organizations (MPOs) Transportation Improvement Programs (TIPs).

Agencies involved in this process include DOT&PF, the MPOs, the Federal Highway Administration (FHWA), and the Federal Transit Administration (FTA). Alaska has two MPOs: the Anchorage Metropolitan Area Transportation Solutions (AMATS) and Fairbanks Area Surface Transportation Planning (FAST).

Transportation Improvement Programs (TIPs) developed by Metropolitan Planning Organizations (MPOs) are incorporated into the STIP. If the MPOs have definitions outlined within their operating agreements or procedures for TIP administrative modifications and amendments that are in accordance with the provisions of 23 CFR 450, then those definitions may be used. If amendment and administrative modifications definitions are not included, or not in accordance with 23 CFR 450, then the definitions below shall apply to MPO TIPs.

Concerning the TIP, the procedures section of this document covers the procedures only for incorporation of the TIP into the STIP. The MPOs have independent procedures established for the development of the TIP and TIP revisions, including public and committee reviews.

The following criteria have been developed for processing administrative modifications and amendments to the STIP/TIP in accordance with the provisions of 23 CFR 450.

Definitions

Administrative Modification: Per 23 CFR 450.104, **Administrative modification** means a minor revision to a long-range statewide or metropolitan transportation plan, Transportation Improvement Program (TIP), or Statewide Transportation Improvement Program (STIP) that includes minor changes to project/project phase costs, minor changes to funding sources of previously included projects, and minor changes to project/project phase initiation dates. An administrative modification is a revision that does not require public review and comment, a redemonstration of fiscal constraint, or a conformity determination (in nonattainment and maintenance areas).

Administrative modifications are minor revisions to the STIP/TIP. This type of change does not require public review, demonstration of fiscal constraint, or FHWA/FTA approval. Changes may include:

- Increases to funding amounts of a project or phase of a project where the increase is greater than 10% of the total project cost and within the financial thresholds identified below:
 - The total project cost* as indicated in the approved STIP/TIP is less than \$3 million; an administrative modification shall be used for an increase in cost between 10% and 50% of the total project cost or \$1 million, whichever is less.
 - The total project cost as indicated in the approved STIP/TIP is greater than \$3 million but less than \$10 million; an administrative modification shall be used for an increase in cost between 10% and 30% of the total project cost.
 - The total project cost as indicated in the approved STIP/TIP is greater than \$10 million; an administrative modification shall be used for an increase in cost between 10% and 20% of the total project cost.

*Total programmed amount in the approved STIP to complete all phases of a project. It includes all sources of funds associated with the project (federal, state, local, match, etc.).

Table 1

Total project cost* of all phases within approved STIP	Administrative Modification	Amendment
Total project cost < \$3,000,000	10% < cost increase ≤ 50% or < \$1,000,000 <i>whichever is less</i>	Cost increase > 50% or > \$1,000,000 <i>whichever is less</i>
\$3,000,000 ≤ total project cost < \$10,000,000	10% < cost increase ≤ 30%	Cost increase > 30%
Total project cost ≥ \$10,000,000	10% < cost increase ≤ 20%	Cost increase > 20%

**Total programmed amount in the approved STIP to complete all phases of a project. It includes all sources of funds associated with the project (federal, state, local, match, etc.).*

- Revisions to a project scope that do not:
 - Result in an air quality conformity reevaluation,
 - Result in a revised total project cost estimate that exceeds the financial thresholds established in this section, or
 - Result in a change in scope on any federally funded project that is significant enough to constitute a new project.

- Shifts project funding between projects, subject to the financial thresholds established in Table 1 of this MOU.
- Splitting up a single project or combining multiple projects.
- Adds a right-of-way phase to a project for incidental right-of-way work that does not exceed the financial thresholds established in this section.
- Adds a utility phase to a project for incidental utility work that does not exceed the financial thresholds established in this section.

Amendment: Per 23 CFR 450.104, **Amendment** means a revision to a long-range statewide or metropolitan transportation plan, TIP, or STIP that involves a major change to a project included in a metropolitan transportation plan, TIP, or STIP, including the addition or deletion of a project or a major change in project cost, project/project phase initiation dates, or a major change in design concept or design scope (e.g., changing project termini or the number of through traffic lanes or changing the number of stations in the case of fixed guideway transit projects). Changes to projects that are included only for illustrative purposes do not require an amendment. An amendment is a revision that requires public review and comment and a redemonstration of fiscal constraint. If an amendment involves non-exempt projects in nonattainment and maintenance areas, a conformity determination is required.

Amendments are major changes to the STIP that require federal approval, public review, demonstration of fiscal constraint, or an air quality conformity. An amendment is a modification to the STIP that:

- Affects air quality conformity regardless of the cost of the project or the funding source.
- Requires an Air Quality Conformity Evaluation.
- Changes a project cost to a level greater than the financial thresholds established in section 2.1 and Table 1 of this MOU.
- Adds or deletes a project phase other than a right-of-way or utility phase as established in section 2.1 of this MOU.
- Adds federal funds to a project currently without any federal funds.
- Changes in scope of a project that alters the original project intent.
- Adds or deletes a project. Exceptions are made for emergency repair projects established below in section 2.3 of this MOU.
- Incorporating a TIP or TIP amendment into the STIP is considered a STIP amendment and will follow the procedures listed below.

Updates that Do Not Require a STIP Change: The DOT&PF, FHWA, and FTA recognize that some revisions to the STIP require neither an amendment nor an administrative modification. These revisions do not require a formal STIP change and may be subsequently reflected in later updates to the STIP. This list identifies several revisions that do not require a formal STIP change, but it may not be an exhaustive list.

- Increases to funding amounts of a project or phase of a project where the increase is less than 10% of the total project cost.
- Any technical correction and other minor changes such as change in title, project description, implementing agency, or project sponsor.
- Moving existing programmed amounts between phases or years.
- Any changes to projects that are not required to be in the STIP/TIP such as emergency, safety, planning projects, or non-regionally significant projects that do not include federal funding.
- Advances a project schedule in the approved STIP/TIP in lieu of another project.
- Changes the federal funding category (apportionment) programmed for a phase or a project, as this is a funds management action.
- Adds a project for emergency repairs to roadways or bridges, except those involving substantial, functional, location, or capacity changes.
- Funding adjustments to award contracts.

Procedures

Approval of STIP Administrative Modifications

- Administrative modifications will be incorporated into the STIP and no federal action will be required. Approval will be through a memorandum signed by the DOT&PF Statewide Program Development and Planning Director.
- Administrative modification memorandums will be posted to the website and forwarded to FHWA and FTA for their records.
- DOT&PF will update the STIP to include these modifications periodically as full amendments or STIP updates are processed.

Approval of STIP Amendments

- Amendments to the STIP will be developed in accordance with provisions of 23 CFR 450.
- DOT&PF will send draft amendments to FHWA and FTA for review at time of public review.
- FHWA and FTA will provide DOT&PF with any comments during the public review period or within one week of the completion of the public review period.
- Upon approval by the Commissioner, amendment approval requests will be submitted by DOT&PF to FHWA and FTA. The amendment approval request will include a description of the changes, a fiscal constraint analysis, and a certification letter per 23 CFR 450.218.
- FHWA and FTA will strive to approve STIP amendments within two weeks of receipt of the request for approval. Amendments which cannot be approved will be returned to DOT&PF within two weeks, with a clear explanation of what actions can be taken so that the amendment can be approved.

- Upon approval, FHWA and FTA will issue a joint, written response notifying Alaska DOT&PF of their decision.
- Amendments that contain projects specific to only one agency (FHWA or FTA) may be approved on behalf of both agencies by the appropriate agency, with a copy of the approval provided to the other agency.
- Amendments that contain both transit and highway projects and amendments that trigger an Air Quality Conformity Determination require joint approval from both FHWA and FTA. In these cases, the procedures for STIP approval and Air Quality Conformity Determinations will be followed.
- Once approved by FHWA and FTA, the amendment will be incorporated into the STIP.

Incorporation of MPO TIP Administrative Modification into the STIP

- MPO TIP administrative modifications will be submitted to Alaska DOT&PF Statewide Program Development and Planning.
- MPO TIP administrative modifications will be approved through a memorandum signed by the Commissioner of DOT&PF, the statutory designee for all state transportation planning matters.
- Administrative modification memorandums will be posted to the website and forwarded to FHWA and FTA for their records. This action constitutes the incorporation by reference of the TIP revision into the STIP.

Incorporation of MPO TIPs and TIP Amendments into the STIP

- MPO TIPs and TIP amendments will be submitted to DOT&PF Statewide Program Development and Planning.
- Upon approval by the Commissioner, MPO TIPs and TIP amendments will be submitted by DOT&PF to FHWA and FTA with a request for approval to incorporate the amendment into the STIP. The request will include a description of the changes, a fiscal constraint analysis, and a certification letter per 23 CFR 450.330.
- The requirements for public review will be satisfied by the MPO TIP public review period.
- Upon approval, FHWA and FTA will issue a joint, written response notifying DOT&PF of their decision.
- TIP amendments that contain projects specific to only one agency (FHWA or FTA) may be approved on behalf of both agencies by the appropriate agency, with a copy of the approval provided to the other agency.
- TIP amendments that contain both transit and highway projects and amendments that trigger an Air Quality Conformity Determination require joint approval from both FHWA and FTA. In these cases, the procedures for Air Quality Conformity Determinations will be followed.
- TIP amendment approval letters will be posted to the website. This action constitutes the incorporation by reference of the TIP revision into the STIP.

Dispute Resolution

If a question arises on the interpretation of the definition of an administrative modification or amendment, DOT&PF, FHWA, and FTA will consult with each other to resolve the question. If after consultation, the parties disagree on the definition of what constitutes an administrative modification or amendment, the final decision rests with FHWA for federal-aid highway funded projects and FTA for community and public transit funded projects.

Other TIPs Incorporated by Reference

Planning organizations that receive federal funding for transportation projects in Alaska and that have their own federally-required TIPs must also be incorporated into the STIP by reference. These TIPs are not displayed in full in the STIP, but links to these TIPs can be found on the STIP Incorporation website.

Northern Region Projects

The projects in this section are grouped alphabetically by place name then numerically by need ID number. If you have questions about projects in this section, please contact the Northern

Title: Fairbanks Air Quality Planning Project

Region: Northern

Place Name: Fairbanks

Project Description: The goal of this project is to update the local transportation model and EPA mobile source emission model. Fairbanks is a newly designated PM 2.5 non-attainment area and also a CO Maintenance area. An up to date transportation model and EPA mobile source emission model are needed for on-going transportation and air quality planning activities in the community. This project will provide funding to conduct federally mandated Air Quality Conformity Analysis for all long range and short term planning documentation.

Title: Central Region ADA Compliance Project

Region: Central

Place Name: Various

Project Description: This project will provide ADA improvements along State owned and operated routes in the Central Region. Initial phase includes auditing State roads to determine ADA compliance and identify those issues that can be quickly resolved. Prioritization and construction of needed ADA improvements will be identified per audit.

Title: Hermon Road Upgrade and Extension

Region: Central

Place Name: Wasilla

Project Description: Project will extend and upgrade Hermon Road from the Parks Highway frontage road (Sun Mountain Avenue) to the Palmer-Wasilla Highway, approximately 0.80 miles. Improvements will include travel and turn lanes, shoulders, pedestrian and bicycle facilities, drainage and safety items along with a new traffic signal at the Palmer-Wasilla Highway intersection.

Title: Redoubt Avenue and Smith Way Rehabilitation

Region: Central

Place Name: Soldotna

Project Description: Project will repave and improve part of Redoubt Ave, a Soldotna owned road, continuing to where it becomes Smith Way, a State owned road, at Sterling Hwy. This is primarily an asset management project. Project will rehabilitate sidewalks and bring into ADA compliance. This roadway provides an important bypass to the busy intersection of Kenai Spur Highway (NHPP) and Sterling Highway (Interstate). For travelers going south from Kenai or east from Soldotna this could be an important alternative when the intersection at Sterling Highway is compromised by traffic, crashes and emergency events.

Title: Napakiak Multi-Modal Study
Region: Central
Place Name: Napakiak

Project Description: A multi-modal study to evaluate the public transportation options for the village of Napakiak. The community is seeking to relocate due to accelerating coastal erosion. The study will focus on construction of a road between Napakiak to Bethel and relocation of the community's airport. Results from the study would identify potential road alignments, potential airport locations, and provide high level costs estimates for construction and annual maintenance for both modes. A new community site must be formally selected before the study can begin

Need ID: 6447

Title: Bridge and Tunnel Inventory, Inspection, Monitoring, Preservation, Rehab and Replacement Program

Region: Headquarters

Place Name: Statewide

Project Description: Inspection of all bridges and tunnels on public roads on a two-year cycle. The magnitude of structural deficiencies found during the inspection causes the subject bridge or tunnel to be eligible for preservation, rehabilitation or replacement with federal highway bridge program funding. Project also includes inspection of DOT-owned miscellaneous or ancillary structures on or adjacent to public roads, such as high tower structures, bridges less than 20' long and culverts with diameters greater than 10'.

Title: Air Quality Mobile Source Modeling

Region: Headquarters

Place Name: Statewide

Project Description: Continue development and enhancement of the statewide framework for MOVES modeling in Alaska to ensure consistent development, application, and approval of modeling workflows (e.g., input data collection and processing, model setup and execution requirements, post-processing of outputs, etc.) in all regional mobile source inventory applications envisioned within the state. These regional applications include SIP emissions/emission budgets and transportation conformity emission inventories, NEI (National Emission Inventory) submittals to EPA that consist of both planning and episodic modeling inventories, throughout the state. Continue the support of the EPA requirement to use MOVES for local communities and state, and continue to evaluate MOVES versions to ensure unique aspects of Alaska conditions are addressed.

Title: Alaska Historic Roads Eligibility Planning

Region: Headquarters

Place Name: Statewide

Project Description: Fund National Register of Historic Places eligibility determinations for selected roads for advance planning purposes and develop management plans for eligible historic roads. The project tiers off efforts accomplished under the Programmatic Agreement regarding Alaska's Highway System Roads Affected by the Federal-Aid Highway Program (Alaska Road PA), which developed a historic overview of Alaska's roads and a methodology for evaluating their National Register eligibility. The project would apply that methodology to selected roads and the historic road management plans will recommend practices consistent with the needs of transportation and historic preservation.

Title: ADA Implementation and Compliance Monitoring

Region: Headquarters

Place Name: Various

Project Description: This project will provide for the implementation stage of the ADA Transition Plan and monitoring of all implementation aspects to assure ADA specifications are met, when feasible. As part of the compliance monitoring, outdated/compromised data will be removed or repaired and location information will be entered in a geospatial database to indicate locations that are in need of proper pedestrian facilities and/or alterations. This database will continue to serve the Civil Rights Office ADA team as a tool for planning, maintenance, preconstruction, and construction.

Alaska Statewide Transportation Improvement Program

2020-2023 STIP Surface Transportation Funding Sources

Funding available to the state comes from several funding agencies, most notably the Federal Highway Administration and Federal Transit Administration. The state receives several categories of funding from each of these agencies. Each category (often referred to as fund codes) have distinctive rules for project eligibility, match ratios, and other programming factors. The following descriptions address the most significant of these categories, called apportionments.

In the project tables we've identified tentative apportionment designations for each proposed project. These apportionment assignments are estimates and are subject to change. The following paragraphs describe the apportionment categories, eligible project types, apportionment code and the ratio of federal funds. The proportion not paid by federal funds is the state, local or third party match.

Fund Code Descriptions

3PF (Third Party Funds) – Funding contributed by parties other than the State usually to provide required matching funds.

AC (Advance Construction) – An innovative financing tool permitted under FHWA rules that, with approval of the FHWA, allows the state to begin a project using state funds prior to the availability of federal funds. This tool allows the state flexibility to use its resources to more efficiently schedule project start-ups.

ACC (Advance Construction Conversion) – Accounting tool to track the repayment of state funds used to begin a project prior to the availability of federal funds.

BOND (Bonds) – Funding generated by the sale of bonds by the state.

BUILD (Better Utilizing Investments to Leverage Development) – BUILD transportation grants are major investments in road, rail, transit, and port projects that serve as a down payment on this administration's commitment to America's infrastructure

CMAQ-F (Congestion Mitigation/Air Quality Flexible) – These funds are for projects that can be proven to reduce traffic congestion and/or improve air quality in federally designated non-attainment areas. Projects such as park and ride lots, transit bus replacement, vehicle inspection and maintenance program improvements, signal coordination, ride sharing, and paving for dust control qualify for these funds. The federal funds ratio varies and is either 90.97% or 100% depending upon the specific category of work.

CMAQ-M (Congestion Mitigation/Air Quality-Mandatory) – This fund code is very similar to the CMAQ fund code listed above, but has slightly more restrictive eligibility requirements.

CST (Cruise Ship Tax) – Proceeds from the state tax on cruise ship passengers available to use on projects that support cruise operations.

DBE (Disadvantaged Business Enterprise) – A program to ensure equal opportunity in transportation contracting markets, addresses the effects of discrimination in transportation contracting, and promotes increased participation in federally funded contracts by small, socially and economically disadvantaged businesses, including minority and women owned enterprises. The statute provides that at least 10% of the amounts made available for any Federalaid highways, mass transit, and transportation research and technology program be expended with certified DBEs.

ER (Emergency Relief) – Funds available for the repair of Federal-aid highways or roads on Federal lands that have been seriously damaged by natural disasters over a wide area or by catastrophic failures from an external cause.

FBF (Ferry Boat Formula Funds) – Under MAP-21, Ferry Boat Formula Program funds are distributed to eligible entities based on the number of passengers carried (20%), vehicles carried (45%), and total route miles (35%). Eligible entities are determined in accordance with 23 U.S.C. 129(c). Funds are available until expended. Projects must be for the construction or improvements to ferryboats or ferry terminal facilities. The federal funds ratio is 80%.

FLAP (Federal Lands Access Program) – Provides funds for projects on federal lands access transportation facilities. These facilities are defined as: a public highway, road, bridge, trail, or transit system that is located on, is adjacent to, or provides access to Federal lands for which title or maintenance responsibility is vested in a state, county, town, township, tribal, municipal, or local government.

GRANT (Competitive Grant) – Federal grants that are awarded through a competitive process.

ILLU (Illustrative) – Indicates projects that would be funded and advanced if funding becomes available either through receipt of additional funds or because another project cannot be advanced; the specific source or sources of funds will be determined when and if the project is selected to be funded.

NHFP (National Highway Freight Program) – In FAST ACT section 1116 Congress designated the NHFP to improve efficient movement of freight on the National Highway Freight Network (NHFN). Each state is required to develop a freight plan to provide for immediate and long-range planning activities and investments of the State with respect to freight. Funds are available for obligation up to four years (year authorized plus three). The federal share is generally 80%, subject to sliding scale, with Interstate System projects at 90%, and certain types of improvements, such as safety, at 100%.

NHPP (National Highway Performance Program) – In MAP-21 section 1106, Congress designated the NHPP to provide support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS. This funding code incorporates previous NHS, IM and some BR fund codes. The federal funds ratio is 90.97%.

OJT (On the Job Training) – The primary objective of the OJT Program is to train and upgrade minorities and women into higher paying skilled trades and transportation technology related careers to meet the projected labor needs. Under Section 22 of the Federal-aid Highway Act of 1968 (Public Law 90-495), State highway agencies are required to certify that there are available apprenticeship, skill improvement or other upgrading programs registered with the Department of Labor or the appropriate State agency.

OSF (Other State Funds) – Funding from non-federal state funds that have been appropriated.

PLNG (State Planning) – These funds are designated for the mandatory planning tasks the department undertakes, including preparation of the Statewide Transportation Plan and State Transportation Improvement Program (STIP), statistical measurements of the transportation system (traffic volumes, pavement condition, accident locations, causes and severity, and physical characteristics of roads and highways), mapping, and management systems. The federal funds ratio is 80%.

RES (Research) – These funds are designated for research tasks the department undertakes, including engineering and economic studies and applied research. The federal funds ratio is 80%.

RHE (Rail Hazard Elimination Program) – This purpose of this program is to reduce the number of fatalities and injuries at public highway-rail grade crossings through the elimination of hazards and/or the installation/upgrade of protective devices at crossings. This program funds the federal requirement that each state conducts and systematically maintain a survey of all highways to identify railroad crossings that may require separation, relocation, or protective devices, and establish and implement a schedule of projects for this purpose. The federal funds ratio is 90%.

RTP (Recreational Trails Program) – This funding category is intended to develop and maintain recreational trails and trail related facilities for both non-motorized and motorized recreational trail uses. This program is administered by the Department of Natural Resources. The federal funds ratio is 90.97%.

S148 (Safety Sanction) – This special category of MAP-21 safety funds addresses highway safety improvement projects similar to Safety (SA) below. New SA funding terminated following 2012 apportionment with the passage of MAP-21. The funds are made available by a sanction, or reduction, to Alaska's NHPP and STP apportionments. Each year, 2.5% of these program funds are reallocated because Alaska does not have conforming laws addressing repeat DUI and open alcoholic containers on motorcycles. The federal share is 100%.

SA (Safety) – Safety projects include hazard elimination, railroad crossing, and railroad protective devices. In order to qualify, the project must be identified through the Highway Safety Improvement Program, which seeks to identify hazardous locations throughout the state based on accident histories. The federal funds ratio varies and is either 90% or 100% depending upon the specific category of work.

SFF (Special Federal Funds) – Federal funding received outside of the regular federal transportation funding and authorization bill. For example, in 2019 Congress appropriated funds to the U. S. Department of Transportation through the Consolidated Appropriations Act of 2019. These funds were not part of the Fixing America’s Surface Transportation Act, passed in 2015.

SM (State Match) – The State’s share of project costs required to match federal program funds. Depending on the particular federal program requirements, the state’s share of the costs, the state match required, will vary from as little as zero percent to as much as 50%. Most often the state’s share will range from 9.03% to 20%.

STP (Surface Transportation Program) – Flexible funding that may be used by the state and localities for projects on any Federal-aid highway, including the NHS, bridge projects on any public road, transit capital projects, bus terminals and facilities. Unlike other states, Alaska is allowed to use these funds on any public road in Alaska, regardless of classification. The federal funds ratio varies, typically 93.4% for interstate routes or 90.97% otherwise.

TAP (Transportation Alternatives Program) – The Moving Ahead for Progress in the 21st Century Act (MAP-21) replaced Transportation Enhancements (TE), Recreational Trails, and Safe Routes to School programs with Transportation Alternatives (TA), a new program funded through a set-aside from Surface Transportation Program (STP). A further set-aside is taken from Transportation Alternatives to fund the Recreational Trails Program (RTP).

Transportation Alternatives provides funding for programs and projects including on-and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation, community improvement activities, and environmental mitigation; safe routes to school projects; and projects for the planning, design or construction of boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.

URPL (Metropolitan Planning) – In Alaska, these funds can be used in any urban area within the state. Planning processes and special planning studies are eligible activities within this program. The federal funds ratio is 90.97%.

TRANSIT AND RAIL Fund Codes

5307 (Urban Formula) – The Urbanized Area Formula Funding program (49 U.S.C. 5307) makes Federal resources available to urbanized areas and to Governors for transit capital and operating assistance and for transportation related planning in urbanized areas. An urbanized area is a Census-designated area with a population of 50,000 or more as determined by the U.S. Department of Commerce, Bureau of the Census. **5307RR (Alaska Railroad Passenger Operations)** – A portion of Section 5307 funds, Capital and Operating Funds for Urbanized Areas specifically set aside for the Alaska Railroad for costs related to passenger operations.

5309 (Capital Program) – This program provides capital assistance for three primary activities:
5309BU – New and replacement buses and facilities
5309FG – Modernization of existing rail and ferry systems
5309NS – (New Starts) New fixed-guideway systems (including ferry systems)

Congress usually fully earmarks all available funding. In SAFETEA-LU Congress set aside a portion of the New Start funds for capital improvements on Alaska and Hawaii ferry systems (the two states split the set-aside). Congress also set aside a portion of the Capital Program New Starts funds for the Denali Commission for docks, waterfront development projects, and related transportation infrastructure. On occasion, a recipient agency will apply for section 5309 funds on behalf of transit agencies throughout the state and ask DOT&PF to administer these funds. When this happens, the funds are distributed through the annual Alaska Community Transportation Grant application process. The federal funds ratio is 80%.

5324 (FTA Emergency Relief Program) – Emergency repairs are generally eligible for reimbursement under pre-award authority. Emergency repairs do not require inclusion in the Metropolitan Transportation Improvement Program (TIP) or the Statewide Transportation Improvement Program (STIP), unless they include substantial functional, locational, or capacity changes.

5310 (Elderly and Persons with Disabilities Program) – This program funds transportation services to meet the special needs of the elderly and persons with disabilities. Funds are apportioned to the states based on the number of elderly and persons with disabilities in each state. Grants are available to nonprofit organizations (and sometimes governmental entities approved by the state) for the purchase of vehicles, related equipment, and the purchase of rides. SAFETEA-LU listed Alaska as one of a select group of states to participate in a pilot program that would allow a portion of these funds to be used to cover operating costs (at a 43.14% match) of projects that meet the special needs of elderly individuals and individuals with disabilities. The federal funds ratio for the remainder of these funds is 90.97%.

5311 (Non-urbanized Area Formula Program) – This program provides funding to enhance public transportation in rural and small urban areas. It also assists in the maintenance, development, improvement, and use of public transportation systems. A component of this program is the Rural Transit Assistance Program (RTAP), which provides training and technical assistance to transit operators. The federal funds ratio is 90.97% for capital projects and project administration, and up to 56.86% for operating assistance. RTAP projects are 100% federally funded.

5337GR (Section 5337 State of Good Repair) – A new formula-based State of Good Repair program is FTA's first stand-alone initiative written into law that is dedicated to repairing and upgrading the nation's rail transit systems along with high-intensity motor bus systems that use high-occupancy vehicle lanes, including bus rapid transit (BRT). These funds reflect a commitment to ensuring that public transit operates safely, efficiently, reliably, and sustainably so that communities can offer balanced transportation choices that help to improve mobility, reduce congestion, and encourage economic development.

5339 (Bus and Bus Facilities) – Funding for capital expenses for eligible rural public transit systems.

PTC (Positive Train Control) – Competitive discretionary grant funding for projects providing significant impacts to the nation, a region, or metropolitan area for eligible railroad safety technology projects.
